Aims and Scope

- Describe the development and evaluation of methodology for assessment, monitoring, and surveillance in population-based samples
- Identify and analyse behavioural, social, cultural, environmental, economic, and political determinants of nutrition-related public health, and dietary and nutritional factors as determinants of health outcomes

International Editorial Board

- Dr Marion Bodwell, Middlesex University, UK
- Dr Moritz Brinkmann, Katholieke Universiteit Leuven, Belgium
- Dr Munw Calhoun, FD, css, and Dong, China
- Dr Rocio Cano, Universidad de Salamanca, Spain
- Dr Colm Devane, Magee Hospital, The Netherlands
- Prof. Mike Edlin, Medical Research Council, South Africa
- Prof. Tim Gessner, University, South Korea
- Prof. Sophie Heible, Epson Food Information Centre, Belgium
- Prof. Michelle Heideman, University of Sheffield, UK
- Dr Ahin Hars, University of Ontario, Canada
- Dr Leon Jammari, Washington University, USA
- Dr Sengal Jordan, University of Germany, Germany
- Dr Bridget Kelly, University of Wellington, Australia
- Dr Jamaica Rojas de Jorge, University of California, USA
- Dr Axel Gomes, National Cancer Research Brazil, Brazil
- Dr Thomas Heslop, Boston University, USA
- Dr Iva Maria Nowotny Manch, IFCN/WHO, Switzerland
- Dr Olof Jannsma, Universiteit Twente, Netherlands
- Dr Cira Appanda, Universiti Pena Malaysia, Malaysia
- Dr Kathryn Buchholz, Asia Pacific Institute, Australia

Public Health Nutrition

Notes for Authors

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Public Health Nutrition is a journal that is directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Contents

- Original research findings and scientific reviews are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- Editorials express the opinion of the journal, as represented by its editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- Position papers, including declarations and other statements of policy, may be invited or unsolicited.
- Invited commentaries and book reviews are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.

Editorials are usually in response to material published in PHN. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts must be submitted to http://mc.manuscriptcentral.com/phnutr. Please contact the Editorial Office on pbn.edoffice@cambridge.org regarding any other aspects of submission and preparation.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorial papers, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: The time at which acceptance, authors will be asked to provide a complete copy of the ‘Licence to Publish’ (in lieu of copyright transfer), available at http://mc.manuscriptcentral.com/phnutr. It is the author’s responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Correspondents on our website (http://www.publichealthnutrition.org). Manuscripts should be clear and concise, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with all relevant ethical guidelines.

Disclosure of financial support and any competing interests. The submission must include a statement within an Acknowledgements section reporting any competing interests (financial and non-financial) and all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:
1. Title page should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title up to of 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. Abstract should be structured, usually following the following structure: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. Text should be divided under headings (typically to include Introduction, Methods, Results, Discussion, Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are feasible, feasible, and potentially effective. Emphasising that some research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with all relevant ethical guidelines.
4. Acknowledgements (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. References should be in Vancouver style. Please refer to the Vancouver style reference style.
6. Tables should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. Figures should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise agreed. The corresponding author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of the page limit.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.
