Emergence of ageing-related changes in insulin secretion by pancreatic islets of male rat offspring of mothers fed a low-protein diet.

Pharmacokinetics of fucoxanthol in human plasma after the oral administration of kombu extract.

Interaction of soyasaponins with plant ingredients in diets for Atlantic salmon, *Salmo salar* L.

Stool-fermented *Plantago ovata* husk induces apoptosis in colorectal cancer cells independently of molecular phenotype.
V. R. Sohn, A. Giros, R. M. Xicola, L. Fluvià, M. Grzybowski, A. Anguera & X. Llor

Application of NMR-based metabonomics suggests a relationship between betaine absorption and elevated creatine plasma concentrations in catheterised sows.
C. C. Yde, J. A. Westerhuis, H. C. Bertram & K. E. B. Knudsen

An *α*-lactalbumin-enriched and symbiotic-supplemented v. a standard infant formula: a multicentre, double-blind, randomised trial.

Oral inoculation of probiotics *Lactobacillus acidophilus* NCFM suppresses tumour growth both in segmental orthotopic colon cancer and extra-intestinal tissue.

Tolerance and safety evaluation of *N*, *N*-dimethylglycine, a naturally occurring organic compound, as a feed additive in broiler diets

Effect of ascorbic acid-rich diet on *in vivo* -induced oxidative stress.

Regulatory responses to excess zinc ingestion in growing rats.
T. Fujimura, T. Matsui & M. Funaba

Long-term effects of a protein-enriched diet on blood pressure in older women

Water balance throughout the adult life span in a German population.
T. Matsui, J. R. Lewis, A. Devine, R. J. Woodman & J. R. Martin

Effects of *n*-3 fatty acids, EPA v. DHA, on depressive symptoms, quality of life, memory and executive function in older adults with mild cognitive impairment: a 6-month randomised controlled trial.
N. Sinn, C. M. Wilks, J. S. Stewart, J. D. Buckley, A. M. Coates, J. Petkov & P. A. M. C. de Vries

Fish fermented product modulates protein matrix dissection.
C. C. Yde, J. A. Westerhuis, H. C. Bertram, R. J. W. Kruijer & K. E. B. Knudsen

The whey fermentation product malleable protein matrix decreases TAG concentrations in patients with the metabolic syndrome: a randomised placebo-controlled trial.

Mini-Nutritional Assessment predicts functional decline of elderly Taiwanese: result of a population-representative sample.
L.-C. Lee & A. C. Tsai

Link between lipid metabolism and voluntary food intake in rainbow trout fed coconut oil rich in medium-chain TAG.
The British Journal of Nutrition is an international, peer-reviewed journal publishing original papers, review articles, short communications and technical notes on human and clinical nutrition, animal nutrition and basic science as applied to nutrition. Correspondence is encouraged in a Nutrition Discussion Forum. The journal supports the multidisciplinary nature of nutritional science and encourages the submission of material from all of the specialties involved in research and clinical practice. The journal also publishes supplements on topics of particular interest.

The British Journal of Nutrition is published monthly by Cambridge University Press on behalf of The Nutrition Society. The British Journal of Nutrition is available online to subscribers at journals.cambridge.org/bjn

Tables of contents and abstracts are free at the same website.

Editor-in-Chief
P C Calder, School of Medicine, University of Southampton, Southampton, UK

Deputy Editors
F Biddlestone, DORA, University of Belfast, Belfast, UK
G C Burdge, Institute of Human Nutrition, University of Southampton, Southampton, UK
J L Frikken, Department of Animal Science, The Ohio State University, Columbus, OH, USA
W D Rees, Empire Programming Group, Rowett Institute of Nutrition and Health, University of Aberdeen, Aberdeen, UK
M B Schulze, Department of Molecular Epidemiology, German Institute of Human Nutrition Postdam-Rehbrueck, Nuthelet, Germany
S J Whitting, College of Pharmacy and Nutrition, University of Saskatchewan, Saskatoon, Sask., Canada

Reviews Editors
P Aggett
D J Millward, Institute of Health and Medical Sciences, University of Surrey, UK

Systematic Reviews Editor
M Makrides, Women’s and Children’s Health Research Institute and University of Adelaide, Adelaide, Australia

Supplements Editor
J Woodside, Nutrition and Metabolism Group, Centre for Public Health Research, Queen’s University, Belfast, UK

Editorial Board
J B Anderson, Edinburgh, UK
J Beilin, Abraham, USA
G Bell, Stirling, UK
M Bassi, Siena, Italy
T Bohn, Berlin, Germany
W D Rees, Empory Programming Group, Rowett Institute of Nutrition and Health, University of Aberdeen, Aberdeen, UK
M B Schulze, Department of Molecular Epidemiology, German Institute of Human Nutrition Postdam-Rehbrueck, Nuthelet, Germany
S J Whitting, College of Pharmacy and Nutrition, University of Saskatchewan, Saskatoon, Sask., Canada

The Nutrition Society has as its objective the advancement of the scientific study in all branches of nutritional science. Prospective authors should note that they (or their institutions) now retain the copyright of their material published in the British Journal of Nutrition. As a contributor you are asked to follow the guidelines set out below. For detailed information on the presentation of the technical content of your paper please see the full version of the Directions to Contributors, which can be downloaded from the Nutrition Society website (http://www.nutrition-society.org). Prospective authors may also contact the Publications Office directly on +44 (0)20 7605 6955 (telephone), +44 20 7602 1756 (fax), or edoffice@nusoc.org.uk (email).

Papers should be accompanied by a statement to the effect that the conditions laid down in the full Directions to Contributors are accepted. The statement should affirm that the submission represents original work that has not been previously published and which is not currently being considered by another journal. It should also confirm that each author has seen and approved the contents of the submitted paper. At the time of acceptance the authors should provide a completed copy of the ‘Licence to Publish’ (in lieu of copyright transfer). The Licence to Publish is available on the Nutrition Society website (http://www.nutrition-society.org). All relevant financial interests should be declared.

Text. Papers should be submitted with 1.5 line spacing and margins of at least 2 cm on each side. Text should be printed without underlining, bold or italics (except for scientific names). A standard abbreviation (e.g. Fig. 1) and SI units should be used. Typoscripts can be submitted as Word files, but authors are required to provide a typed version on hard copy. A Word processing format is required for production purposes once papers have been accepted. When substantial revisions are required to typoscripts, authors are given the opportunity to do this once only, the need for any further changes should at most result in minor revisions.

Title Page. The first page should include a concise, informative title together with the names and addresses of the authors. A contact name for correspondence should be given and telephone, fax and email addresses provided.

Authors should supply three or four key words or phrases (each containing not more than three words). A short title of up to 45 characters is required as a running head.

Abstract. Each paper should commence with an accurate and informative abstract, written as a single paragraph. It should be complete in itself and intelligible without reference to the text or figures, and should not exceed 250 words.

Tables. Tables should be reduced to the simplest form, and should not duplicate information in the text or figures. They should be typed on separate pages, one page for each table, at the end of the article and carry headings describing their content.

Illustrations. The original illustrations should accompany the submitted typoscript. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half to two-thirds. Half-tone photographs are acceptable where they clearly contribute to the text. All figures should be numbered and legends should be provided.
