

## To Appear in Our Next Issue (December 2009)

Roy Wagner	on	For Some Histories of Greek Mathematics
Helge Kragh	on	The Oscillating Universe in Modern Cosmology
Naomi Beck	on	Friedrich August von Hayek's Views on Biology, Methodology, and the Nature of Economics
Anton Oleinik	on	Inquiring into Scientific Communication: A First Step toward an Institutional Theory of Science

CAMBRIDGE

## Outstanding Titles from Cambridge!

### Global Electrification

Multinational Enterprise and International Finance in the History of Light and Power, 1878–2007

William J. Hausman,  
Peter Hertner, and  
Mira Wilkins

*Cambridge Studies in the  
Emergence of Global Enterprise*

\$80.00; Hb: 978-0-521-88035-0;  
510 pp.

*Second Edition!*

### Charles Darwin in Australia

Frank Nicholas and  
Jan Nicholas

\$36.00; Hb: 978-0-521-72867-6;  
280 pp.

### The Kaiser Wilhelm Society under National Socialism

Susanne Heim, Carola Sachse,  
and Mark Walker

\$80.00; Hb: 978-0-521-87906-4;  
502 pp.

### Pythagoras and Renaissance Europe Finding Heaven

Christiane L. Joost-Gaugier

\$90.00; Hb: 978-0-521-51795-9;  
350 pp.

### Creating Abundance Biological Innovation and American Agricultural Development

Alan L. Olmstead and  
Paul W. Rhode

\$80.00; Hb: 978-0-521-85711-6  
\$23.99; Pb: 978-0-521-67387-7;  
480 pp.

### Missiles for the Fatherland

Peenemünde, National Socialism,  
and the V-2 Missile

Michael B. Petersen

*Cambridge Centennial of Flight*

\$80.00; Hb: 978-0-521-88270-5;  
288 pp.

### Ludic Proof Greek Mathematics and the Alexandrian Aesthetic

Reviel Netz

\$99.00; Hb: 978-0-521-89894-2;  
272 pp.

### Guns, Race, and Power in Colonial South Africa

William Kelleher Storey

*African Studies*

\$85.00; Hb: 978-0-521-88509-6;  
400 pp.

*Prices subject to change.*

CAMBRIDGE

The Cambridge History of Science  
Volume 6: The Modern Biological and Earth Sciences  
Edited by Peter J. Bowler and John V. Pickstone

- Comprehensive account of the history of the life and earth sciences
- Authoritative surveys of historical thinking on science by expert authors
- Introduction to the latest thinking in the history of science for readers seeking a basic understanding on which to build

688 pages / 3 tables

Series: *The Cambridge History of Science*  
Hardback / ISBN: 978-0-521-57201-9

*Science in Context* is an international journal edited at the Cohn Institute for the History and Philosophy of Science and Ideas, Tel Aviv University. It is devoted to the study of the sciences from points of view of comparative epistemology and historical sociology of scientific knowledge. The journal is committed to an interdisciplinary approach to the study of science and its cultural development; it does not segregate considerations drawn from history, philosophy, and sociology. Controversies within scientific knowledge and debates about methodology are presented in their contexts. The journal encourages analyses whose approach is drawn from cognate disciplines such as social anthropology, art history, hermeneutics, and social sciences.

Manuscripts should be submitted, by mail or email, to the editorial office with a cover sheet including your name, fax, telephone number, and email address. The editors require a separate text of 150 words that presents the argument of your paper. Hardcopies should be anonymous and sent in triplicate accompanied by a disk preferably in Rich Text Format (RTF), or a major wordprocessing program such as MS Word. Our mailing address is: Science in Context, The Cohn Institute for the History and Philosophy of Science and Ideas, Tel Aviv University, Ramat Aviv, Tel Aviv 69978, Israel. Submissions by email should be sent to: <sic@post.tau.ac.il>. Submission of a paper is taken to imply that it has not been previously published and that it is not being considered for publication elsewhere. Upon acceptance of the paper, the author will be asked to transfer copyright to Cambridge University Press. There are no page charges.

The journal follows the author-date reference system that is generally used in the social and natural sciences. 'Documentation Two' in *Chicago Manual of Style* and a back issue of the journal should be used as guides when preparing the manuscript.

1. REFERENCE LIST: Full bibliographical information is listed alphabetically at the end of the paper. This list should include all the sources that are cited in parentheses in the text.

a. BOOKS: Author's last name, author's full first name; year, including original date in square brackets when a reprint is being cited; title; editor or translator if applicable; city; publisher. E.g. Bourbaki, Nicolas. [1960] 1994. *Elements of the History of Mathematics*. Translated by John Meldrum. Berlin: Springer.

b. ARTICLES IN BOOKS: Author's last name, author's full first name; year; title of article; title of book; editor or translator if applicable; page numbers; city and publisher. E.g. Corry, Leo. 1996. "David Hilbert and Physics." In *The Symbolic Universe: Geometry and Physics, 1890-1930*, edited by Jeremy Gray, 120-135. Oxford: Oxford University Press.

c. ARTICLES IN PERIODICALS: Author's last name, author's full first name; year; title of article; periodical; volume; page numbers. E.g. Foucault, Michel. 1978. "Politics and the Study of Discourse." *Ideology and Consciousness* 3:7-26.

d. WEBSITES: title; name of editor (if given); version; date of last update; sponsoring institution or organization; date of access; URL. E.g. *American Museum Congo Expedition 1909-1915*. Ver. 2.0. January 2003. American Museum of Natural History. 20 July 2003 <<http://diglib1.amnh.org>>.

2. CITATIONS IN TEXT: The AUTHOR and DATE (and PAGES if relevant) are set off in parentheses in the text and will refer readers to the complete information that is given in the Reference List. E.g. (Corry 1996, 120).

3. FOOTNOTES or ENDNOTES are used only to present important and relevant points that would otherwise interrupt the flow or structure of the paper. These notes are numbered consecutively and listed as endnotes, even though they will appear as footnotes in the journal.

Unusual alphabets, special characters, mathematical and chemical formulas, and all diacritical markings should be marked clearly. A small number of figures may be used to illustrate an article. Line drawings should be directly reproducible; glossy prints should be furnished for all halftone illustrations. If supplying illustrations as electronic files TIFF is the required format with a minimum resolution of 300 dpi for halftones and 1200 dpi for line drawings.

Printed in the United Kingdom at the University Press, Cambridge

# SCIENCE IN CONTEXT

VOLUME 22 | NUMBER 3 | SEPTEMBER 2009

**The Laboratory of Nature:  
Science in the Mountains – Mountains in Science, from the Late  
Eighteenth to the Early Twentieth Century**  
*Guest Edited by Charlotte Bigg, David Aubin, and Philipp Felsch*

- Charlotte Bigg, David Aubin, and Philipp Felsch:** Introduction: The Laboratory of Nature – Science in the Mountains 311
- Nicky Reeves:** “To demonstrate the exactness of the instrument”: Mountainside Trials of Precision in Scotland, 1774 323
- Philipp Felsch:** Mountains of Sublimity, Mountains of Fatigue: Towards a History of Speechlessness in the Alps 341
- David Aubin:** The Hotel that Became an Observatory: Mount Faulhorn as Singularity, Microcosm, and Macro-Tool 365
- Daniel Speich:** Mountains Made in Switzerland: Facts and Concerns in Nineteenth-Century Cartography 387
- Jan von Brevern:** Counting on the Unexpected: Aimé Civiale’s Mountain Photography 409
- Andrea Westermann:** Inherited Territories: The Glarus Alps, Knowledge Validation, and the Genealogical Organization of Nineteenth-Century Swiss Alpine Geognosy 439
- Deborah R. Coen:** The Storm Lab: Meteorology in the Austrian Alps 463
- Catherine Nisbett Becker:** Professionals on the Peak 487
- Stéphane Le Gars and David Aubin:** The Elusive Placelessness of the Mont-Blanc Observatory (1893–1909): The Social Underpinnings of High-Altitude Observation 509

*Cover illustration:* Schematic representation of mountain ranges in Europe. Detail from *Bergketten in Asien und Europa*. Colored print in Heinrich Berghaus: *Physikalischer Atlas oder Sammlung von Karten, auf denen die hauptsächlichen Erscheinungen der anorganischen und organischen Natur nach ihrer geographischen Verbreitung und Vertheilung bildlich dargestellt sind. Zu Alexander von Humboldt, KOSMOS. Entwurf einer physischen Weltbeschreibung*. Gotha 1845 and 1849 (reprint 2004, p. 62).
