

Notes for contributors

A submission to Applied Probability is considered as a submission to either *Journal of Applied Probability* (JAP) or *Advances in Applied Probability* (AAP). Longer papers are typically published in AAP, but the assignment of papers between the two journals is made by the Editor-in-Chief on an issue-by-issue basis. Short communications and letters specifically relating to papers appearing in either JAP or AAP are published in JAP.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L^AT_EX class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted electronically through ScholarOne at <https://mc.manuscriptcentral.com/apjournals>. All submissions will be acknowledged on receipt.

Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0001–8678/19

Volume 51 **Number 1**

- 1 CHRISTINA GOLDSCHMIDT AND ELEONORA KREAČIĆ. The spread of fire on a random multigraph
- 41 AMARJIT BUDHIRAJA AND ERIC FRIEDLANDER. Diffusion approximations for load balancing mechanisms in cloud storage systems
- 87 YI-SHEN LIN AND YI-CHING YAO. One-sided solutions for optimal stopping problems with logconcave reward functions
- 116 DANIEL HUG AND WOLFGANG WEIL. Determination of Boolean models by densities of mixed volumes
- 136 STEPHAN ECKSTEIN. Extended Laplace principle for empirical measures of a Markov chain
- 168 QI-MING HE, GÁBOR HORVÁTH, ILLÉS HORVÁTH AND MIKLÓS TELEK. Moment bounds of PH distributions with infinite or finite support based on the steepest increase property
- 184 NAOKI KUBOTA. Deviation bounds for the first passage time in the frog model
- 209 YE CHEN AND ILYA O. RYZHOV. Complete expected improvement converges to an optimal budget allocation
- 236 XIUCAI DING. Singular vector distribution of sample covariance matrices
- 268 ANDREW DAW AND JAMOL PENDER. New perspectives on the Erlang-A queue
- 300 MELDA ORMECI MATOGLU, JOHN H. VANDE VATE AND HAIYUE YU. The economic average cost Brownian control problem
