The *International Journal of Acarology*, new to Taylor & Francis in 2009, publishes original research work on a wide variety of acarological subjects including mite and tick behaviour, biochemistry, biology, control, ecology, evolution, morphology, physiology, systematics and taxonomy. To ensure continued quality of journal content, manuscripts submitted to IJA are critically reviewed by five to seven reviewers, including outside reviewers and Editorial Board members, who are specialists on the subject matter.
Journal of Helminthology publishes original papers and review articles on all aspects of pure and applied helminthology, particularly those helminth parasites of environmental health, medical or veterinary importance. Research papers on helminths in wildlife hosts, including plant and insect parasites, are also published along with taxonomic papers contributing to the systematics of a group. The journal will be of interest to academics and researchers involved in the fields of human and veterinary parasitology, public health, microbiology, ecology and biochemistry.

Epidemiology & Infection

Managing Editor
Norman Noah, London School of Hygiene and Tropical Medicine, UK

Epidemiology and Infection publishes original reports and reviews on all aspects of infection in humans and animals. Emphasis is given to the epidemiology, prevention and control of infectious diseases, but coverage includes microbiology, virology, immunology, tropical infections, food hygiene, statistics and the clinical, social and public-health aspects of disease.

Parasitology

EDITORS
R. S. PHILLIPS, R. B. GASSER and L. H. CHAPPELL.*

ASSISTANT EDITOR
M. ELISABETH PAINTER Ph.D.

EDITORIAL POLICY
Parasitology publishes definitive papers on all aspects of pure and applied parasitology including biochemistry, molecular biology, immunology, genetics, ecology and physiology and also the application of new techniques, long-term epidemiology studies, advances in the understanding of life-cycles, chemotherapy and major systematic revisions. Papers should normally be full length with an explanatory introduction and detailed discussion of the findings reported. Shorter reports of particularly important findings will also be considered.

To submit papers online, go to http://mc.manuscriptcentral.com/par/

Parasitology (ISSN 0031–1820) is published monthly and semi-monthly in April and September.

Subscriptions may be sent to any bookseller or subscription agent or direct to the publisher: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK. Subscriptions in the USA, Canada and Mexico should be sent to Cambridge University Press, Journals Fulfilment Department, 100 Brook Hill Drive, West Nyack, New York 10994–2113. All orders must be accompanied by payment. The subscription price (excluding VAT) of volume 136, 2009 which includes print and electronic access is £990 (US $1880 in the USA, Canada and Mexico), for fourteen parts; the electronic-only price for institutional subscribers is £865 (US $1685 in the USA, Canada and Mexico); separate parts cost £74 or US $141 each (plus postage). EU subscribers may also copy material subject to the usual conditions.

Online submission. Authors are encouraged to submit their manuscripts online. Go to http://mc.manuscriptcentral.com/par/ to open an author’s account for Parasitology. Manuscript Central is helping to improve the speed of the publication process for the journal.

In vivo response of Mesocestoides vogae to human insulin  
An anomaly against a current paradigm – extremely low rates of individual fecundity variability of the Gordian worm (Nematomorpha: Gordiida)  
Seasonal changes in host phenotype manipulation by an acanthocephalan: time to be transmitted?  
Heritability and short-term effects of inbreeding in the progenetic trematode Coitocaecum parvum: Is there a need for the definitive host?  
Cryptic species complexes in manipulative echinostomatid trematodes: when two become six  
Is there a cost of parasites to caribou?
