Discover the benefits of JDOHaD on Cambridge Journals Online (CJO)

- Register for content alerts and receive notification when new articles are published online journals.cambridge.org/doh-alerts
- Save searches
- Search across Cambridge Books Online (CBO) and Cambridge Journals Online (CJO) simultaneously using our new faceted search functionality
- Register for updates on new developments and sample content from your ‘favourite journals’
- Easily download citations to reference management software
- Access CJO on your mobile: CJOm is optimised for smart phones and other small mobile devices

Members of DOHaD receive free access to the Journal.
If you have any problems setting up your online access please contact: journals_societies@cambridge.org

Submit your research to JDOHaD
The Journal covers all aspects of research in developmental origins of health and disease (DOHaD) – from basic molecular research to health and disease outcomes, translation into policy and wider social and ethical issues.

- Global Editorial Board
- Dissemination of your research to over 5,000 libraries worldwide, including access through aid donation schemes
- Efficient online manuscript submission and tracking at ScholarOne™ Manuscripts
- FirstView publication of articles online ahead of issue and print allocation
- Generous copyright policies, compliant with all the major funding bodies
- State-of-the-art online hosting
- Forward reference linking
- Permanent record through DOI/CrossRef
- No submission or page charges
- Authors receive a free pdf of the final article

mc.manuscriptcentral.com/dohad
The British Journal of Nutrition is an international, peer-reviewed journal publishing original papers, review articles, short communications and technical notes on human and animal nutrition and basic science as applied to nutrition. Correspondence is encouraged in a Nutrition Discussion Forum. The Journal recognizes the multidisciplinary nature of nutritional science and encourages the submission of material from all of the specialties involved in research and clinical practice. The Journal also publishes supplements on topics of particular interest.

The British Journal of Nutrition is published twice monthly by Cambridge University Press on behalf of The Nutrition Society. The British Journal of Nutrition is available online at journals.cambridge.org/bjn. Tables of contents and abstracts are available free at the same website.

The Nutrition Society has as its objective the advancement of the scientific knowledge of nutrition, whether of human or animal kind, as well as the maintenance of human and animal health. Application of membership is extended to anyone whose work has contributed towards the scientific knowledge of nutrition, whether such work has been in the laboratory, the field or the clinic, and who, either experimentally, cli nically, agriculturally or medically in instruction, is also a student membership scheme with reduced subscriptions.

Participation of The Nutrition Society and application forms for membership are available at The Nutrition Society, 10 Cambridge Court, 210 Shepard Bush Road, London W6 7NJ, UK. Tel: +44 (0)20 7692 1229, Fax: +44 (0)20 7692 1776, E-mail: office@nutrition.org.uk

Journal of Nutrition

Volume 116, 2016 ISSN: 0007-1145

US POSTMasters: please send address corrections to British Journal of Nutrition, Cambridge University Press, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA.

Directors to Contributors are available from the Society at the address below or can be found on the Society’s website at http://www.nutrition.org.uk.

Offprints: The author (or main author) of an accepted paper will receive a copy of the PDF file of their article. There will be an option to purchase paper offprints, these should be ordered at proof stage. No page charges are levied by this journal.

Copyright: As of 1 July 2000 the copyright of all articles submitted to British Journal of Nutrition are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Publications Office, The Nutrition Society, 10 Cambridge Court, 210 Shepard Bush Road, Hammersmith, London W6 7NJ, UK.

Disclaimer: The information contained herein, including any expression of opinion and any projection or forecast, has been obtained from or is based upon sources believed by us to be reliable, but is not guaranteed as to accuracy or completeness. The information is supplied without obligation and on the understanding that any person who acts upon it or otherwise changes his/her position in reliance thereon does so entirely at his/her own risk. Neither the Society nor Cambridge University Press accepts responsibility for any trade advertisement included in this publication. This journal is printed on acid-free paper from renewable sources. Printed in the UK by Bell & Bain Ltd, Glasgow.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote responsible management of the world’s forests. Please see www.fsc.org for information.
Molecular Nutrition
Low-protein diet supplemented with ketoacids ameliorates proteinuria in 3/4 nephrectomised rats by directly inhibiting the intrarenal renin–angiotensin system

1491-1501

Metabolism and Metabolic Studies
Inulin oligofructose attenuates metabolic syndrome in high-carbohydrate, high-fat diet-fed rats
S. A. Kumar, L. C. Ward & L. Brown

1502-1511

Use of molecular biomarkers to estimate manganese requirements for broiler chickens from 22 to 42 d of age
L. Lu, B. Chang, X. Liao, R. Wang, L. Zhang & X. Luo

1512-1518

A post-weaning fish oil dietary intervention reverses adverse metabolic outcomes and 11β-hydroxysteroid dehydrogenase type 1 expression in postnatal overfed rats

1519-1529

Human and Clinical Nutrition
Vitamin E and the risk of pneumonia: using the I² statistic to quantify heterogeneity within a controlled trial
H. Hemilä

1530-1536

Whole-blood fatty acids are associated with executive function in Tanzanian children aged 4–6 years: a cross-sectional study
T. Jumbe, S. S. Comstock, W. S. Harris, J. Kinabo, M. B. Pontifex & J. I. Fenton

1537-1545

Use of molecular biomarkers to estimate manganese requirements for broiler chickens from 22 to 42 d of age
L. Lu, B. Chang, X. Liao, R. Wang, L. Zhang & X. Luo

1512-1518

Workplace nutrition knowledge questionnaire: psychometric validation and application
S. C. Guadagnin, E. Y. Nakano, E. S. Dutra, K. M. B. de Carvalho & M. K. Ito

1546-1552

Summation of blood glucose and TAG to characterise the ‘metabolic load index’
S. R. Emerson, M. D. Haub, C. S. Teeman, S. P. Kurti & S. K. Rosenkranz

1553-1563

No difference in acute effects of supplemental dietary calcium on blood pressure and microvascular function in obese women challenged with a high-fat meal: a cross-over randomised study
T. da Silva Ferreira, P. M. Leal, V. P. Antunes, A. F. Sanjuliani & M. R. S. T. Klein

1564-1572

A post-weaning fish oil dietary intervention reverses adverse metabolic outcomes and 11β-hydroxysteroid dehydrogenase type 1 expression in postnatal overfed rats

1519-1529

RelAte: pilot study of the effects of a mealtime intervention on social cognitive factors and energy intake among older adults living alone

1573-1581

Comparative validity and repeatability of a single question, a twenty-eight-item FFQ and estimated food records to assess takeaway meal intake
A. S. Cook, R. McCook, P. Petocz, F. O’Leary & M. Allman-Farinelli

1582-1591

The influence of energy standardisation on the alternate Mediterranean diet score and its association with mortality in the Multiethnic Cohort Study
Y. B. Shvetsov, B. E. Harmon, R. Ettienne, L. R. Wilkens, L. Le Marchand, L. N. Kolonel & C. J. Boushey

1592-1601

Substitution of meat and fish with vegetables or potatoes and risk of myocardial infarction

1602-1610

Association between sucrose intake and acute coronary event risk and effect modification by lifestyle factors: Malmö Diet and Cancer Cohort Study
K. Warfa, I. Drake, P. Wallström, G. Engström & E. Sonestedt

1611-1620

Association between predominantly plant-based diets and iron status in Chinese adults: a cross-sectional analysis
J. Yu, J. Gao, H. Zeng, X. Gao & R. Liu

1621-1630

Association between energy density of meals and snacks and overall dietary and obesity measures in British children and adolescents: the National Diet and Nutrition Survey
J. Morrison & M. R.高楼

1631-1640

Video chat technology to remotely quantify dietary, supplement and medication adherence in clinical trials
C. M. Peterson, J. W. Apolzan, C. Wright & C. K. Martin

1646-1655

Effect of whey protein and a free amino acid mixture simulating whey protein on measures of satiety in normal-weight women
S. M. Chungchunlam, S. J. Henare, S. Ganesh & P. J. Moughan

1666-1673

The influence of energy standardisation on the alternate Mediterranean diet score and its association with mortality in the Multiethnic Cohort Study
Y. B. Shvetsov, B. E. Harmon, R. Ettienne, L. R. Wilkens, L. Le Marchand, L. N. Kolonel & C. J. Boushey

1592-1601

Substitution of meat and fish with vegetables or potatoes and risk of myocardial infarction

1602-1610

Association between sucrose intake and acute coronary event risk and effect modification by lifestyle factors: Malmö Diet and Cancer Cohort Study
K. Warfa, I. Drake, P. Wallström, G. Engström & E. Sonestedt

1611-1620

Association between predominantly plant-based diets and iron status in Chinese adults: a cross-sectional analysis
J. Yu, J. Gao, H. Zeng, X. Gao & R. Liu

1621-1630

Association between energy density of meals and snacks and overall dietary and obesity measures in British children and adolescents: the National Diet and Nutrition Survey
J. Morrison & M. R.高楼

1631-1640

Video chat technology to remotely quantify dietary, supplement and medication adherence in clinical trials
C. M. Peterson, J. W. Apolzan, C. Wright & C. K. Martin

1646-1655
