Research Papers

E. Kleynhans, M.G. Barton, D.E. Conlong and J.S. Terblanche
Population dynamics of *Eldana saccharina* Walker (Lepidoptera: Pyralidae): application of a biophysical model to understand physiological variation in an agricultural pest

M. Noor-ul-Ane, M. Ali Mirhosseini, N. Crickmore, S. Saeed, I. Noor and M.P. Zalucki
Temperature-dependent development of *Helicoverpa armigera* (Hübner) (Lepidoptera: Noctuidae) and its larval parasitoid, *Habrobracon hebetor* (Say) (Hymenoptera: Braconidae): implications for species interactions

R.E. Case, S. Hartley, R. Goodwell and M. Stige
Spatial and temporal distribution, environmental drivers and community structure of mosquitoes in the Kaipara Harbour, New Zealand

M. Li, Y. Zhang, W. Ding, J. Luo, S. Li and Q. Zhang
Effect of acaricidal components isolated from lettuce (*Lactuca sativa*) on carmine spider mite (*Tetranychus cinnabarinus* Boisd.)

S. Gao, J.J. Chen and G.F. Jiang
Complete mitochondrial genome of bamboo grasshopper, *Gnecrux fasciata*, and the phylogenetic analyses and divergence time estimation of Caelifera (Orthoptera)

Y. Cheng, J.R. Zhi, F.L. Li, W.H. Li and Y.H. Zhao
Improving the artificial diet for adult of seven spotted ladybird beetle (*Coccinella septempunctata* L.) (Coleoptera: Coccinellidae) with orthogonal design

No nutritional benefits of egg cannibalism for *Coleomegilla maculata* (Coleoptera: Coccinellidae) on a high-quality diet

A.K. Barman, K.R. Gadhave, B. Dutta and R. Srinivasan
Plasticity in host utilization by two host-associated populations of *Aphis gossypii* Glover

M. Su, X. Tan, Q. Yang, C. Zhao, F. Wan and H. Zhou
Laboratory comparison of two *Aphelinus mali* clades for control of woolly apple aphid from Hebei Province, China

A.L. Pietrantuono, S. Moreyra and M. Lozada
Foraging behaviour of the exotic wasp *Vespula germanica* (Hymenoptera: Vespidae) on a native caterpillar defoliator

Arnika Przybylska, Zaneta Fiedler, Patryk Frąckowiak and Aleksandra Obreślowska-Steplowska
Real-time PCR assay for distinguishing *Frankliniella occidentalis* and *Thrips palmi* – ERRATUM

Erratum

Arnika Przybylska, Zaneta Fiedler, Patryk Frąckowiak and Aleksandra Obreślowska-Steplowska
Real-time PCR assay for distinguishing *Frankliniella occidentalis* and *Thrips palmi* – ERRATUM

Aims and Scope
Established in 1930, the internationally recognised Bulletin of Entomological Research aims to further global knowledge of entomology through the generalisation of research findings rather than providing more entomological exceptions. The Bulletin publishes high quality and original research papers, critiques and reviews covering articles concerning insects or other arthropods of economic importance in agriculture, forestry, stored products, biological control, medicine, animal health and natural resource management. The scope of papers addresses both the ecology, behaviour, physiology and systematics of individuals and populations, with a particular emphasis upon the major current and emerging pests of agriculture, horticulture and forestry, and vectors of human and animal diseases. This includes the interactions between species (plants, hosts for parasites, natural enemies and whole communities), novel methodological developments, including molecular biology, in an applied context. The Bulletin does not publish the results of pesticide testing or traditional taxonomic revisions.

Bibliographic Information
Title: Bulletin of Entomological Research
ISSN: 0007-4853
Volume: 108
Issue: 3
Year: 2018
Pages: 241-249

Stylistic Notes
Bulletin of Entomological Research publishes two types of paper:

- Full research papers
- Reviews

If the referees and editors judge a paper to be particularly significant then it will be fast-tracked for publication. We also welcome 'Letters to the Editor' with comments on recently published papers.

Manuscript Preparation
Language
Manuscripts should be in English.

Manuscript Text
Manuscripts should be prepared in Microsoft Word or similar according to the following structure:

- Abstract: Each paper must commence with an accurate, informative abstract. It should not exceed 250 words. A short title should also be provided for use as a running header.
- References: References must be based on the name and year system, give full journal titles and conform to the following styles:
- Tables: Tables should be numbered consecutively with Arabic numerals and every table should be mentioned at least once in the text. Illustrations should be submitted as separate files if TIF or EPS format but captions should be listed at the end of the manuscript text.

- Manuscript Preparation
- Tables: Tables should be submitted as separate files if TIF or EPS format but captions should be listed at the end of the manuscript text.

- Manuscript Submission
- Offprints: Authors will be asked to return corrected proofs within 72 hours. Authors will receive a PDF file of page proofs by email, and will be asked to return corrected proofs within 72 hours. Authors will receive a PDF file of page proofs by email, and will be asked to return corrected proofs within 72 hours. Authors will receive a PDF file of page proofs by email, and will be asked to return corrected proofs within 72 hours.
- Copyright: Authors should be supplied with an agreement to publish form, which must be completed and returned to the Publisher. Papers are accepted on the understanding that the work has been submitted exclusively to the Bulletin and has not been previously published elsewhere.
- Peer review: Communications for peer review will be by email as far as possible. Authors are invited to suggest the names and contact details of at least two potential referees and are asked to provide keywords indicating the content of the paper. Each paper will also give a brief description (no more than 50 words) of why the manuscript is an important contribution to entomology research.

- Publication: Authors will be supplied with a PDF file of page proofs by email, and will be asked to return corrected proofs within 72 hours. Authors will be supplied with a PDF file of page proofs by email, and will be asked to return corrected proofs within 72 hours. Authors will be supplied with a PDF file of page proofs by email, and will be asked to return corrected proofs within 72 hours. Authors will be supplied with a PDF file of page proofs by email, and will be asked to return corrected proofs within 72 hours. Authors will be supplied with a PDF file of page proofs by email, and will be asked to return corrected proofs within 72 hours.

- Objectives: The author (or main author) of an accepted paper will receive a free PDF of their paper. Paper slips are available for a fee and should be ordered at proof stage.

- Offprints: Additional information which due to its nature does not lend itself to print media (example: full data sets, movie or sounds files etc.) may be submitted for online-only publication. Please see full details (“Instructions for Contributors”) at journals.cambridge.org/ber.
Research Papers

E. Kleynhans, M.G. Barton, D.E. Conlong and J.S. Terblanche
Population dynamics of Eldana saccharina Walker (Lepidoptera: Pyralidae): application of a biophysical model to understand phenological variation in an agricultural pest 283

M. Noor-ul-Ane, M. Ali Mirhosseini, N. Crickmore, S. Saeed, I. Noor and M.P. Zalucki
Temperature-dependent development of Helicoverpa armigera (Hübner) (Lepidoptera: Noctuidae) and its larval parasitoid, Habrobracon hebetor (Say) (Hymenoptera: Braconidae): implications for species interactions 295

R.P. Cane, S. Hartley, B. Gradwell and M. Singe
Spatial and temporal distribution, environmental drivers and community structure of mosquitoes in the Kaipara Harbour, New Zealand 305

M. Li, Y. Zhang, W. Ding, J. Luo, S. Li and Q. Zhang
Effect of acaricidal components isolated from lettuce (Lactuca sativa) on carmine spider mite (Tetranychus cinnabarinus Boisid.) 314

S. Gao, J.J. Chen and G.F. Jiang
Complete mitochondrial genome of bamboo grasshopper, Ceracris fasciata, and the phylogenetic analyses and divergence time estimation of Caelifera (Orthoptera) 321

Improving the artificial diet for adult of seven spotted ladybird beetle Coccinella septempunctata L. (Coleoptera: Coccinellidae) with orthogonal design 337

No nutritional benefits of egg cannibalism for Coleomegilla maculata (Coleoptera: Coccinellidae) on a high-quality diet 344

K. Walkowiak-Nowicka, G. Nowicki, M. Kuczer and G. Rosiński
New activity of yamamarin, an insect pentapeptide, on immune system of mealworm, Tenebrio molitor 351

A.K. Barman, K.R. Gadhave, B. Dutta and R. Srinivasan
Plasticity in host utilization by two host-associated populations of Aphis gossypii Glover 360

M. Dastranj, E. Borzoui, A. R. Bandani and O. L. Franco
Inhibitory effects of an extract from non-host plants on physiological characteristics of two major cabbage pests 370

P.M.G. Costa, J.B. Torres, V.M. Rondelli and R. Lira
Field-evolved resistance to λ-cyhalothrin in the lady beetle Eriopis connexa 380

Regulatory functions of trehalose-6-phosphate synthase in the chitin biosynthesis pathway in Tribolium castaneum (Coleoptera: Tenebrionidae) revealed by RNA interference 388

M. Su, X. Tan, Q. Yang, C. Zhao, F. Wan and H. Zhou
Laboratory comparison of two Aphelelus mali clades for control of woolly apple aphid from Hebei Province, China 400

A.L. Pietrantuono, S. Moreyra and M. Lozada
Foraging behaviour of the exotic wasp Vespula germanica (Hymenoptera: Vespidae) on a native caterpillar defoliator 406
Real-time PCR assay for distinguishing Frankliniella occidentalis and Thrips palmi Arnika Przybylska, Zaneta Fiedler, Aleksandra Obrepalska-Steplowska

Erratum

Arnika Przybylska, Zaneta Fiedler, Patryk Frackowiak and Aleksandra Obrepalska-Steplowska
Real-time PCR assay for distinguishing Frankliniella occidentalis and Thrips palmi Arnika Przybylska, Zaneta Fiedler, Aleksandra Obrepalska-Steplowska – ERRATUM
