Aims and Scope: The International Journal of Technology Assessment in Health Care has as its specific scope of interest the generation, evaluation, diffusion, and use of health care technology. It addresses the diverse audience of health care providers within medicine, public health, nursing, and the allied health professions; decision makers in government, industry, and health care organizations; and the scholarly disciplines such as ethics, economics, law, history, sociology, psychology, and engineering. The journal aims to fill the needs of those interested in the complexities of health care technology so that the experiences and learning with health care technology can be brought together in one forum. The focus of the journal is the international health care community and recognizes the different countries in its encounter with health care technology. Viewed comparatively, it is available to understanding its effects. Further, it is important to test with the scholars, governments, and private institutions concerned with health care technology so that the experiences and learning of the international community in its parts can benefit the whole. The use of technology in health care has created some of the major dilemmas in society today. The journal serves as a forum for the exchange of professionals interested in the assessment of medical technology, its consequences for patients, and its impact on society.

2018 Subscription Information: The Journal is published bimonthly in February, April, June, August, October, and December by Cambridge University Press, One Liberty Plaza, Floor 20, New York, NY 10006; Cambridge University Press, Journals Fulfillment Department, UPH, Shaftesbury Road, Cambridge CB2 8BZ, U.K. An international subscription rate for Volume 34 (2018): Institutions only US$595.00, and online only UK and elsewhere £341.00. Individuals only online US$453.00, and online only UK and elsewhere £243.00. Single part: US $14.00 in the U.S.A., Canada, and Mexico; £8.65 and elsewhere. Online only for all institutions. Print editions ceased in 2014. Back volume prices are available upon request. International Journal of Technology Assessment in Health Care and other Cambridge journals can be found at http://journals.cambridge.org.

Manuscript Submission and Review.

All manuscript submissions to the International Journal of Technology Assessment in Health Care must be made electronically via ScholarOne Manuscripts, at the website: http://mc.manuscriptcentral.com/ijthc

Please follow the detailed instructions on the website to avoid delays. The authors are asked to provide contact information and they may suggest reviewers. The website automatically acknowledges receipt of the manuscript and provides a manuscript reference number. Every effort will be made to provide the author with a rapid review. Correspondence must state manuscript reference number and should be sent by email to the Editorial Office at IJTHC@CUP.

Preparation of Manuscripts.

The manuscript, including all references, must be provided in Word or RTF format, double spaced on 8½ × 11 inch or A4 page sizes, with at least 1-inch (2.54 cm) margins. Manuscripts should typically have less than 4,000 words, including the abstract of 250 words maximum, and usually no more than 25 references. Manuscripts should be as follows: (1) cover sheet; (2) abstract and keywords; (3) acknowledgments, including source of funding; (4) text; (5) references; (6) tables with titles; and (7) figures, with captions on a separate page.

The Journal accepts no more than four tables or figures altogether for the published version. Tables and figures exceeding these limits may be published online only on the Journal’s website (www.journals.cambridge.org) as supplementary materials. Supplementary tables and figures should be numbered separately from the tables and figures in the published issue, beginning with Supplementary Table 1 and Supplementary Figure 1. The Journal does not accept footnotes or appendices.

Where relevant, manuscripts should include a paragraph on the policy implications of the findings of the study. Acronyms should be clearly spelled out on first use. The use of product trade names should be provided, generic names should be used instead wherever possible. New technologies to support health policy or practice decisions, or discuss methodologies, should not be used. Generic names should be used except where the subject or format of the article does not permit. Three to five key words, using terms from the Medical Subject Headings from Index Medicus, should follow the abstract.

References and Notes.

In the reference list, do not include material that has been submitted for publication but has not yet been accepted. This material, with its date, should be noted as "unpublished data, 2014."” Similar findings have been noted by L. W. Smith (unpublished data, 2014).”

Access the declaration of possible conflicts of interest, if any, in the published version. This material, with its date, should be noted as "unpublished data, 2014." Similar findings have been noted by L. W. Smith (unpublished data, 2014).”

Open Access. Our standard copyright forms allow Open Access Archiving (for instance posting the Accepted Manuscript in an Institutional Repository or on a personal webpage). Authors can also publish Open Access (making articles freely available for non-commercial use in a larger number of our Journals by using Cambridge Open Access). Please follow the detailed instructions on the website to avoid delays. The authors are asked to provide contact information and they may suggest reviewers. The website automatically acknowledges receipt of the manuscript and provides a manuscript reference number. Every effort will be made to provide the author with a rapid review. Correspondence must state manuscript reference number and should be sent by email to the Editorial Office at IJTHC@CUP.

COPYRIGHTING AND PROOFREADING. The publishers reserve the right to copyedit and proofread all accepted articles. Page proofs will be sent to the lead author for final review.

Reprints. Reprints may be purchased if ordered at proof stage.
CONTENTS

Perspective

131 Perspective: Some conclusions from my life in health technology assessment
   H. David Banta

Method

134 Successful implementation of Lean as a managerial principle in health care: A conceptual analysis from systematic
   literature review
   Riikka Maijala, Sini Eloranta, Tero Reunanen and Tuija S. Ikonen

Assessments

147 Cost-utility analysis of private contracting to reduce public waiting times for joint replacement surgery
   Jonathan Karnon, Bahareh Mesgarian Haghighi, Babu Sajjad, Sokunthea Yem, Anuji Gamage and Aaron Thorpe

156 Tele-expertise system based on the use of the electronic patient record to support real-time antimicrobial use
   David Morquin, Roxana Ologeanu-Taddei, Yatrika Koumar and Jacques Reynes

163 Decision-components of NICE’s technology appraisals assessment framework
   Joost de Folter, Mark Trusheim, Pall Jonsson and Sarah Garner

172 Preoperative magnetic resonance imaging diagnostic features of uterine leiomyosarcomas: A systematic review
   Helen Kaganov, Alex Ades and David Stuart Fraser

180 Direct costs of type 2 diabetes: A brazilian cost-of-illness study
   Ricardo Saad Henriques, Laiza Maria Steimbach, Deise Regina Baptista, Luana Lenzi, Fernanda S. Tonin,
   Roberto Pontarolo and Astrid Wiens

189 Ethics evaluation revealing decision-maker motives: A case of neonatal screening
   Véronique Raimond, Cléa Sambuc and Leslie Pibouleau

Policies

196 Industry’s experiences with the scientific advice offered by the Federal Joint Committee within the early benefit
   assessment of pharmaceuticals in Germany
   Charalabos-Markos Dintsios and Sara Schlenkrich

205 Toward a contingency model for hospital-based health technology assessment: Evidence from AdHopHTA project
   Americo Cicchetti, Valentina Iacopino, Silvia Coretti, Alessandra Fiore, Marco Marchetti, Laura Sampietro-Colom,
   Kristian Kidholm, Jean-Blaise Wasserfallen, Rabia Kahveci, Esa Halmešmäki, Magdalene Rosenmöller, Claudia Wild and
   Raul-Allan Kivet

212 Untangling, unbundling, and moving forward: Framing health technology reassessment in the changing conceptual
   landscape
   Lesley J.J. Soril, Daniel J. Niven, Rosmin Esmail, Tom W. Noseworthy and Fiona M. Clement

218 Exploring medical devices: The use of risk assessment tools and their link with training in hospitals
   Petra J. Porte, Lisanne M. Verweij, Martine C. de Bruijne, Cees P.M. van der Vleuten and Cordula Wagner
