# JFM ARCHIVE

## Journal of Fluid Mechanics

Digital Archive  
1956–1996

*Vital research from  
the definitive source*

The JFM Digital Archive  
contains every article from the  
first 40 years of the journal,  
scanned and digitised to the  
highest standards.

Please speak to your librarian  
about gaining access.

# APSIPA Transactions on Signal and Information Processing

## Editor-in-Chief

Antonio Ortega, *University of Southern California, USA*

An Open Access, e-only journal published in partnership with the Asia-Pacific Signal and Information Processing Association (APSIPA).

The Journal will serve as an international forum for signal and information processing researchers across a broad spectrum of research, ranging from traditional modalities of signal processing to emerging areas where either (i) processing reaches higher semantic levels (e.g., from speech recognition to multimodal human behaviour recognition) or (ii) processing is meant to extract information from datasets that are not traditionally considered signals (e.g., mining of Internet or sensor information).

# Wireless Power Transfer

**Editor**

Apostolos Georgiadis, CTTC, Spain

Launching in 2014, *Wireless Power Transfer* will be the first journal dedicated to publishing original research and industrial developments relating to wireless power. The Journal will pull together research from across the field, covering aspects such as RF technology, near-field energy transfer, energy conversion and management, electromagnetic harvesting, novel materials and fabrication techniques, energy storage elements, and RFID-related electronics. *WPT* will cover all methods of wireless power transfer and articles will reflect the full diversity of applications for this technology, including mobile communications, medical implants, automotive technology, and spacecraft engineering.

INTERNATIONAL JOURNAL OF

**MICROWAVE AND WIRELESS TECHNOLOGIES****CONTENTS****POWER AMPLIFIER DESIGN****Dual-band impedance transformation networks for integrated power amplifiers**

Robert Wolf, Niko Joram, Stefan Schumann and Frank Ellinger

1

**PASSIVE COMPONENTS AND FILTERS****Tri-band filter with multiple transmission zeros and controllable bandwidths**

Qun Li, Yong-Hong Zhang, Xin Feng and Yong Fan

9

**Novel N-band tunable resonator based on N-order dual-behavior resonator and tunable capacitors**

Erwan Fourn, Cedric Quendo and Eric Rius

15

**Compact UWB BPF using slotted resonator with an independently controllable notched band**

Gholamreza Karimi, Farnaz Khamin-Hamedani and Hesam Siahkamari

25

**Low-insertion loss phase shifter for millimeter-wave phased array antennas**

Ahmed Shehata Abdellatif, Aidin Taeb, Nazy Ranjkesh, Suren Gigoyan, Elizaveta Nenasheva and Safieddin Safavi-Naeini

33

**ANTENNA DESIGN, MODELING AND MEASUREMENTS****An analytical simplified model to characterize focused aperture antennas**

Antonio García-Pino

41

**Gain-intensified slot antennas backed by SIW cavity using high-order cavity resonance**

Reza Bayderkhani, Keyvan Forooraghi and Bijan Abbasi-Arand

51

**Analysis and design of a 3.5-GHz patch antenna for WiMAX applications**

Funda Cirik and Bahadır Süleyman Yıldırım

63

**A triple-band antenna array for next-generation wireless and satellite-based applications**

Asghar A. Razzaqi, Bilal A. Khawaja, Mehrab Ramzan, Muhammad Javed Zafar, Syeda Areeba Nasir, Muhammed Mustaqim, Munir A. Tarar and Tauseef Tauqeer

71

**Planar compact dual-band monopole antenna with circular polarization for WLAN applications**

Jui-Han Lu and Hao-Shiang Huang

81

**Improved polarization purity for circular microstrip antenna with defected patch surface**

Abhijyoti Ghosh, Sudip Kumar Ghosh, Dia Ghosh and Sudipta Chattopadhyay

89

**A planar UWB antenna based on MB-OFDM applications with switchable dual band-notched for cognitive radio systems**

Vahid Sharbati, Pejman Rezaei, Ali Shahzadi and Mohammad M. Fakharian

95

**Asymmetric coplanar inverted L-strip-fed monopole antenna with modified ground for dual band application**

Kalikuzhackal Abbas Ansal and Thangavelu Shanmuganatham

103

**Design of wideband orthogonal MIMO antenna with improved correlation using a parasitic element for mobile handsets**

Ali Akdagli and Abdurrahim Toktas

109

**Design of a compact MIMO antenna system with reduced mutual coupling**

Mohammed Younus Talha, Kamili Jagadeesh Babu and Rabah W. Aldhaheer
