# ‘We are our land’—Ogiek of Mount Elgon, Kenya: securing community tenure as the key enabling condition for sustaining community lands — CORRIGENDUM

JUSTIN KENRICK, TOM ROWLEY and PETER KITELO

DOI: [doi.org/10.1017/S003060532300008X](https://doi.org/10.1017/S003060532300008X). Published online by Cambridge University Press, 22 May 2023.

The authors apologize that within the last sentence of the abstract the words ‘de facto’ were incorrectly included as ‘We examine how de facto collective community control. . .’.

The correct sentence should read: We examine how collective community control can enable decisions to be made in line with taking care of community lands over the long term, but also highlight how this ability is under constant threat until and unless national law and practice recognizes the collective tenure rights of such communities.

The online version of this article has been updated.
