

Call for Papers

SPECIAL ISSUE ON ML

Andrew W. Appel and Robert Harper, editors

The *Journal of Functional Programming* will have a special issue devoted to ML, edited by Andrew W. Appel and Robert Harper. Papers on all aspects of ML are solicited:

Compilation and optimization, type checking and elaboration, programming environments and debugging, extensions and variants of ML, module systems and separate compilation, parallelism and concurrency, performance analysis and benchmarks, formal program development, case studies.

Both theoretical and practical studies are appropriate.

Papers should be submitted by 1 June 1992. Earlier submission will lead to earlier refereeing. The special issue will appear in the first half of 1993. Papers submitted later will be considered for a subsequent regular issue of the journal.

Papers in Postscript format should be submitted electronically (with a plaintext cover letter including authors' physical and e-mail addresses, telephone and fax numbers, etc.) to appel@princeton.edu.

Authors who are not able to submit papers in this way may send four copies to:
