Public Health Nutrition

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:
- Original research findings and scientific reviews are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- Editorials express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- Position papers, including declarations and other statements of policy, may be invited or unsolicited.
- Invited commentaries and book reviews are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- Letters to the Editors are usually in response to material published in PHN. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to http://mc.manuscriptcentral.com/phnutr. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the ‘Licence to Publish’ (in lieu of copyright transfer), available at https://www.nutritionsociety.org/. It is the author’s responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (http://www.nutritionsociety.org). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests. The submission must include a statement within an Acknowledgements section reporting any competing interests (financial and non-financial), all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:
1. Title page should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. Abstract should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. Text should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. Acknowledgements (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. References should be in Vancouver style. Please refer to the full Directions to Contributors.
6. Tables should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. Figures should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.
PUBLIC HEALTH NUTRITION, VOLUME 24 – NUMBER 13

Monitoring and surveillance

Food insecurity partially mediates the association between dietary patterns and cardiometabolic risk among men who have sex with men in Los Angeles, California
David A. Wish, Marjana Javadian-Mehdizadeh, Michael J. Lit, Michael Preby, Robert Blair, and Suzanne M. Gingrich
3877

Recall of government healthy eating campaigns by consumers in five countries
Samantha Gouzou, Gabriele G. Consentino, Malte Goltzen, Laura Gallea, Antonella Jannuzzi, Matthew Brook, Josephine Marshall, Gary Sacks, James F. Thrasher, Luna Vahideh, Christopher M. White and David Hadfield
3986

Assessment and methodology

A validated FFQ to determine dietary intake of vitamin D, fatty acids, fructose and sucrose among adults in the USA
Juliette Ritoré-Bou, Stephen W. Hagenau, Robert J. De Jager, Yuni Y. Lee, Jessica B. Fox, and Rodica V. Ciolac
3603

Validation of the European Prospective Investigation into Cancer (EPIC) FFQ for use among adults in Lebanon: a comparison with 24-hour recalls
Sandrine Al-Grois, Caroline Haddad, Maha Haddad, Sara Aroue, and Nabil Abou-Faraj
3699

European components of diet quality in children aged 2–4 years in the UK and France
Delphine R. Banyett, Rosanna H. Gaskin, Christopher E. Beilin, John F. Kwan, and Laura M. Roche
3707

Nutritional status and body composition

Prevalence of thinness, overweight and obesity among Tibetan adolescents aged 12–17 years
Neha Zhang, Aishik Guo, Min Zou, Cédric G. Magnussen, and Bo Xu
3417

Nutrition communication

Can point-of-sale nutrition information encourage healthier preferences for sugary drinks among adolescents?
Rachel M. Saxe, Abigail K. Meny, and Monica L. Makowski
4023

Behavioural nutrition

Quantification of body weight and its association with parental, teacher and peer support: evidence from the Israeli Health Behaviours in Schools (HBS) survey
Shira G. Rabinovitch, Yael Rachit, Yossi Notis, and Yuval Kazen-Shapiro
4035

Additional costs of fluoride-reduced diets: fluoride-free dairy product substitutes are a cost-effective alternative for people with low income
Manuela Frey and Silke Trieb
4043

Nutritional epidemiology

Specific fruit but not total fruit intake during early pregnancy is inversely associated with gestational diabetes mellitus risk: a prospective cohort study
Hong Sun, Haoqi Geng, Yao Zhang, Xia Lin, Xue Long, Peng Cong, Qiang Gu, Dan Bai, Ao Jiang, Fei Li, and Yuan Zeng
4054

Modified Mediterranean diet score adapted to a southern Mediterranean population and its relation to overweight and obesity risk
Katia S. E. Marques, Alessio Meroni Stef Sand, Joana Haite, Hanan Al-Arabi, Marouska Amrani, Alcino Al-K, Abdallah Benbendera, Chahid Negad, Sid Abdel-rahman, and Elma M. Touma
4064

Fixed food processing and risk of hypertension: Cohort of Universities of Minas Gerais, Brazil (USIM Project)
Khalid Al-Shraba, Abolhassan Mousavi, Mohammad Reza Rashed, Abolfazl Eshghi, Alireza Rezaie, and Mohammad Ali Mansournia
4071

Association between deficiency anemia and complementary feeding in children under 2 years old assisted by a Conditional Cash Transfer programme
Marilina Moure a Mendoza, Giovana de Mouton marryal, Massari ulia D. de Motta Fragoso, Sofia L. de Menezes, Iolanda Pancato, Nazirli Romero Bueno a Ana Paula G. Christen
4080

Diet quality, excess body weight and cardiometabolic risk in preterm born in São Paulo, Brazil, and in the USA: differences and similarities
Jaqueline A. Pereira, Alexandre Mota, Carmen R. Bosc, Linda Von Ahn, Heitor P. Pereira, Maria C. B. Machado, Maria I. I. F. D. Andrade, and Dalila Santos-Alves and Raquel M. Fachin
4091

Nutritional Inflammation and cardiometabolic risk factors: Health Survey of São Paulo, a population-based study
Pauha Victoria Felix, Jacqueline Lopes Pereira, Ana Carolina Leonel, Alessandra Esmeraldo da Costa, and Raquel Rosa Maria Fachin
4102

Predictors of patterns of weight change 1 year after delivery in a cohort of Mexican women
Diana cooker Casillas-Gonzalez, Marta Maria Coleloli-Rio, Alejandro Cantor, Maria Luisa Piatez-Zitrate, Emily Olsen, Andre P. Baccicarro, Alan L. Jost, Monica A. Drujan, Irene Simon, Robert D. Wright, Robert Todd Valdivieso and Ray López-Rodríguez
4113

BMI, high-sensitivity C-reactive protein and the conversion from metabolically healthy to unhealthy phenotype in Chinese adults: a cohort study
Renying Xu, Pinxian Shen, Chunhua Hu, Yingyan Wang, Zhong Yan and Yang Hui
4124

Validation of the fat version of the Eating Attitude Test in Lebanon: a population study
Chafia Hadida, Chloé Menyat, Pascale Salah, Halie Sone, Robin Halki, Mely Ahmed, Saber Hmidi and Stephane Veil
4132

The association between meal and snack frequency and irritability symptoms
Mohamed Alkabes, Paswan Suresh, Ahmed El-Nasrallah, Mohamed Ghyazuddin, Ammar Hassaanadel and Peyman Arefi
4144

No-fast dieters are less likely to be overweight or obese, but have lower dietary satisfaction: results from the Swiss Nutrition National survey mens
4157

What factors are associated with food security among recently arrived refugees resettling in high-income countries? A scoping review
J.MB. All, B. J. Booth, C. Margarita and A. Waring
4173

Interventions

A 6-week healthy eating intervention with family engagement improves food knowledge and preferences but not dietary diversity among urban preschool children in Sri Lanka
Fathima Srinivas, Lina, Mithali, Adil-Adil, Anshu Chandra Shankar and Nuri Hari

Public policies

Food insecurity and housing affordability among low-income families: does housing constraint reduce food insecurity?
St. Alving, San and Gary-Ward, John W.

A scoping review of research on policies to address child undernutrition in the Millennium Development Goals era
Vanessa P.K., Beverly Braithwa, Alvin Rappaport, Stanley J. Grunfeld, and Michael M. Tuma

Packaged food supply in Fiji: nutrient levels, compliance with sodium targets and adherence to labelling regulations
Marit Sikander, Sara Price, A. Priest, Marie Kaur, Joanne M. Sidanah, Rick J. McLean, Jacques Hechter and Claire Johnson

Expression of concerns

Calcium plus vitamin D supplementation affects pregnancy outcomes in gestational diabetes: randomized, double-blind, placebo-controlled trial
Mico Grazia, unheard of
