Acta Neuropsychiactrica is an international journal that publishes translational high-quality research papers in neuropharmacology, neuropsychiatry, and neuroscience. The journal provides a forum for original basic and clinical research from disciplines and research areas relevant to the pathophysiology, neurobiology, and treatment of neuropsychiatric disorders.

Acta Neuropsychiactrica provides its readership with the latest perspectives from current and emerging fields of psychiatry, neurology, pharmacology, genetics, and neuroimaging. Such research may derive from the full spectrum of biological and psychological fields of inquiry encompassing classical and novel techniques/strategies. Emphasis will be given to translational original research that is of wide interest and clearly advances the field.

Acta Neuropsychiactrica welcomes full-length Original Research Articles, Short Communications, Perspectives, as well as Review Articles. Debate is encouraged in the form of Letters to the Editor. All articles published in Acta Neuropsychiactrica undergo peer review.
