Public Health Nutrition
Volume 22, 2019 ISSN: 1368-9800
Eighteen issues per year

Aims and Scope

• holders of expertise about the development, implementation, and evaluation of interventions and community nutrition programs and services.
• Develop perspectives and models to study diet and nutrition as related to the environment and sustainability.
• We prefer papers that are innovative and contribute knowledge to the literature. Papers should be succinct (i.e., usually under 5000 words not including the abstract, references, tables, figures and acknowledgement). Short communications (<2000 words) are also welcome. We publish research, scholarship, and discussions that take a population and preventive approach. In addition to original contributions, ideas and suggestions for topics for future papers are also welcome. We publish special issues.

Public Health Nutrition is available on the Internet at: journals.cambridge.org/phn

International Editorial Board

Dr. Sonja Breyer, University of Cambridge, UK
Dr. Mine Gabor, U.C. Food and Drug Administration, USA
Dr. Kaoru Chiba, University of Waseda, Japan

The Nutrition Society

The society has as its objective the advancement of the scientific study of nutrition and its applications to the maintenance of human and animal health.

Particulars of The Nutrition Society and application forms for membership are available from the Honorary Secretary, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Telephone: +44 (0)20 7940 0228, Fax: +44 (0)20 7940 0272.

The Nutrition Society home page is at: http://www.thenutrition society.org

Content:

• Original research findings and scientific reviews are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
• Editorials express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
• Position papers, including declarations and other statements of policy, may be invited or unsolicited.
• Invited commentaries and book reviews are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
• Letters to the Editors are usually in response to material published in PHN. Submissions are sent to the author for comment and, when possible, published together with the author’s reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to http://mc.manuscriptcentral.com/phn. Please contact the Editorial Office on phn.editorial@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to state their conflicts of interests (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries and book reviews in the Editors’ endearments) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be reviewed as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a complete copy of the “Licence to Publish” (in copyrights transfer agreement, available at http://www.nutrition society.org). It is the author’s responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication or is to be published simultaneously.

Preparation of manuscripts: Please refer to the full Directions to Contributors on the website (http://www.nutrition society.org). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests. The submission of manuscript includes a statement within an Acknowledgements section reporting any competing interests (financial and non-financial), all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers: 1. Title page should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.

2. Abstract should be structured, usually following the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.

3. Text should be divided under headings (typically to include Introduction, Methods, Results, Discussion, and Conclusion), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are context, feasible, and potentially effective. Emphasizing that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and acknowledged by an ethics review committee.

4. Acknowledgements (sources of funding, competing interests declaration, authorship responsibilities, acknowledgments) should be included during the submission process, not as part of the manuscript.

5. References should be in Vancouver style. Please refer to the full Directions to Contributors on the website (http://www.nutrition society.org).

6. Tables should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be annotated with a clear and concise caption that is comprehensible without reference to the text. Longest tables must be published as online appendices.

7. Figures should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise requested. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original submitted text.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.
Mobile app increases vegetable-based preparations by low-income household cooks: a randomized controlled trial
