The American Political Science Association’s Personnel Service operates as a clearinghouse, bringing together political scientists seeking positions and prospective employers. Registration in the service is open to members of the Association and to Political Science Departments. Membership in the Service, which includes a subscription to the monthly Newsletter, is $6.00 per year. Membership in the Credential Referral Service of the Personnel Service is an additional $8.00.

A Newsletter, listing openings for political scientists including teaching, administrative and research openings, is mailed monthly to all Personnel Service members. Positions are listed by institution with a brief description of each opening.

CREDENTIAL REFERRAL SERVICE
A file will be maintained at the Association office for all members of the Credential Referral Service. This file will include a resume, a dissertation abstract and/or a list of publications and up to three letters of reference for each member. Referrals are made upon the request of a member or of an institution.

EMPLOYERS USING THE SERVICE
The Association’s Council has adopted a policy that it is a professional obligation of all political science departments to list publicly all vacancies in the APSA Personnel Service Newsletter for which they are recruiting at the Instructor, Assistant and Associate Professor levels. In addition, the listing of openings at the Full Professor level is strongly encouraged. There is no cost to the institution listing its vacancies with the Service. THE PINNACLE
The Contemporary American Presidency

John F. Murphy, U.S. Coast Guard Academy

In this fresh analysis of the modern American presidency, the author asserts that President Truman recognized basic transformations in the nation wrought by World War II, and that he moved to create in the presidency an instrument of permanent authority capable of pursuing a national agenda. Truman thus placed the President at the pinnacle of authority and responsibility in the nation, and he and his successors must be evaluated in that light. Professor Murphy then examines the thrust of each administration, its success in achieving the national agenda, prospects and possible problems for the presidency. 225 pages/April 1974/paperbound

Justices and Presidents
A Political History of Appointments to the Supreme Court
HENRY J. ABRAHAM, University of Virginia. Since the adoption of the U. S. Constitution, one hundred men have assumed seats on the Supreme Court; an additional 26 nominees failed to win Senate confirmation. What motivations—political, personal, judicial—lay behind each Presidential choice? How often has a Justice confounded the expectations of the Chief Executive who appointed him? What kind of justices has this appointment process given us?

Henry J. Abraham seeks the answers to these questions in his new study, blending scholarly analysis and pertinent anecdotes to provide an important new perspective on the forces shaping our highest court.

Crimes of Politics
Political Dimensions of Criminal Justice
Francis A. Allen
Francis A. Allen addresses himself to ideological shifts affecting the dimensions of criminal justice, the nature of political crimes, and the significance and problems of political trials. The author refers to some of the trials and prosecutions of political offenders, including some recent celebrated cases. He suggests that some criminal processes be severely limited, that surveillance procedures by police be supervised, and that the exercise of prosecutors’ discretion be curtailed. $6.95

The Rise of Guardian Democracy
The Supreme Court’s Role in Voting Rights Disputes, 1845–1969
Ward E. Y. Elliott
Ward E. Y. Elliott contrasts the phenomenal outburst of voting rights reforms in the last decade with earlier reforms and finds the modern actions, though more democratic in inspiration and substance, less democratic in effect. Elliott examines the dismal results of reforms endorsed by social scientists and concludes that they are as much examples of power guiding knowledge as of knowledge guiding power. *Harvard Political Studies.* $15.00

The Failure of the Second London Naval Conference and the Onset of World War II

THE DEATH OF COMMUNAL LIBERTY
A History of Freedom in a Swiss Mountain Canton
BENJAMIN R. BARBER
For centuries the group of alpine villages that make up modern Canton Graubünden has managed to maintain its remarkable political tradition of direct democracy. But assimilation into the wider context of Switzerland and Europe has brought this tradition of communal liberty into violent conflict with the forces of modernization. Combining political theory and history, Benjamin Barber's multifaceted study traces the growth, maturity, and decline of a political and social life-style that may offer a communitarian alternative to the Anglo-American experience of representative government as an increasingly alienating and stifling bureaucracy. $12.50

Let's bring government documents down to size.

By that we mean make them more manageable and accessible through microforms.

Take, for example, the new subscription service we offer for THE CONGRESSIONAL RECORD. For the first time, you can subscribe to both a Monthly Index and Guide to the Congressional Record, plus issues of the RECORD on microfiche. The comprehensive and easy-to-use hard-copy Monthly Index makes information in the RECORD more accessible than ever before. And timely, too, because both the index and the microfiche are shipped within 10 days of the month covered.

Our collection includes thousands of other government documents, many of them out-of-print or difficult-to-obtain. Among these are The Catalog of United States Census Publications, 1820-1945 ... all Congressional Hearings from 1839 through the 83rd Congress of 1954 ... The Annals of Congress – covering the proceedings of the 1st through 18th Congresses, 1789-1824 ... Session Laws for all the states and territories prior to 1900 ... and The Monthly Labor Review, 1915-1972.

What's more, we offer many non-governmental source materials about government. These include a tape cassette series on the Structure and Function of American Government, plus thousands of doctoral dissertations covering all aspects of government, its history and actions.

How do we size up in relation to your needs? To get a better idea, write to our Literature Services Department and ask for information about the types of documents or materials you're interested in. You'll receive full details.

STALIN
AS REVOLUTIONARY, 1879-1929
A Study in History and Personality
By ROBERT C. TUCKER. "Amply documented
with full indication of sources, judicious and
careful where there is temptation to sensation-
alize, it is the most detailed biography yet to
appear. . . . Over such outstanding predecessors
as Boris Souvarine, Louis Fischer, and Isaac
Deutscher, Tucker has the advantage of a mass
of new information released by de-Stalinization
and the growth of Samizdat. . . . More important
is Tucker's effort to analyze and make under-
standable Stalin's enigmatic character. . . . Tucker
offers many interesting facts and suggestive
theories; his effort to elucidate the murky figure
of Stalin may well remain the best until some
researcher is able to pore through the Kremlin

THE ANGUISH OF CHANGE
By LOUIS HARRIS. "A first-rate study on

order. . . . A well-written and authoritative study."

THE FUTURE WHILE IT HAPPENED
By SAMUEL LUBELL. "A useful synthesis of
1972 voter attitudes in the context of the politically
ruthless force that helped shape them. For those
who may think all the heavy-handedness of 1972
occurred in the burglary and dirty tricks depart-
ments, this analysis of the Nixon mobilization of
issues and the incumbent's power to shape them,
for now and the future, is instructive."

THE PRESIDENCY REAPPRAISED
Edited by Rexford G. Tugwell and Thomas E. Cronin, Center for the Study of Democratic Institutions
Today no course in American Government can avoid paying close and serious attention to the Presidency. The many questions now being raised about the office and the men who occupy it are important not only to students of politics, but to all citizens interested in the current and future state of our system of government. In this timely new collection, several leading presidential scholars address themselves to the central issues now surrounding the Presidency and set forth proposals for reforming and revitalizing the office.

HOW AMERICAN FOREIGN POLICY IS MADE
John Spanier and Eric Uslaner, University of Florida
This concise book, which is intended primarily for students taking a first course in American Government, is a primer on the formulation of American foreign policy. The authors focus on such important topics as the differences between foreign policy decision-making and domestic policy formation, the roles played by the President and Congress, and the general performance of the United States in foreign policy. Special attention is given to proposed reforms that would give Congress responsibilities in foreign policy-making equal to those of the President.

ONE LAST CHANCE
The Democratic Party, 1974-76
John G. Stewart
Can the Democrats win the Presidency in 1976? The author draws lessons from the Democratic Party's continuing victories in gubernatorial and state-legislative contests to outline an effective strategy for internal reform for the critical years 1974 and 1975. Basing his study on specially commissioned data from the Gallup Organization, he carefully analyzes the Presidential race of 1972 and shows that, to ensure a Democratic Presidential victory in 1976, the party must forge a new coalition with a new ideology—one based on making government work.

FULL AND FAST REFERENCE IN POLITICAL SCIENCE?

IPSA TRIES HARD!

Do you have easy access to the hundreds of journals which publish articles in political science, public administration and international relations all over the world? At a time when many libraries must take a close look at their budgets, can you and your students dispense with the ever fuller and faster services provided by INTERNATIONAL POLITICAL SCIENCE ABSTRACTS?

A non-commercial journal published by the International Political Science Association itself, the Abstracts provides summaries of articles in both specialized and non-specialized journals, including major yearbooks. Articles in English are abstracted in English; articles in other languages (approximately 30%) are abstracted in French. From four issues and 2998 abstracts in 1972 (twice more than in 1968) the progress has been to six issues and 4555 abstracts in 1973. Each issue carries a detailed subject index and a list of the periodicals examined; the final issue of each annual volume contains a cumulative subject index and an author index. Back volumes are available.

Your own Library should have a full set of the Abstracts. The institutional subscription for 1974 costs French Francs 225 (approximately $47, £ 20). Individuals may subscribe at a reduced rate of F.F. 100 (approximately $21, £ 9).

SCALING: A Sourcebook for Behavioral Scientists

edited by Gary M. Maranell

This sourcebook provides an introduction and overview of the measurement techniques appropriate throughout the social sciences. The articles include both classics in the field and the best of modern work. They require no great mathematical sophistication, and go well beyond the conventional study of attitudes to the more general uses of scaling. They enable the reader to examine the development of measures of scalability and the problems and weaknesses they present, to become familiar with the development of tests of significance for reproducibility and scalability and the need for them, to examine the lively history of the subject, and to experience the excitement that can be secured from sharing with a creative author the first report of his insight.

The Economic Theory of Representative Government
Albert Breton

This pathbreaking book presents a theory capable of "explaining" the patterns of public expenditure and taxation that occur under representative government. Dr. Breton suggests that government be understood as one of the major economic institutions of society, one that behaves like more familiar economic institutions—the household and the firm—though the market it confronts is a market for policies rather than goods and services. Thus the reader is better able to understand the observed behavior of our enormously important political institutions.

The second edition has been reorganized, greatly expanded and completely updated—providing a rich mine of vital insights into the evaluation of the great issues of international politics, and an irresistible stimulus to critical debate.

Measurement in the Social Sciences: Theories and Strategies
edited by H. M. Blalock, Jr.

This book deals with selected problems of measurement and is written for graduate students and professionals, particularly in the technically less developed areas of social science. It represents a series of studies of topics deemed to be crucial for the advancement of social science research, but which have not received sufficient attention. The basic purpose is to stimulate further methodological research and to study ways in which knowledge accumulated in some fields may be generalized so that it may be applied to others.

This IS NOT another textbook . . .

It IS a complete description of an alternative to high school government instruction.

A new approach to pre-collegiate political science education is detailed in this book. Rationale, development, and dissemination phases of the course are outlined, with special attention to instructional objectives and methodology.

Political systems are compared across school, local, national, and international levels. Inquiry and action are integrated by testing hypotheses about everyday political life, and practicing participation skills in the high school. The high school as a political laboratory is a unique focus of the course.

Prototype testing of the course is currently being conducted in high schools across the nation by the Social Studies Development Center at Indiana University, Bloomington, Indiana. The course is a project of the APSA Pre-Collegiate Education Committee.

The best deal on life insurance, by far, is **TIAA**

Studies reported recently in independent consumer publications confirm the cost of TIAA life insurance is substantially less than that for policies sold through life insurance companies that serve the general public. These reports are must reading for insurance shoppers; if you haven't seen them we'll be glad to direct you to them.

These days, when it's more important than ever to squeeze the most from every dollar, it makes more sense than ever for college employees and other eligible persons to look to TIAA for the new life insurance they need. By the way, TIAA policies include the unique "Cost of Living" provision to help prevent inflation from nibbling away the purchasing power of the death protection.

While TIAA offers plans to meet different situations, and a free advisory service to help select the right plan, most educators with TIAA policies prefer Term insurance because with Term they can easily afford to carry the high level of family protection they need. For example: **$100,000 of decreasing Term insurance costs only $185 at age 30.**

This Home Protection policy is level premium Term insurance that gives its highest amount of protection initially, reducing by schedule over a 20 year period to recognize decreasing insurance needs. Home Protection policies are available for several other insurance periods in amounts of $5,000 or more and are issued at ages under 56.

**ELIGIBILITY**
