The serotonin transporter gene is a substrate for age and stress dependent epigenetic regulation in rhesus macaque brain: Potential roles in genetic selection and Gene × Environment interactions—CORRIGENDUM

An important acknowledgment was not included in the original article. We gratefully acknowledge the support from a NARSAD Young Investigator Award (2004). We regret this oversight and any problems it may have caused. The first two affiliations in the original article were the same, so they are also corrected herein. We regret this repetition and any problems it may have caused.
