Editorial Policy
The journal publishes articles on all aspects of the scientific study of language behaviour in children, the principles which underlie it, and the theories which may account for it. The international range of authors and breadth of coverage allow the journal to forge links between many different areas of research including psychology, linguistics, cognitive science and anthropology. This interdisciplinary approach spans a wide range of interests: phonology, phonetics, morphology, syntax, vocabulary, semantics, pragmatics, sociolinguistics, and any other recognised facet of language study. Aspects of reading development are considered when there is a clear language component. The journal normally publishes six times a year, in January, March, May, July, September and November; six parts form a volume.

Abstracting
The journal is covered by relevant abstracting and indexing services including:
