Bank _____
Address of Bank _____

Please pay for the credit of:
Fauna and Flora Preservation Society
Account No. 60336130, Barclays Bank plc
(20-12-75), 139/142 North Street, Brighton,
East Sussex BN1 1RU, my subscription of
£ _____ due on _____ and the same
amount on the same day each year until further notice.

Signature _____

Fauna and Flora Preservation Society, 83 North Street,
Brighton, East Sussex BN1 1ZA.

APPLICATION FOR MEMBERSHIP

I/We apply for _____ Membership*

Name in full _____
(block letters)

Title (Mr/Mrs/Ms/Dr/other) _____

Address _____
(block letters)

*MEMBERSHIP CATEGORIES

Standard	£20	Family	£25
Concessionary†	£12	Benefactor	£35
Associate††	£10	Life	£1000

† If applying for Concessionary Membership, please specify whether senior citizen _____, unemployed _____, or full-time student _____. If student please give date you expect to finish studies _____.

†† This category does not entitle you to receive the Society's journal *Oryx*.

I enclose £ _____
Plus 30% for payments
in other currencies _____
Plus £6.40 for airmail
rate (see inside front
cover for despatch
details) _____

TOTAL ENCLOSED _____

OR I wish to pay by Banker's Order

NEW for 1992

MOLECULAR ECOLOGY

Blackwell Scientific Publications are proud to announce the launch of a prestigious, international, primary journal aimed at the interface between molecular biology and the ecological sciences.

Molecular Ecology will publish the highest quality papers in the newly-emerging and rapidly developing field of molecular ecology, with particular emphasis on natural populations and environments, including the release of genetically engineered organisms. Submitted papers will be considered by a distinguished international panel of editorial advisors, and editorial and production procedures will ensure rapid publication. The remit of *Molecular Ecology* will be to provide a vehicle for the publication of the best fundamental research findings within the following, and related fields:

- **Molecular Population Biology**
 - population and evolutionary genetics
 - behavioural ecology
 - conservation biology
- **Molecular Environmental Genetics**
 - population ecology and gene flow
 - ecological aspects of environmental release
 - genetic exchange within the natural environment
 - competitiveness and species invasion
- **Molecular Adaptation**
 - genetic differentiation and physiological adaptation
 - environmental effects on gene expression
- **Technological Developments in Molecular Ecology**
 - molecular techniques for species identification
 - development of novel probes
 - sequences and primers for population studies

Receiving Editors

Dr Terry Burke

Osney Mead, Oxford OX2 0EL, UK

Notes for contributors

General *Oryx* publishes original articles and reports dealing with the conservation of species and habitats throughout the world, with particular emphasis on those that are endangered.

Edited manuscripts are returned to authors so that corrections can be made before typesetting. Authors should check these carefully since corrections at page proof stage are expensive. Page proofs will be sent to the author for approval before going to press. Contributors receive two free copies of the journal and will be entitled to buy additional copies at £2.00 each, post free. Offprints may be ordered at cost price.

Contributions should be concise but informative, normally in English. Articles should be as short as possible, preferably under 2500 words, and very short articles are acceptable.

Manuscripts should be typed on one side only and double-spaced on A4 paper (208x298 mm). The left-hand margin must be at least 40 mm wide. Two copies should be submitted and authors are also invited to submit papers on disk, either 5¼" IBM compatible (most or word-processing programmes) or 3½" Apple format (MacWrite only). Correspondence should be sent to: Dr Jacqui Morris, Editor of *Oryx*, Fauna and Flora Preservation Society, 1 Kensington Gore, London SW7 2AR, UK.

Footnotes should be avoided but, if necessary, should be indicated with asterisks in the text.

The author's name and postal address should follow any acknowledgments and references at the end of the article.

References in the text should give the author's name with the year of publication in parenthe-

ses. The reference list should be in alphabetical order and include the full article title.

References should be given according to the abbreviations in the *World List of Scientific Periodicals*. Thus:

Aveling, C. and Harcourt, A.H. 1984. A census of the Virunga gorillas. *Oryx*, **18**, 8–13.

Hartshorn, M.G. 1983. Wildlife conservation in Central America. In: *Tropical Rain Forest: Ecology and Management* (eds S. L. Sutton, T. C. Whitmore and A. C. Chadwick), pp. 421–423. Blackwell Scientific Publications, Oxford.

Illustrations are welcomed and ideally should be glossy, black-and-white whole-plate prints. Good colour slides are acceptable if black-and-white photographs are not available.

Line drawings and maps should be in black ink on strong white or translucent paper. Lettering on maps and figures should be sent on a separate copy of the figure along with the unlabelled original.

Captions for figures should be typed consecutively on a separate sheet.

Tables. Each table should be self-explanatory and typed on a separate sheet with an appropriate caption.

Scientific names should be underlined and not placed in parentheses. Species' names should follow a checklist, which should be mentioned in a covering letter where there is a risk of confusion.

The first time a species is mentioned its scientific name should be given. English names should be in lower case throughout except where they incorporate a proper name.
