Journal of Helminthology

Aims and Scope

Journal of Helminthology publishes original papers, review articles, short communications, new concepts and case studies on all aspects of pure and applied helminthology, particularly those helminth parasites of environmental health, medical or veterinary importance. Research papers on helminths in wildlife hosts, including plant and insect parasites, are also published along with taxonomic papers contributing to the systematics of a group. Research on free-living species which aims to understand the biology of parasitic relatives is also welcome. The journal will be of interest to academics and researchers involved in the fields of human and veterinary parasitology, public health, epidemiology, microbiology, biochemistry, ecology, evolution and genetics.

Journal of Helminthology is published quarterly by Cambridge University Press and is available on the internet at cambridge.org/jhl

Publisher, Production, Marketing, and Subscription Sales Office:
Cambridge University Press
