

# JOURNAL OF PLASMA PHYSICS

VOLUME 48

1992

CAMBRIDGE UNIVERSITY PRESS

*Cambridge*

*New York Port Chester Melbourne Sydney*

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge,  
Silver Street, Cambridge CB3 9EW, England*

ASSOCIATE EDITORS

PROF. D. BERSHADER

*Department of Aeronautics and Astronautics,  
Stanford University, Stanford, California 94305, USA*

PROF. E. INFELD

*Centre for Nonlinear Dynamics and its Applications, University College London,  
Gower Street, London WC1E 6BT*

PROF. P. K. KAW

*Institute for Plasma Research, Bhat, Gandhinagar 382 424, India*

PROF. D. B. MELROSE

*Research Centre for Theoretical Astrophysics, School of Physics,  
The University of Sydney, Sydney NSW 2006, Australia*

PROF. G. J. PERT

*Department of Physics, University of York, Heslington, York YO1 5DD*

DR PADMA K. SHUKLA

*Institut für Theoretische Physik IV, Ruhr-Universität Bochum, D-4630 Bochum 1, Germany*

DR GARY P. ZANK

*Bartol Research Institute, University of Delaware, Newark DE19716-4793, USA*

*Copying*

This journal is registered with the Copyright Clearance Center, 27 Congress St., Salem, Mass. 01970. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of \$05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-3778/92 \$5.00 + .00.

*ISI Tear Sheet Service*, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

*For all other use*, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

JOURNAL OF PLASMA PHYSICS (ISSN 0022-3778) is published once every two months in February, April, June, August, October and December, by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and Journals Department, 40 West 20th Street, New York, NY 10011-4211.

Three parts form a volume. The subscription price (which includes postage) of Volumes 47 and 48 (1992) is £130.00 net UK, per volume (US \$249.50 in the USA and Canada) for institutions; £65.00 (US \$180.00) per volume for individuals. Single parts cost £45.00 each (US \$86.00 in the USA and Canada) plus postage. All orders must be accompanied by payment.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, NY, and at additional mailing offices. *POSTMASTER*: send address changes in USA, and Canada to *Journal of Plasma Physics*, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 10573-9864.

# CONTENTS TO VOLUME 48

## PART 1 AUGUST 1992

Editorial notice. J. P. DOUGHERTY	1
Second harmonic excitation of a Gould–Trivelpiece mode in a beam–plasma system. G. PRABURAM and A. K. SHARMA	3
An action principle for the Vlasov equation and associated Lie perturbation equations. Part 1. The Vlasov–Poisson system. J. LARSSON	13
Modelling of a plasma column sustained by a travelling circularly polarized electromagnetic wave ( $m = 1$ mode) in the presence of a constant axial magnetic field. E. BENOVA, P. STAIKOV and I. ZHELYAZKOV	37
Exact solution of the dispersion equation for electromagnetic waves in sheared, relativistic electron beams. S. CUPERMAN and D. HERISTCHI	59
Nonlinear generation of the fundamental radiation in plasmas: the influence of induced ion-acoustic and Langmuir waves. F. B. RIZZATO and A. C.-L. CHIAN	71
The equations of reduced magnetohydrodynamics. G. P. ZANK and W. H. MATTHAEUS	85
Modulational instability of an ion wave packet in a cylindrical plasma-filled waveguide. B. GHOSH	101
Steady-state self-focusing of rippled laser beams in plasmas: arbitrary nonlinearity. M. S. SODHA, S. KONAR and K. P. MAHESHWARI	107
Intense propagation in a magnetized cold plasma: modulational instabilities of fully relativistic electromagnetic waves. R. E. KATES and D. J. KAUF	119
Nonlinear interaction of an intense electromagnetic wave with an unmagnetized electron–positron plasma. V. I. BEREZHIANI, L. N. TSINTSADZE and P. K. SHUKLA	139
Phase mixing and surface-wave decay in an inhomogeneous plasma. P. S. CALLY and Z. SEDLÁČEK	145
Effect of warm beam electrons on electrostatic shock solutions. M. DEY, U. N. DAS, K. S. GOSWAMI and S. BUJARBARUA	159
The kinetic theory of the nonlinear low-frequency response of a collisionless plasma to high-frequency electromagnetic radiation. YU. M. ALIEV, V. YU. BYCHENKOV, M. S. JOVANOVIĆ and A. A. FROLOV	167

## PART 2 OCTOBER 1992

On driven, dissipative, energy-conserving magnetohydrodynamic equilibria. M. L. GOODMAN	177
Density-modulation effects on the propagation of an electromagnetic wave in a plasma. M. LONTANO and N. LUNIN	209
Quasi-one-dimensional model equations for plasma flows in high-pressure discharges in ablative capillaries. D. ZOLER and S. CUPERMAN	215
Sheath potential distribution in a plasma including negative ions. H. YAMADA and Z. YOSHIDA	229
Nonlinear MHD waves in a dissipative plasma with Hall dispersion and the modified Burgers–Schrödinger equation. S. V. KORSUNSKY	237
Effect of large Larmor radius on the stability of an infinitely conducting inhomogeneous plasma. N. KUMAR, K. M. SRIVASTAVA and V. KUMAR	245
Stimulated emission from a laser-wiggled electron beam travelling in an electrostatic wave. S. H. KIM	261
Thermodynamics of Vlasov equilibria. E. MINARDI	281
Lagrangian description and entropy of magnetic Vlasov systems. E. MINARDI	309
Waves with nonlinear polarization due to a self-generated magnetic field in a plasma. N. B. ALEKSIC, YU. M. ALIEV, V. YU. BYCHENKOV and S. VUKOVIĆ	325
Stability of electron inertia Alfvén solitons. P. FRYCZ, R. RANKIN and J. C. SAMSON	335

## PART 3 DECEMBER 1992

Amplification of fast magnetosonic waves and the cut-off spectrum. I. M. RUTKEVICH and M. MOND	345
Amplification of magnetovortex waves in planar MHD flows. I. M. RUTKEVICH and M. MOND	359
Second-order oscillations of a Vlasov–Poisson plasma in Fourier-transformed velocity space. Z. SEDLÁČEK and L. NOCERA	367
Generation of large-amplitude plasma wakefields with low phase velocities by an intense short laser pulse. I. G. MURUSIDZE and L. N. TSINTSADZE	391
Nonlinear self-interaction of plasma electromagnetic pulses propagating obliquely to a very strong ambient magnetic field. R. E. KATES and D. J. KAUP	397

On vertical spinning Alfvén waves in a magnetic flux tube. L. M. B. C. CAMPOS and N. L. ISAEVA	415
Study of lower-hybrid wave propagation in the presence of low-frequency fluctuations. B. FISCHER and M. KRÄMER	435
Velocity-shear instability of relativistic electron beams: a systematic exploration of the entire $(\omega, k)$ space. D. HERISTCHI and S. CUPERMAN	453
Numerical study of self-interaction of Bernstein waves by nonlinear Landau damping. M. SUGAWA	465
The influence of ion streaming and weak relativistic effects on the modulational instability of ion-acoustic waves. E. J. PARKES	477
Alfvén surface waves along cylindrical annular streaming jets having a very dense fluid mantle pervaded by longitudinal magnetic fields. A. E. RADWAN	487
AUTHOR INDEX TO VOLUME 48	501

**Fast, timely, and reliable...  
the pre-eminent journal in its field**

**All about modern astronomy and  
astrophysics, clearly presented and  
thoroughly referenced...**

# ASTRONOMY AND ASTROPHYSICS

A European Journal

# THE ASTRONOMY AND ASTROPHYSICS REVIEW

**Editors-in-Chief:**

**J. Lequeux**, Observatoire de Meudon, Meudon, France  
**M. Grewing**, Astronomisches Institut Tübingen, Germany

Edited by an international staff of scientists and published on behalf of the astronomical societies of twelve European countries, with the support of the European Southern Observatory (ESO), this essential journal covers all aspects of astronomy and astrophysics - theoretical, observational, and instrumental - independently of the techniques employed to obtain the results - numerical analysis, optical, radio, particles, space vehicles, etc. Letters to the editor, research notes and occasional review papers are included.

*Astronomy and Astrophysics* is divided into the following sections:

1. Letters;
2. Cosmology;
3. Extragalactic astronomy;
4. Galactic structure and dynamics;
5. Stellar clusters and associations;
6. Formation, structure and evolution of stars;
7. Stellar atmospheres;
8. Diffuse matter in space (including H-regions and planetary nebulae);
9. The Sun;
10. The solar system;
11. Celestial mechanisms and astrometry;
12. Physical and chemical processes;
13. Instruments, data processing, and computational methods.

It is abstracted/indexed in *Astronomy and Astrophysics Abstracts*, CAS, Current Contents, INIS, Inspec, Physics Briefs, PHYS on STN, Technical Information Center/Energinform, and Zentralblatt für Mathematik.

**Managing Editor:**

**L. Woltjer**, Saint Michel l'Observatoire, France

**Editorial Board:**

**M. C. E. Huber**, Noordwijk, The Netherlands

**P. Léna**, Meudon, France

**P. G. Mezger**, Bonn, Germany

**F. Pacini**, Firenze, Italy

**S. R. Pottasch**, Groningen, The Netherlands

**M. Rees**, Cambridge, UK

Providing the researcher with a primary source for reviews that present a complete and well-balanced survey of the world literature in astronomy and astrophysics, *The Astronomy and Astrophysics Review* includes developments in atomic, molecular or particle physics directly relevant to astronomy as well as cosmic ray physics, studies in the solar systems and computational procedures with specific astronomical applications.

The primary objective of this journal is to review all important fields from time to time, with the frequency of review being determined by the amount of activity in the different areas. Thus, the collected volumes of *The Astronomy and Astrophysics Review* should provide a complete survey of the major recent developments in astronomy as a whole.

For both journals personal rates are available!

# PLASMA DEVICES

# AND OPERATIONS

## Editor in Chief

V.A. Glukhikh, D.V. Efremov Institute, St Petersburg, Russia

## Aims and Scope

*Plasma Devices and Operations* focuses on engineering problems with experimental devices for fusion research and on experimental tokamaks. Topics covered include the latest developments in the following:

PLASMA TECHNOLOGY, ENGINEERING AND APPLICATIONS • PLASMA SOURCES AND PULSED PLASMA DEVICES • PLASMA ACCELERATORS • NEUTRAL BEAM AND RADIO FREQUENCY HEATING SYSTEMS • INERTIAL PLASMA CONFINEMENT SYSTEMS • MHD DEVICES • CONTROLLED FUSION AND FUSION TECHNOLOGY • LASERS • MIRROR TRAPS • FUSION REACTOR DESIGN AND VACUUM TECHNOLOGY • STRUCTURAL MATERIALS • MAGNET SYSTEMS • FIRST WALL AND PLASMA FACING COMPONENT • OPERATION TECHNOLOGY • THE FUEL CYCLE

## A Selection of Papers

- ◆ Tokamak-15 Electromagnetic System Design and Test Results  
*E. Bondarchuk and L.B. Dinaburg*
- ◆ T-15 Control System  
*N.D. Vasil'ev, V.G. Irkin and I.V. Mozin*
- ◆ Plasma Position and Current Control in T-15 Tokamak  
*V.A. Belyakov, S. Bender and E. Bondarchuk*
- ◆ T-15 Plasma Chamber Design and Testing  
*Yu.M. Ermilin, A.I. Kasatkin and Yu. Y. Krasikov*
- ◆ Quasistationary Plasma Accelerators for Experiments on Thermonuclear Fusion and Technology  
*A.A. Drozdov et al.*
- ◆ Full-Scale Prototype of Continuous Pellet Injector for ITER  
*A.P. Andreev et al.*

## Canadian Journal of Physics

ISSN 0008-4204

Honorary Patron, Nobel Laureate G. Herzberg

Editor: D.D. Betts

The *Canadian Journal of Physics* publishes research papers in all areas of physics, as well as in cross-disciplinary areas. The journal from time to time publishes topical review articles and encourages the publication of special issues in which there is a strong concentration of articles in a given field. Recent special issues include "Proceedings of the Fifth Canadian Semiconductor Technology Conference" (April 1991), and the "Special issue to mark the inauguration and first year of Operation of the Canadian Network for Space Research" (August/September 1991). An internationally recognized general physics journal, it has published articles submitted by authors in more than 25 countries and attracts subscriptions from more than 65 countries.

## INSTRUCTIONS TO AUTHORS

Authors wishing to have papers published in the *JOURNAL* should communicate them to any one of the editorial board, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the *JOURNAL* free of charge, and additional offprints can be purchased if ordered in advance.

**JOURNAL OF PLASMA PHYSICS**

Volume 48 Part 3 December 1992

**CONTENTS**

Amplification of fast magnetosonic waves and the cut-off spectrum I. M. RUTKEVICH AND M. MOND	345
Amplification of magnetovortex waves in planar MHD flows I. M. RUTKEVICH AND M. MOND	359
Second-order oscillations of a Vlasov–Poisson plasma in Fourier-transformed velocity space ZDENĚK SEDLÁČEK AND LUIGI NOCERA	367
Generation of large-amplitude plasma wakefields with low phase velocities by an intense short laser pulse I. G. MURUSIDZE AND L. N. TSINTSADZE	391
Nonlinear self-interaction of plasma electromagnetic pulses propagating obliquely to a very strong ambient magnetic field RONALD E. KATES AND D. J. KAUP	397
On vertical spinning Alfvén waves in a magnetic flux tube L. M. B. C. CAMPOS AND N. L. ISAEVA	415
Study of lower-hybrid wave propagation in the presence of low-frequency fluctuations B. FISCHER AND M. KRÄMER	435
