How did the Bank of England manage sterling crises? This book steps into the shoes of the Bank’s foreign exchange dealers to show how foreign exchange intervention worked in practice. The author reviews the history of sterling over half a century, using new archives, data and unseen photographs. This book traces the sterling crises from the end of the War to Black Wednesday in 1992. The resulting analysis shows that a secondary reserve currency such as sterling plays an important role in the stability of the international system. The author goes on to explore the lessons the Bretton Woods system on managed exchange rates has for contemporary policy makers in the context of Brexit. This is a crucial reference for scholars in economics and history examining past and current prospects for the international financial system. This title is also available as Open Access on Cambridge Core.

Alain Naef is a research economist at the Banque de France working on the international monetary system.
STUDIES IN MACROECONOMIC HISTORY

Series Editor: Michael D. Bordo, Rutgers University

EDITORS:

Owen F. Humpage, Federal Reserve Bank of Cleveland
Christopher M. Meissner, University of California, Davis
Kris James Mitchener, Santa Clara University
David C. Wheelock, Federal Reserve Bank of St. Louis

The titles in this series investigate themes of interest to economists and economic historians in the rapidly developing field of macroeconomic history. The four areas covered include the application of monetary and finance theory, international economics, and quantitative methods to historical problems; the historical application of growth and development theory and theories of business fluctuations; the history of domestic and international monetary, financial, and other macroeconomic institutions; and the history of international monetary and financial systems. The series amalgamates the former Cambridge University Press series Studies in Monetary and Financial History and Studies in Quantitative Economic History.
