

THE MATHEMATICAL SCIENTIST (TMS)

This publication contains papers on a variety of mathematical topics for the general information and enjoyment of mathematicians, statisticians and computer scientists; it also appeals to workers in any other discipline lending itself to the application of mathematical methods. Readers are encouraged to submit short papers, letters and problems concerned with the theory and application of mathematics, statistics or computing. Material for publication should be presented in a clear and simple style, suitable for an informed but non-specialist mathematical audience, and may be sent to any member of the editorial board:

Editor-in-chief: J. Gani (*Australian National University, Canberra*)

Editors:

R. Anderssen (*CSIRO, Canberra*), Rosemary Bailey (*Goldsmiths' College, London*), J. Blake (*University of Birmingham*), Paul M. Cohn (*University College London*), W. Forbes (*University of Waterloo*), John Gower (*Rothamsted Experimental Station, Harpenden*), C. C. Heyde (*Australian National University, Canberra*), K.-H. Hoffmann (*Universität Augsburg*), A. Konheim (*University of California, Santa Barbara*), Hilary Ockendon (*Mathematical Institute, Oxford*), Basil Rennie (*Burnside, S. Australia*), S. Resnick (*Cornell University, Ithaca, NY*), G.-C. Rota (*Massachusetts Institute of Technology*), and R. Stanton (*University of Manitoba, Winnipeg*).

Each volume consists of two issues distributed in June and December, totalling approximately 128 pages. Volume 17 (1992) costs £8.00 (US\$14.00, \$A. 18.00).

Papers to appear in forthcoming issues include:

A brief history of infinite-dimensional skew fields, by P. M. Cohn

Evaluating fuzzy representations of uncertainty, by Michael Laviolette and John W. Seaman, Jr.

Evidence and the posterior Bayes factor, by Murray Aitkin

Some (more or less) naturally occurring mixtures, by Norman L. Johnson and Samuel Kotz

Comparing means of two Poisson distributions, by Hardeo Sahai and Satish C. Misra

A maximum likelihood proof of the Hadamard inequality, by ByoungSeon Choi

The waiting time for the occurrence of k or more events in each of n independent Poisson processes, by William Woodside

A three-door game show and some of its variants, by V. V. B. Rao and M. B. Rao

Finite mapping by neural networks and truth functions, by Y. Ito

Orders and requests for further information should be sent to

Executive Editor, Applied Probability,
Department of Probability and Statistics,
The University, Sheffield S3 7RH, UK.

SUBSCRIPTION RATES

Subscription rates (post free) for the 1992 volume of *Advances* are as follows:

Subscribers in North, Central and South America, and Australia:

US\$159.00; \$A204.00; £90.00 for libraries and institutions;

US\$53.00; \$A68.00; £30.00 for individuals belonging to a recognised scientific society.

All other subscribers:

£90.00 for libraries and institutions;

£30.00 for individuals belonging to a recognised scientific society.

All enquiries about *Advances*, as well as other subscriptions, should be sent to the Executive Editor, Miss M. Hitchcock, Department of Probability and Statistics, The University, Sheffield S3 7RH, England. The price of back numbers varies from volume to volume, and enquiries should be sent to the Executive Editor. Cheques, money orders, etc. should be made out to *Applied Probability*; cheques on U.S., U.K. and Australian banks will be acceptable.

NOTES FOR CONTRIBUTORS

Contributions published in *Advances* may be of six kinds:

(1) *review papers*; (2) *longer research papers* in applied probability, which may include expository material; (3) *expository papers* on branches of mathematics of interest to probabilists; (4) *papers outlining areas in the biological, physical, social and technological sciences* in which probability models can usefully be developed; (5) *papers in applied probability presented at conferences* which do not publish their proceedings; (6) *letters to the editor* on any appropriate topic in applied probability. (Note: Letters relating specifically to papers which have appeared in the *Journal of Applied Probability* will continue to be published in the *Journal*.)

Research papers not exceeding 20 printed pages and *short communications* are published in the *Journal of Applied Probability*. The editors may publish accepted papers in either journal, according to the space available, in order to meet the 15-month deadline in publication referred to below.

Submission of papers

Papers submitted to *Advances in Applied Probability* are considered on the understanding that they have not been published previously and are not under consideration by another publication. Papers will not be reprinted without the written permission of the Trust. It is the policy of *Advances* not to accept for publication papers which cannot appear in print within 15 months of the date of receipt of the final version. Authors will receive 50 reprints of their papers free, and joint authors a proportional share of this number. Additional reprints will be provided at cost.

Papers should be written in English or French; papers in other languages may be accepted by the editors, but will appear (subject to the author's agreement) in English or French translation in *Advances*. Scripts should be typewritten, using double spacing, and at least one copy should be on one side of the paper only. Each paper should be accompanied by

(i) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results;

(ii) a list of keywords detailing the contents for the purpose of computerised information retrieval;

(iii) primary and secondary classifications using the 1991 Mathematics Subject Classification, to be found in the 1990 Annual Index of *Mathematical Reviews*.

Authors are advised to consult *The Author's Guide to the Applied Probability Journals* when preparing papers for submission. A copy of this guide may be obtained on application to the Applied Probability Office.

For efficiency in processing, authors are requested to send three copies of all submissions to the Applied Probability Office in Sheffield, rather than to individual editors. Authors overseas are asked to ensure that their submissions are sent by airmail. The Editor-in-Chief and the Applied Probability Office are in regular contact and full details of all papers submitted are available to Professor Heyde at The Australian National University in Canberra.

Copyright

The copyright of all published papers shall be vested in the Trust. When a paper is accepted for publication, the Trust requests the author(s) to sign a form assigning copyright to the Trust. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$00.50 per copy, plus .10 per page is paid directly to CCC 27 Congress St., Salem, MA 01970, U.S.A. 0001-8678/92 \$00.50 + .10.
