PUBLISHER: Infection Control and Hospital Epidemiology (ISSN-0195-9417, Canadian GST#129780466) is published exclusively by SLACK Incorporated 12 times a year. Address: 6900 Grove Road, Thorofare, NJ 08086. Telephone: (856) 848-1000.

SHEA: 66 Canal Center Plaza, Suite 600, Alexandria, VA 22314; telephone, 703-299-0200; fax, 703-299-0204; e-mail address, info@shea-online.org.

COPYRIGHT 2004 The Society for Healthcare Epidemiology of America, Inc., and SLACK Incorporated. All rights reserved. No part of this publication may be reproduced without written permission from the publisher. Printed in the USA.

SUBSCRIPTIONS: Requests should be addressed to the publisher (except Japan). In Japan, contact Woodbell Incorporated, 4-22-11, Kitakasai, Edogawaku, Tokyo 134, Japan. Subscription rates in the United States and possessions: Individual: One year-\$139.00; Two years-\$199.00; Three years-\$259.00; Institutional: One year-\$269.00; Two years-\$459.00; Three years-\$639.00. Fellows: \$54.50 per year with proof of training status. Canada: add 7% Goods & Services tax; Overseas: add \$49.00 each year for delivery by air service. Single copies of current issues may be obtained for \$24.00.

INSTRUCTIONS TO AUTHORS: Authors may submit electronic versions of their manuscripts prepared in accordance with the 2001 revision of the "Uniform Requirements for Manuscripts Submitted to Biomedical Journals." An electronic version is available at www.icmje.org. Submit to RapidReview.com. All submissions must be accompanied by copyright form(s) signed by all authors.

REPRINTS: All requests to reprint or use material published herein should be addressed to John Kain, SLACK Incorporated, 6900 Grove Road, Thorofare, NJ 08086. For reprint orders and prices, contact Rebecca Fogarty at (856) 848-1000. Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by SLACK Incorporated, provided that the base fee of \$1.00 per copy, plus \$.20 per page is paid directly to Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923; phone (978) 750-8400. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotional purposes, or for creating new collective works.

CHANGE OF ADDRESS: Notice should be sent to the publisher 6 weeks in advance of effective date. Include old and new addresses with zip codes. The publisher cannot accept responsibility for undelivered copies. Periodicals postage paid at Thorofare, New Jersey 08086-9447 and at additional mailing offices. POSTMASTER: Send address changes to SLACK Incorporated, 6900 Grove Road, Thorofare, NJ 08086.

INFECTION CONTROL AND HOSPITAL EPIDEMIOLOGY is listed in Index Medicus, Current Contents-Clinical Practice, Hospital Literature Index, Cumulative Index to Nursing & Allied Health Literature, Nursing Abstracts, Laboratory Performance Information Exchange System, and RNdx Top 100.

Improved Skin Quality - Reduced Risk of Infection

...AND MORE THAN JUST OUR WORD TO BACK IT UP

T.R.U.E. Research Foundation has an immediate opening for an Epidemiology Project Lead at Lackland Air Force Base in San Antonio, Texas in support of the Epidemic Outbreak Surveillance (EOS) medical research study. EOS is a large-scale test bed demonstration project to integrate advanced diagnostic platforms, medical informatics, environmental monitoring, and bioinformatics analysis for enhanced situational awareness of natural or adversarial outbreaks of infectious diseases. The mission is to develop a model biodefense system that will decrease the loss of personnel, resources and time secondary to an outbreak or release of an infectious agent. Prefer Masters or Ph.D in epidemiology with 2 or more years of field experience and one or more years of advanced training or experience in molecular genetics. Must have strong background in statistics and study design. Must meet NAC clearance.

For consideration submit your resume and salary requirements to jobs@trueresearch.org.

INFECTIOUS DISEASE PHYSICIANS RENOWNED TEACHING INSTITUTION IN TEXAS IS EXPANDING THEIR MEDICAL SCHOOL

- ◆ Clinical practice with academic appointment available
- ◆ Supervise medical students and residents on rotation
- ◆ The only I.D. service in the region

Great opportunity to have your own practice and be involved in the training of future physicians. The location offers an excellent quality of life ... everything a major metro area has to offer, with the ease and convenience of a mid-size city.

- ◆ Diverse population
- ◆ Strong economic base
- ◆ Good schools
- ◆ Low cost of living
- ◆ Cultural and recreational activities year round
- ◆ Very competitive compensation and benefit package

2004 SHEA/CDC Training Course in Hospital Epidemiology

October 16-19, 2004

The program will be held October 16-19, 2004 at the Baltimore Marriot Inner Harbor Hotel. Denise Cardo, MD, David Warren, MD, and Timothy W. Lane, MD will chair this program. The program, developed by the Society for Healthcare Epidemiology of America (SHEA) and the Centers for Disease Control and Prevention (CDC), is intended for infectious disease fellows and new hospital epidemiologists. It emphasizes hands-on exercises in which participants work in small groups to detect, investigate, and control epidemiological problems encountered in a hospital setting. These work sessions are supplemented with lectures and seminars covering fundamental aspects of hospital epidemiology and surveillance, epidemic investigation, transmission and control of nosocomial infections, disinfection and sterilization, employee health, isolation systems, regulatory compliance, and quality improvement.

You should attend if you are a hospital epidemiologist or an infection control practitioner, or if you are looking for a course that will provide you with the most current information concerning infection control practices and epidemiological methods in healthcare. This fundamental program will provide you with opportunities to find solutions in real situations that will occur in the hospital setting. Intensive problem solving sessions are supplemented with lectures and seminars presented by leading authorities.

Five (5) Jonathan Freeman Scholarships in the amount of \$500 each will be awarded to infectious disease fellows to defray expenses incurred by attending the training program. In addition to the \$500 amount, each scholarship winner will receive complementary registration in the training course.

Interested fellows must submit a letter of no more than one (1) page describing why they would like to have additional training in hospital

epidemiology. A letter from the fellow's program director outlining the applicant's qualifications and suitability for course is also required. The deadline for receipt of scholarship applications for the course is October 4, 2004. The SHEA Educational Activities Committee will select the scholarship recipients based on review of these letters. Winners will be notified on October 8, 2004.

Please send scholarship applications to:

SHEA/CDC
66 Canal Center Plaza, Suite 600
Alexandria, VA 22314

Individual Registrants:	\$625
Fellows in Infectious Disease:	\$450

The Society for Healthcare Epidemiology of America (SHEA) is accredited to sponsor continuing medical education for physicians by the Accreditation Council for Continuing Medical Education.

The Society for Healthcare Epidemiology of America designated this continuing education activity for up to 24.5 credits in Category 1 of the Physician's Recognition Award of the American Medical Association.

Information regarding the schedule, hotel, and travel accommodations, discount airfare, and course fees is available online at www.shea-online.org or at SHEA's office (703) 684-1006. NOTE THAT APPLICATION FOR SCHOLARSHIP DOES NOT COUNT AS ENROLLMENT IN THE PROGRAM. Enrollment must be made separately.

5-way infection control in one complete system

Only the Bardex® I.C. Complete Care™ Infection Control Foley Catheter* System including Bacti-Guard®* silver alloy coating^{1,2,3} offers complete infection control to address the 5 risk areas during catheterization.

1 Reduce risks while catheter is indwelling^{1,2,3}

2 Minimizes infection risk at the catheter-tubing junction

3 Repels bacteria and yeasts during drainage

4 Protects against retrograde bacterial migration at the outlet

Now with the new
Bard EZ-Lok™ Sampling Port

5 Resists pathogen colonization at collection

Find out more about the Bardex® I.C. Complete Care™ Infection Control Foley Catheter* System.
