DR. J. A. ANDERSON (*Canada*)

DR. M. A. A. ANSARI (*Pakistan*)

DR. M. F. CHANDRARATNE (*Ceylon*)

DR. K. B. LAL (*F.A.O.*)

DR. J. MELVILLE (*Australia*)

DR. A. H. MOSEMAN (*United States*)

PROFESSOR M. A. NOUR (*Sudan*)

DR. B. P. PAL (*India*)

DR. S. J. DU PLESSIS (*South Africa*)

**Experimental Agriculture** publishes the results of research on animal husbandry and crop production, with the main emphasis on field experiments carried out in the warmer climates of the world. It also includes accounts of new experimental techniques, discussions of specific problems met in countries where agricultural production is developing rapidly, review articles on new developments in scientific agriculture, and occasional papers on technical, economic and sociological aspects of farming systems. The journal is the successor to *The Empire Journal of Experimental Agriculture*.

**Experimental Agriculture** is published quarterly. Four parts form a volume.

**Subscriptions** may be sent to any bookseller or subscription agent or direct to the Cambridge University Press, Bentley House, 200 Euston Road, London, N.W. 1. Subscriptions in the U.S.A. and Canada should be sent to the American branch of the Press, 32 East 57th Street, New York, N.Y. 10022. The subscription price is £5 net (including postage) for an annual volume (\$18.00 in the U.S.A.), payable in advance; separate parts cost 35s. net or \$5.00 each (plus postage).

Second class postage paid at New York, N.Y.

**Back Volumes.** Inquiries for Vols. 1–32 of *The Empire Journal of Experimental Agriculture* should be addressed to Wm Dawson & Sons Ltd, Cannon House, Folkestone, Kent. Previously published parts of *Experimental Agriculture* are available from the London or New York offices of the Cambridge University Press.

## NOTES FOR CONTRIBUTORS

**Contributions** will be welcomed from scientists of all nationalities, particularly those working in tropical and sub-tropical countries where up-to-date techniques of agricultural experimentation are helping in the rapid development of more modern methods of farm production. Contributions, which must be written in English, should be sent to the Editor, Professor J. P. Hudson, Orchard House, Long Ashton, Bristol.

**Conditions of acceptance.** Submission of a paper will be taken to imply that the material has not previously been published, and is not being considered for publication elsewhere. Papers published in *Experimental Agriculture* may not be reprinted or published in translation without permission from the Editor, given on behalf of the Editorial Board.

**General lay-out.** Before having their manuscripts typed contributors are asked to look carefully at the lay-out of other papers published in this journal, to ensure that their own papers, as submitted, conform as closely as possible to

the accepted pattern. This very much facilitates the work of the Editor and may often result in a paper being published earlier than if it requires a great deal of detailed editorial attention. Numerical data, which should only be included if they are essential to the argument, can be presented either in the form of tables or diagrams, but should never be shown in both ways. It is not the normal custom of the Journal to publish notes shorter than about 2000 words (4 pages) or longer than about 6000 words (12 pages including illustrations).

**Typescripts.** A top copy and one carbon copy of the script should be submitted, typed with double spacing, on one side of the paper only and with margins of about 1½ inches at the left-hand side and head of each sheet. Quarto size is preferred to foolscap.

**Title.** The development of automatic bibliographic methods, based on single-word indexing of the significant words in the title, makes it essential that the title of each paper should contain the maximum of relevant informa-

## **Mechanisation and the World's Rice**

This important volume contains the proceedings of a conference organized by Massey-Ferguson in collaboration with F.A.O. to support International Rice Year 1966. The 25 papers by experts from all over the world are a permanent and valuable contribution to the literature of the subject.

## **Agricultural Producers and their Markets**

*Edited by* T. K. WARLEY

This is a collection of papers given at an international seminar dealing with marketing topics primarily from the point of view of producers. The authors are marketing specialists, university research workers and senior executives from food trading industries.

*New edition*

## **Choice of Techniques**

A. K. SEN

One of the most difficult problems facing an underdeveloped economy attempting planned economic growth is the choice between alternative techniques of production. The author critically examines the factors so far discussed, and shows the need for considering a number of other aspects of the problem.

25s. net

## **The Economics of Agricultural Policy**

GRAHAM HALLETT

Although agriculture makes heavy demands on the public purse in nearly all countries, few comprehensive academic studies of its economics have been published in recent years. The author provides a systematic analysis of the industry which for the most part is of international applicability.

## **Year Book of Agricultural Co-operation 1968**

*Edited by the Plunkett Foundation for Co-operative Studies*

The *Year Book*, which has appeared regularly since 1927, aims at presenting an annual picture of the development of agricultural co-operation throughout the world, including the long-established organizations of Europe and North America, the expanding movements of the developing countries, and the very different forms of organization in Communist countries.

## ANIMAL PRODUCTION

Journal of the British Society of Animal Production

**Contents of Volume 10, Part 3, August 1968 include the following :**

- MARSHALL, WATSON and SLATTERY. Prediction of eye-muscle area from introscope measurements on carcasses of pigs of bacon weight.
- HINKS and ANDERSON. Phenotypic aspects of growth and carcass quality in veal calves.
- TROELSEN and CAMPBELL. Voluntary consumption of forage by sheep and its relation to the size and shape of particles in the digestive tract.
- ROBINSON and FORBES. The effect of protein intake during gestation on ewe and lamb performance.
- DAVIES. The effect of cereal and protein source on the energy intake and nitrogen balance of fattening lambs given all-concentrate diets.
- LEVY, HOLZER and VOLCANI. The effect of age and live weight on feed conversion and yield of saleable meat of intact Israeli Freesian male calves.
- GRIFFITHS. Observations on noonatal changes of body temperature in Blackface lambs.
- SLEE. Body temperature and vasomotor responses in Scottish Blackface and Tasmanian Merino sheep subjected to slow cooling.
- CUTHBERTSON and PEASE. The inter-relationships of various measurements, visual assessments and dissection results of pigs of 200 lb. live weight.
- WATSON and BROADBENT. Inherited variation in carcass composition of Suffolk and Welsh lambs.
- MORRISON HINTZ and CIVENS. A note on effect of exercise on behaviour and performance of confined swine.

# The Annals of Applied Biology

Volume 62, Number 1. August 1968

- D. J. WATSON A prospect of crop physiology (Presidential Address)
- MYRA CHU CHOU and T. F. PREECE The effect of pollen grains on infections caused by *Botrytis cinerea* Fr.
- A. G. CHANNON and RUTH J. HAMPSON (*nee* FAULKNER) Laboratory tests of fungicides against *Peronospora parasitica* (Pers. ex. Fr.) Fr.
- D. V. RICHMOND and E. SOMERS Studies on the fungitoxicity of captan. VI. Decomposition of <sup>35</sup>S-labelled captan by *Neurospora crassa* conidia
- L. A. SUMMERS, R. J. W. BYRDE and E. C. HISLOP The relationship between chemical constitution and antifungal activity in arylhydrazonoisoxazolone compounds
- F. T. LAST, MARION H. EBBEN, J. B. ROTHWELL and D. A. G. JONES Effects of cultural treatments on the incidence of, and damage done by, tomato brown root rot
- JEAN F. MALCOLMSON and ELIZABETH G. GRAY Factors affecting the occurrence of gangrene (*Phoma exigua*) in potatoes
- JEAN F. MALCOLMSON and ELIZABETH G. GRAY The incidence of gangrene of potatoes caused by *Phoma exigua* in relation to handling and storage
- J. R. COLEY-SMITH, D. J. DICKINSON, J. E. KING and R. W. HOLT The effect of species of *Allium* on soil bacteria in relation to germination of sclerotia of *Sclerotium cepivorum* Berk.
- G. C. HEATHCOTE The use of menazon seed dressing to decrease spread of virus yellows in sugar-beet root crops
- OLWEN M. STONE The elimination of four viruses from carnation and sweet william by meristem-tip culture
- A. F. MURANT and R. A. GOOLD Purification, properties and transmission of parsnip yellow fleck, a semi-persistent, aphid-borne virus
- R. HULL and A. N. ADAMS Groundnut rosette and its assistor virus
- C. E. TAYLOR and P. R. THOMAS The association of *Xiphinema diversicaudatum* (Micoletsky) with strawberry latent ringspot and arabis mosaic viruses in a raspberry plantation
- P. D. ABRAHAM, S. G. BOATMEN, G. E. BLACKMAN and R. G. POWELL Effects of plant growth regulators and other compounds on flow of latex in *Hevea brasiliensis*

# The Journal of Agricultural Science

Volume 71, Part 1. July 1968

- B. A. C. ENYI Comparative studies of upland and swamp rice varieties (*Oryza sativa* L.)  
I. Effect of soil moisture on growth and nutrient uptake.
- B. A. C. ENYI Comparative studies of upland and swamp rice varieties (*Oryza sativa* L.).  
II. Effect of varying supply of manganese on growth and yield.
- M. H. ARNOLD and S. J. BROWN Variation in the host-parasite relationship of a crop disease.
- F. DESSOUKY and K. H. JUMA Seasonal variation in semen characteristics of Friesian bulls in Iraq.
- R. HALLIDAY Serum protein concentrations in 2-day-old Finnish Landrace, Scottish Blackface, Merino and Merino × Cheviot lambs.
- E. J. M. KIRBY The response of some barley varieties to irrigation and nitrogen fertilizer.
- R. G. HEMINGWAY, A. MACPHERSON, ALISON K. DUTHIE and NORA A. BROWN The mineral composition of hay and silage grown in Scotland in relation to the A.R.C. standards for the mineral requirements of dairy cattle.
- M. E. D. WEBSTER and K. G. JOHNSON Some aspects of body temperature regulation in sheep.
- W. L. JOHNSON, W. A. HARDISON, A. L. ORDOVEZA and L. S. CASTILLO The nutritive value of *Panicum maximum* (guinea grass). III. Factors affecting voluntary intake by cattle and water buffaloes.
- D. GARETH JONES and A. C. BURROWS Breeding for increased nodule tissue in white clover (*Trifolium repens* L.).
- B. RIDLER and W. H. BROSTER Environmental and managerial factors affecting the growth of Friesian heifers from six months of age to calving.
- J. B. FREE and P. M. NUTTALL The pollination of oilseed rape (*Brassica napus*) and the behaviour of bees on the crop.
- O. TALIBUDEEN and S. K. DEY Potassium reserves in British soils. I. The Rothamsted Classical Experiments.
- T. W. GRIFFITHS The application of an improved artificial rumen technique to the study of the effects of non-protein nitrogen on fermentation and nitrogen distribution in the rumen.
- D. A. BOND Variation between tetraploid red clover plants in corolla tube length and height of nectar.
- E. S. BUNTING The influence of date of sowing on development and yield of maize in England.
- D. W. COWLING and D. R. LOCKYER A comparison of the yield of three grass species at various levels of nitrogenous fertilizer sown alone or in a mixture.
