Aims and Scope: The International Journal of Technology Assessment in Health Care has as its specific scope of interest the generation, evaluation, diffusion, and use of health care technology. It addresses the diverse audience of health care providers within medicine, public health, nursing, and the allied health professions; decision makers in government, industry, and health care organizations; and the scholarly disciplines such as ethics, economics, law, history, sociology, psychology, and engineering. The journal aims to fill the needs of those interested in the complexities of interaction between people and technology, technology as a force in social and organizational change; and technology as it is created, with health care technology so that the experiences and learning of the international community in its parts can benefit the whole. The use of technology in health care has created some of the major challenges for governments, the health care industries, and patients. The health care sector, which includes all health care organizations, is a major consumer of technology. The rapid pace of innovation has created a need for careful evaluation of the technology and its medical consequences. All authors must disclose any financial arrangements with companies whose products are discussed in the paper or their competitors; such information will not be revealed to reviewers but may be included in a suitable format in the final publication if the manuscript is accepted.

Cover Sheet and Cover Letter. A cover letter, signed by all authors, must attest that (1) each author contributed to the conception and design of the study and interpretation of data and the writing of the paper; (2) each has approved the version being submitted; and (3) the content has not been published nor is being considered for publication elsewhere.

As relevant to the content of the paper, the letter should also attest to the fact that any research with human or animal subjects conforms to the legal and ethical standards of the country in which it was performed.

The cover sheet should list
1. the authors’ full title
2. a short title (50 characters or less) for the running head
3. the name of the corresponding author and her/his email address
4. complete mailing address
5. telephone number
6. email address.

International Journal of Technology Assessment in Health Care

The Journal welcomes submissions of articles that evaluate health technologies to support health policy or practice decisions, or discuss methods of assessing such technologies; please see Journal Aims and Scope for further details. Manuscripts must be submitted by the Editors and members of the Editorial Board. Those that pass proceed to an international review process, which usually is completed within 4 to 6 weeks. Accepted manuscripts will be published within 4 to 6 months. Articles must be in English. Spelling, punctuation, and grammar should conform to the Aims of The Chicago Manual of Style (University of Chicago Press).

MANUSCRIPT SUBMISSION AND REVIEW. All manuscript submissions to the International Journal of Technology Assessment in Health Care must be made electronically via ScholarOne Manuscripts, at the website: http://mc.manuscriptcentral.com/ijtha

Please follow the detailed instructions on the website to avoid delays. The authors are asked to provide contact information and they may suppress reviewer identity. The website automatically acknowledges receipt of the manuscript and provides a manuscript reference number. Every effort will be made to provide the author with a rapid review. Correspondence must cite manuscript reference number and should be sent by email to the Editorial Office at IJTHA@wiley.com.

PREPARATION OF MANUSCRIPTS. The manuscript, including all references, must be provided in Word or RTF format, double spaced on 8 1/2 x 11 inch or A4 page sizes, with at least 1-inch (2.54 cm) margins. Manuscripts should typically have less than 4,000 words, including the abstract of 250 words maximum, and usually no more than 25 references. Manuscripts should be adhered to as follows: 1) cover page, 2) abstract and keywords, 3) acknowledgments, including source of funding, 4) text, 5) references, 6) tables and figures, and 7) figures, with captions on a separate page.

The Journal accepts no more than four tables or figures altogether for the published version. Tables and figures exceeding these limits may be posted on the Journal’s web site (www.journals.cambridge.org) as supplementary materials. Supplementary tables and figures should be numbered sequentially with the figure and table numbers in the published issue beginning with Supplementary Table 1 and Supplementary Figure 1. The Journal does not accept abstracts or appendices. Where relevant, manuscripts should include a paragraph on the policy implications of the findings of the study. Acronyms should be clearly spelled out on first use. The use of product trade names should be avoided; generic names should be used except where discussion of proprietary brands is essential to the manuscript.

COPYRIGHT AND PERMISSIONS. Authors are responsible for obtaining written permission to publish material for which they do not own the copyright. Contributors will be asked to assign their copyrights to Cambridge University Press.

COPYRIGHTING AND PROOFREADING. The publishers reserve the right to copyedit and proofread all accepted articles. Page proofs will be sent to the local author for final review.

OPEN ACCESS. Our standard copyright forms allow Open Access Archiving (for instance, posting the Accepted Manuscript in an Institutional Repository or on a personal webpage). Authors can also publish their manuscripts in Open Access (making articles freely available for non-commercial use) in a large number of our Journals by using Cambridge Open Option. For complete information on all the options available please visit http://journals.cambridge.org/OpenAccess

Permissions. Reprints may be purchased if ordered at proof stage.

International Journal of Technology Assessment in Health Care

Instructions for Contributors
CONTENTS

Perspective
131 Perspective: Some conclusions from my life in health technology assessment
H. David Banta

Method
134 Successful implementation of Lean as a managerial principle in health care: A conceptual analysis from systematic literature review
Riikka Maijala, Sini Eloranta, Tero Reunanen and Tuija S. Ikonen

Assessments
147 Cost-utility analysis of private contracting to reduce public waiting times for joint replacement surgery
Jonathan Karnon, Bahareh Mesgarian Haghighi, Babu Sajjad, Sokunthea Yem, Anuji Gamage and Aaron Thorpe

163 Tele-expertise system based on the use of the electronic patient record to support real-time antimicrobial use
David Morquin, Roxana Ologeanu-Taddei, Yatrika Koumar and Jacques Reynes

172 Decision-components of NICE’s technology appraisals assessment framework
Joost de Folter, Mark Trusheim, Pall Jonsson and Sarah Garner

178 Preoperative magnetic resonance imaging diagnostic features of uterine leiomyosarcomas: A systematic review
Helen Kaganov, Alex Ades and David Stuart Fraser

189 Ethics evaluation revealing decision-maker motives: A case of neonatal screening
Véronique Raimond, Cléa Sambuc and Leslie Pibouleau

Policies
196 Industry’s experiences with the scientific advice offered by the Federal Joint Committee within the early benefit assessment of pharmaceuticals in Germany
Charalabos-Markos Dintsios and Sara Schlenkrich

205 Toward a contingency model for hospital-based health technology assessment: Evidence from AdHopHTA project
Americo Cicchetti, Valentina Iacopino, Silvia Coretti, Alessandra Fiore, Marco Marchetti, Laura Sampietro-Colom, Kristian Kidholm, Jean-Blaise Wasserfallen, Rabia Kahveci, Esa Halmesmäki, Magdalene Rosenmöller, Claudia Wild and Raul-Allan Kivet

212 Untangling, unbundling, and moving forward: Framing health technology reassessment in the changing conceptual landscape
Lesley J.J. Sorial, Daniel J. Niven, Rosmin Esmail, Tom W. Noseworthy and Fiona M. Clement

218 Exploring medical devices: The use of risk assessment tools and their link with training in hospitals
Petra J. Porte, Lisanne M. Verweij, Martine C. de Bruijne, Cees P.M. van der Vleuten and Cordula Wagner
