CAB Identification Services

In any serious attempt to control the diseases and pests that menace the crops and livestock of world agriculture, the first step must be the accurate identification of the organism concerned.

CABI through its Institutes of Entomology, Mycology and Parasitology, offers efficient and reliable identification services to agricultural and biological scientists throughout the world.

The service covers the identification of:

- insects and mites
- microfungi and bacteria
- helminths of animals and man
- entomophilic and plant parasitic nematodes

The service is offered free to countries that are members of CABI. Other countries and commercial organisations are normally asked to pay a charge. Developing countries where there is an FAO Country Representative, can apply for financial assistance from FAO.

Further details can be obtained from:

C·A·B International Institute of Entomology, 56 Queens Gate, London SW7 5JR, UK.	C·A·B International Mycological Institute, Ferry Lane, Kew, Richmond, Surrey TW9 3AF, UK.	C·A·B International Institute of Parasitology, 395A Hatfield Road, St. Albans, AL4 0XU, UK.
