# The Journal of Laryngology and Otology

(FOUNDED in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY  
WALTER HOWARTH

ASSISTANT EDITOR  
G. H. BATEMAN

1. Original articles which have not been published elsewhere are invited and should be sent to the Editor. They are considered for publication on the understanding that they are contributed to this *Journal* solely. Reproduction elsewhere, in whole or in part, is not permitted without the previous written consent of the Author and Editor and the customary acknowledgement must be made.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced. Captions to illustrations should be typed on a separate sheet and sent at the same time as original photographs, etc.

The Harvard system of recording references should be used, e.g. GREEN, C., and BROWN, D. (1951) *J. Laryng.*, 65, 33. Abbreviations of Journals should follow the style recommended in *World Medical Periodicals*, published by World Health Organization, 1952.

It is most important that authors should verify *personally* the accuracy of every reference before submitting a paper for publication.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked, and no extra matter added. Proofs should be returned within 5 days.

4. Illustration blocks are provided free up to the limit of £10 per article; beyond this authors are expected to pay half the cost. Coloured illustrations will be charged in full to authors.

Blocks will normally be held by the Printers for three years after which they will be destroyed. Any author who has borne a part of the cost of his blocks is entitled to have these returned to him, but a request for this must be sent within three years of the appearance of the article, to HEADLEY BROTHERS LTD., 109 Kingsway, London, WC2.

5. Orders for reprints must be sent when returning galley proofs, and for this purpose special forms are supplied.

6. Authors of original communications on Oto-Laryngology in other journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.

7. Editorial communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS LTD., 109 Kingsway, London, WC2.

8. The annual subscription is four guineas sterling (U.S.A. \$13) post free, and is payable in advance.

9. Single copies will be on sale at 10s. od. each; copies of parts up to Vol. LXIII which are available may be purchased at 7s. 6d. each.

10. All subscriptions, advertising and business communications should be sent to the publishers, HEADLEY BROTHERS LTD., 109 KINGSWAY, LONDON, WC2.

#### *United States of America*

Orders for this *Journal* may be sent through local bookseller, or to STECHERT-HAFNER, INC., 31-33 East 10th Street, New York, or direct to the publishers, HEADLEY BROTHERS LTD., 109 KINGSWAY, LONDON, WC2, England.

## POST-TONSILLECTOMY COMFORT

### Immediate pain relief—Speedier Convalescence

The pain of traumatized tissues following tonsillectomy, demands its own relief—and points the need for analgesia that quickly reaches the irritated area.

ASPERGUM provides 'salivary analgesia' through the simple act of chewing—it brings pain-relieving acetylsalicylic acid into *intimate* and *prolonged* contact with the tonsillar

region, seldom reached even intermittently by gargling. The rhythmic stimulation of muscular action also aids in relieving local spasticity & stiffness: more rapid tissue repair is promoted. Each pleasantly flavoured chewing gum tablet provides  $3\frac{1}{2}$  grains acetylsalicylic acid, permitting frequent use. Particularly suitable for children.

## Aspergum (Category S)

for more than two decades a dependable  
and welcome aid to patient-comfort

*Ethically promoted in packages of 16 tablets and moisture proof bottles of 36 and 250*

WHITE LABORATORIES LTD., 428, SOUTHCROFT ROAD, LONDON, S.W.16

## MODEL 81 AUDIOMETER

For the first time it is now possible, with a compact and simple audiometer, to obtain accurate and reliable air and bone conduction measurements—even in cases of severe unilateral deafness.

This exclusive-featured audiometer is Amplivox Model 81, the outcome of many years' research and experience in the field of audiometry. In its development, considerable emphasis has been placed on simplicity of operation and long-term stability.

- \* Filtered White Noise masking excludes all unwanted frequencies except the critical band around the pure tone frequency in use. This permits high masking intensities to be used without discomfort and fatigue to the subject under test.

*Only Amplivox Model 81 Audiometer has these features:*

- \* Threshold calibration to British or American Standards.
- \* Filtered White Noise masking tone to 5% band width above and below frequency being tested.
- \* Insert-type earphone for masking increases inter-aural attenuation to 90dB.
- \* Indicator light signals when controls are wrongly set for a particular test—also monitors speech level.

*All enquiries to:*

### NEW BOOK

#### THE COMPARATIVE ANATOMY AND PHYSIOLOGY OF THE NOSE AND PARANASAL SINUSES

By SIR VICTOR NEGUS, M.S., F.R.C.S., Hon. F.R.C.S.(Ed.), Hon. F.R.C.S. (Ireland).

418 pages. 390 illustrations. 70s.

"The book should be in every medical library and all who have a special interest in the respiratory tract will need a copy handy for frequent reference. This original and thought-provoking work will not only give us a better understanding of respiration and of olfaction, but it will stimulate further research into the behaviour of the respiratory tract in health and in disease."—*British Medical Journal*.

### NEW EDITION

#### DISEASES OF THE NOSE, THROAT AND EAR

A Handbook for Students and Practitioners, *Seventh Edition*. By I. SIMSON HALL, M.B., Ch.B., F.R.C.P., F.R.C.S.(Edin.).

479 pages. 116 illustrations. 21s

"Concise, practical and dogmatic, this remains the best practical book on the subject for the general practitioner and the student. Typical of the care with which the book is prepared is the fact that successive editions have been adequately brought up to date without any appreciable increase in size. It contains everything the practitioner needs to know."—*Practitioner*.
