

NEW MONOGRAPHS * * *

The BSHS Monograph Series has nine titles in print and one reprint in preparation. It covers important topics which might not otherwise have been published and is edited by Dr Paul Weindling, Wellcome Unit for the History of Medicine, 45-47 Banbury Road, Oxford, OX2 6PE, England.

No 4: Michael Hunter:

The Royal Society and its Fellows, 1660-1700: The Morphology of an Early Scientific Institution - 2nd edition, 1994, £10.00(US\$19.00) 291pp. Having proceeded from its original status as a lengthy paper in *Notes and Records of the Royal Society* (1976) through various impressions as a BSHS Monograph it is now easily regarded as a comprehensive and perhaps the definitive version.

No 8: Michael Shortland (ed):

Science and Nature - £10.00(US\$19.00) 291pp. Illustrated.

A collection of original essays tackling varied historical aspects of this challenging new field. Authors include Bowler, Boon, Cittadino, Kingsland, Kwa and Sheail.

No 9: Maurice Crosland:

In the Shadow of Lavoisier: the 'Annals de Chemie' and the Establishment of a New Science - £9.00(US\$17.00) 354pp. Illustrated.

The author has discovered manuscript records of the editorial board of *Annales* which was an instrument for the propagation of Lavoisier's new system of chemistry and became a European journal of international significance. This is the first detailed study of the journal and places it in both the context of the internal history of science and in the wider social and economic context of publication history.

No 10: Joe Lester & Peter Bowler:

E Ray Lankester and the Making of Modern British Biology - £9.00(US\$17.00) 219pp. Illustrated.

The biographers have had the benefit of access to a major collection of Lankester's papers hitherto not available and still in private hands. Joe Lester produced the original work and Peter Bowler has made some additions and critically edited the text from the viewpoint of a historian of science. This is a highly readable book giving as a bonus many tastes of the social flavours of the time.

TOME XLVIII - 1/2 — JANVIER-JUIN 1995

PUBLIÉE AVEC LE CONCOURS DU CENTRE NATIONAL DU LIVRE
ET DU CNRS

Débats et chantiers actuels autour de Lavoisier et de la révolution chimique

SOMMAIRE

ARTICLES :

Patrice BRET, Introduction ; Frederic L. HOLMES, The boundaries of Lavoisier's chemical revolution ; Bernadette BENSUADE-VINCENT, Eaux et mesures. Eclairages sur l'itinéraire intellectuel du jeune Lavoisier ; Marco BERETTA, Lavoisier as a reader of chemical literature ; Seymour H. MAUSKOPF, Lavoisier and the improvement of gunpowder production.

DOCUMENTATION :

Patricia ACEVES, L'enseignement et l'application de la nouvelle chimie au Mexique au temps de Lavoisier ; Victor A. KRITSMAN, Brigitte HOPPE, The study of Lavoisier's works by Russian scientists ; Danielle FAUQUE, Lavoisier, deux cents ans après. A propos des ouvrages du bicentenaire ; Patrice BRET, Trois décennies d'études lavoisiennes. Supplément aux bibliographies de Duveen.

NÉCROLOGIE :

René TATON, Michelle Goupil (1934-1993).

The pulse of history

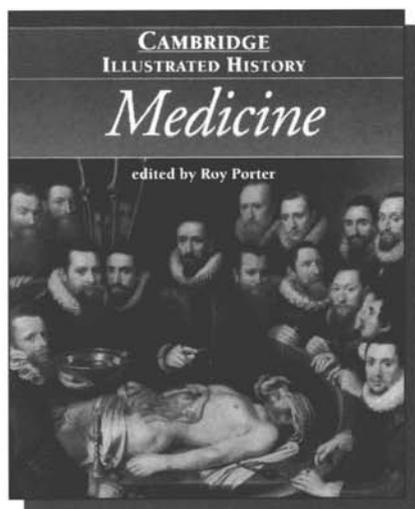

CAMBRIDGE
ILLUSTRATED HISTORY OF

Medicine

Edited by Roy Porter

From leeches to lasers, yaws to AIDS, Roman military hospitals to the NHS, opium to penicillin, *The Cambridge Illustrated History of Medicine* is the definitive guide to the key developments, personalities and events of medical history.

The lively and anecdotal text offers unusual insights into medical practice down the ages and asks why, when Western populations have never lived so long or been more healthy, there is such mistrust of medicine and its practitioners.

- Lavishly illustrated in colour throughout
- Written by a team of world-renowned experts in this fascinating subject

Published July 1996

HSC

the life of science

Between Copernicus and Galileo

Christoph Clavius and the Collapse of Ptolemaic Cosmology

James M. Lattis

By tracing Clavius's views from their medieval origins into the seventeenth century, Lattis illuminates the conceptual shift from Ptolemaic to Copernican astronomy and the social, intellectual, and theological impact of the Scientific Revolution.

"Lattis's excellent book widens the discussion of the sixteenth-century cosmological debate and shows that conservative scientists worried about much more than the dangers of the heliocentric hypothesis."—Albert Van Helden

Paper \$22.50/£17.95 314 pages illus.

Quantum Mechanics

Historical Contingency and the Copenhagen Hegemony

James T. Cushing

Focusing on the philosophical, social, and cultural forces that have shaped one of the most important developments in modern physics, this provocative book examines the role that timing can play in the establishment of theory and explanation.

Paper \$27.00/£21.50 328 pages illus.
Science and Its Conceptual Foundations series

Now in Paper

Galileo, Courtier

The Practice of Science in the Culture of Absolutism

Mario Biagioli

"An especially striking example of the new historiography. . . . The delineation of this court life is so graphic and detailed that, after a while, the reader has a sense of being there."—Richard A. Blackwell, *Science*

"[Biagioli] makes his case with a magnificent grasp of the documentary evidence."—Jan Golinski, *Times Higher Education Supplement*

Paper \$16.95/£13.50 418 pages illus.
Science and Its Conceptual Foundations series

Genius in the Shadows

A Biography of Leo Szilard, the Man Behind the Bomb

William Lanouette

with Bela Silard

Foreword by Jonas Salk

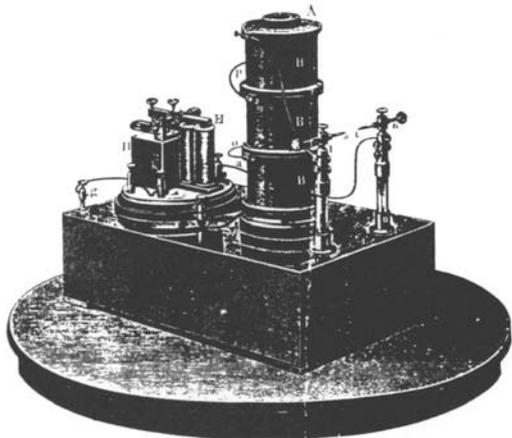

"Lanouette's exhaustively researched and artfully written account of one of the most underrated figures of the atomic age establishes Szilard as both a curmudgeon and a posthumously honored prophet."—Gregg Herken, *Nature*

Paper \$18.95/£15.25 608 pages illus.

the life of science

The Creation of Scientific Effects

Heinrich Hertz and Electric Waves
Jed Z. Buchwald

The first detailed scientific biography of Hertz and his scientific community, this book explores the social and intellectual world of nineteenth-century German physics in an ambitious attempt to reconstitute the tacit knowledge that shapes science.

Paper \$32.95/£26.25 496 pages illus.

The Scientific Revolution

A Historiographical Inquiry
H. Floris Cohen

"A magnificent and monumental book. The first real history of the history of science, wonderfully written, and enlightened with personal comments and asides that are always relevant. Indeed, it is itself a veritable landmark in the history of science."—Colin Ronan, *New Scientist*

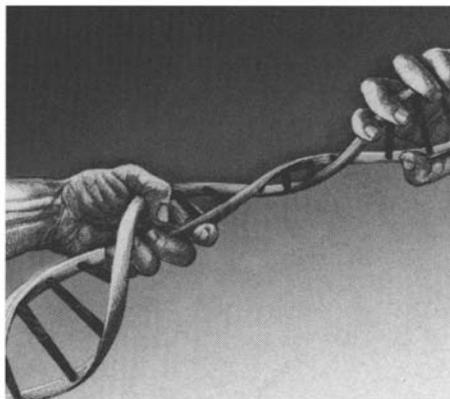

Paper \$26.95/£21.50 680 pages

Suffering Made Real

American Science and the Survivors at Hiroshima
M. Susan Lindee

"Indispensable for those who seek to understand how the Cold War, politics, and culture shaped key areas of American science, and for those who want to better understand U.S. government policies and actions regarding the development of nuclear power for war and peace from 1945 through today."—Arthur L. Caplan, Director, Center for Bioethics, University of Pennsylvania

Cloth \$29.95/£23.95 295 pages illus.

Molecular Politics

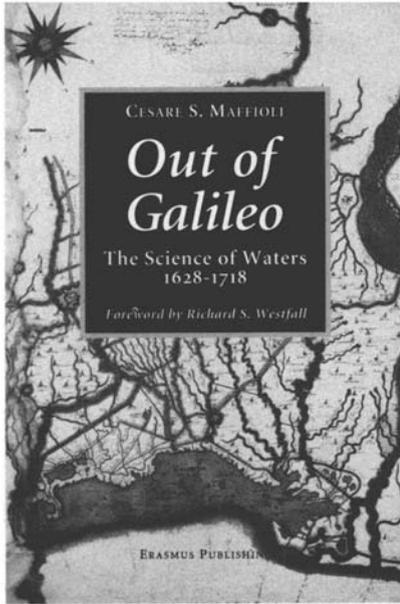

Developing American and British Regulatory Policy for Genetic Engineering, 1972-1982
Susan Wright

"One of the most important studies of the history of molecular biology and genetic engineering published to date. It should serve as an exemplar for all future work dealing with the process of establishing regulatory systems in science and technology."—Everett Mendelsohn, President, International Council for Science Policy Studies

Paper \$29.95/£23.95 616 pages illus.

OUT OF GALILEO

The Science of Waters 1628-1718

Cesare S. Maffioli

"Out of Galileo traces the developing science of moving water from Benedetto Castelli, Galileo's student and follower, through the early 18th century Paduan professor, Giovanni Poleni, the last representative, Maffioli contends, of a Galilean tradition on the subject ... Every historian of science will welcome Maffioli's careful account, which fills what has been a troubling gap in our understanding of early modern science."

— Richard S. Westfall

Hardcover; xx, 509 pp.; ill.

THE BRITISH SOCIETY FOR THE HISTORY OF SCIENCE

Membership of the Society, which normally includes a subscription to *The British Journal for the History of Science*, is open to all persons approved by the Council of the Society and elected at an ordinary meeting. The annual subscription for the membership year 1995 is £22.00 (\$45.00) or £11.00 (\$25.00) for associate membership, which includes students at centres of higher education. There is an Introductory Offer for ordinary members who pay £17.00 (\$35.00) for the first year. Applications for membership should be made on a form which is available from the Society's Executive Secretary at the address below. Other sterling rates may apply to overseas members.

Meetings: The Society mounts an ambitious programme of meetings. The pattern is flexible, but includes a three-day summer meeting, usually held at a different British University or Polytechnic each year. About four other meetings, lasting for between one and three days, are held during the year, sometimes devoted to a clearly defined theme or an important anniversary, and often arranged in conjunction with other scholarly societies.

The British Journal for the History of Science is the official organ of the Society. All correspondence on the contents of the *Journal* should be addressed to the Editor, Dr Janet Browne, The Wellcome Institute for the History of Medicine, 183 Euston Road, London, NW1 2BE, England. Books for review should be sent to the Reviews Editor, Dr John Henry, Science Studies Unit, University of Edinburgh, 21 Buccleuch Place, Edinburgh EH8 9LN.

Advertising: Contact the Journals Advertising Manager, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU.

Other publications: BSHS Monograph Series is designed to allow the publication of monographic studies in the history of science quickly and cheaply. All correspondence on the subject of monographs, and any new suggestions for titles, should be sent to the Series Editor, Dr P. Weindling, Wellcome Unit for the History of Medicine, 45-47 Banbury Road, Oxford OX2 6PE, England. Monographs are available from the Society's Executive Secretary. New titles are as follows:

4. *The Royal Society and Its Fellows 1660-1700: The Morphology of an Early Scientific Institution*. By Michael Hunter. Second edition 1994. £10.00/\$19.00 (£8.00/\$15.00 to members).
5. *Francis Bacon's Natural Philosophy: A New Source. A Transcription of Manuscript Hardwick 72A with Translation and Commentary*. By Graham Rees, assisted by Christopher Upton. 1984. £7.90/\$17.00 (£5.60/\$12.00 to members).
6. *Archives of the British Chemical Industry, 1750-1914: A Handlist*. By Peter J. T. Morris and Colin A. Russell. Contributing editor John Graham Smith. 1988. £14.50/\$31.00 (£9.00/\$19.00 to members).
7. *Index to the Scientific Correspondence of John William Dawson*. By Susan Sheets-Pyenson. 1992. £20.00/\$44.00 (£12.00/\$26.00 to members).
8. *Science and Nature: Essays in the History of the Environmental Sciences*. Ed. by Michael Shortland. 1993. £10.00/\$19.00 (£8.00/\$15.00 to members).
9. *In the Shadow of Lavoisier: The 'Annals de Chemie' and the Establishment of a New Science*. By Maurice Crossland. 1994. £9.00/\$17.00 (£7.50/\$13.00 to members).
10. *E. Ray Lankester and the Making of Modern British Biology*. By Joe Lester and Peter Bowler. 1995. £9.00/\$17.00 (£7.50/\$13.00 to members).

Each year, the Society publishes a *List of Theses in History of Science* in British universities. This is available free to members, and at £3.00 (\$6.00) to non-members on request to the Executive Secretary. Standing orders are accepted from members or non-members who wish to receive the list regularly.

The Society's *Newsletter*, an informal publication edited by Dr Frank A. J. L. James, RICHST, The Royal Institution, 21 Albemarle Street, London W1X 4BS, appears in January, May and September each year. It is free to members, £6.00 (\$12.00) for institutions and non-members. The Society's Education Section also has a regular *Newsletter, Education Forum*, edited by Dr Isobel Falconer, Lumbo Farmhouse, St Andrews, Fife KY16 8NS.

Administrative business of the Society is handled by The Executive Secretary, Wing-Commander G. Bennett, 31 High Street, Stanford in the Vale, Faringdon, Oxfordshire SN7 8LH. The Society is registered in England as a Limited Company (No. 562208) and is a Registered Charity (No. 258854).

Copying: This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with the CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to CCC of the per-copy fee of \$5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0007-0874/95 \$5.00+.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use, permission should be sought from Cambridge or the American branch of Cambridge University Press.

Back volumes are obtainable as follows: Volumes 1-23: Wing-Commander G. Bennett, 31 High Street, Stanford in the Vale, Faringdon, Oxon SN7 8LH. For volume 24 onwards, apply to Cambridge University Press.
