# GLASGOW MATHEMATICAL JOURNAL

The *Glasgow Mathematical Journal* is a continuation of the *Proceedings of the Glasgow Mathematical Association*, founded in 1952 by the late Professor T. M. MacRobert. It is published with the support of the University Court of the University of Glasgow. The *Glasgow Mathematical Journal* is published in Parts twice yearly, in January and July; two Parts complete a Volume of approximately 200 pages.

The prepaid subscription for each Volume is £19.50 in U.K., \$45.00 in U.S.A., post free. Single parts may be supplied at a cost of £10.00 in U.K., \$22.50 in U.S.A., net.

Copies may be ordered direct from the publisher or from any bookseller.

## *Information for Contributors*

While the *Glasgow Mathematical Journal* is intended primarily for Pure Mathematics, papers on Applied Mathematics will also be accepted. Manuscripts from all parts of the world will be welcomed and given careful consideration.

Manuscripts, preferably typed, should be prepared so as to conform with the practice in current numbers of the *Journal*, especially with regard to line illustrations, references, tables and summaries. The name of the author and the date of the receipt of the manuscript will be printed under the title. Text figures must be suitable for line block reproduction, lettered in pencil, numbered, and separated from the text but allocated clearly to sections of the text.

References should be placed at the end of the paper, arranged and numbered in alphabetical order. In the text, reference numbers should be enclosed in square brackets and underlined, to distinguish them from formula numbers, which should be quoted in round brackets. The following particulars should be given, in the order indicated:

for references to books—*author, title, edition, publisher, year of publication, page reference*;

for references to articles in periodicals—*author, title of article, short title of periodical, series no. (if any), volume no., year, pagination*.

A proof is supplied once in galley form, together with an Order Form for offprints. Offprints are supplied free to the number of fifty; additional copies, if ordered prior to publication, will be supplied, at cost, at the request of the contributor. Excessive corrections may be charged to the author.

Manuscripts should be sent to:

Printed in Northern Ireland at The  
Universities Press (Belfast) Ltd.

## CONTENTS

<b>Birch, B. J.</b> , When does an affine curve have an algebraic integer point?	1
<b>Burr, S. A. and Erdős, P.</b> , A Ramsey-type property in additive number theory	5
<b>Cassels, J. W. S.</b> , A diophantine equation	11
<b>Eichler, Martin</b> , The quadratic reciprocity law and the elementary theta function	19
<b>Elstrodt, J., Grunewald, F. and Mennicke, J.</b> , On unramified $A_m$ -extensions of quadratic number fields	31
<b>Erdős, P.</b> , <i>See</i> Burr, S. A. and Erdős, P.	5
<b>Good, A.</b> , Dirichlet and Poincaré series	39
<b>Grunewald, F.</b> , <i>See</i> Elstrodt, J., Grunewald, F. and Mennicke, J.	31
<b>Gundlach, Karl-Bernhard</b> , Multiplier systems for Hilbert's and Siegel's modular groups	57
<b>Halberstram, H.</b> , Application of a method of Szemerédi	81
<b>Heath-Brown, D. R.</b> , Small solutions of quadratic congruences	87
<b>Hooley, C.</b> , On the representations of numbers by binary cubic forms	95
<b>Iwaniec, Henryk</b> , Character sums and small eigenvalues for $\Gamma_0(p)$	99
<b>Lehner, J.</b> , Diophantine approximation on Hecke groups	117
<b>Macbeath, A. M.</b> , Generic Dirichlet polygons and the modular group	129
<b>Mennicke, J.</b> , <i>See</i> Elstrodt, J., Grunewald, F. and Mennicke, J.	31
<b>Montgomery, H. L. and Vaughan, R. C.</b> , The order of magnitude of the $m$ th coefficients of cyclotomic polynomials	143
<b>Newman, Morris</b> , The classical modular group as a subgroup of $GL(2, \mathbb{Z})$	161
<b>Patterson, S. J.</b> , The distribution of certain special values of the cubic Legendre system	165
<b>Ribet, Kenneth A.</b> , On $l$ -adic representations attached to modular forms II	185
<b>Roth, K. F.</b> , On a theorem of Beck	195
<b>Serre, Jean-Pierre</b> , Sur la lacunarité des puissances de $\eta$	203
<b>Vaughan, R. C.</b> , <i>See</i> Montgomery, H. L. and Vaughan, R. C.	143
<b>Vignéras, M.-F.</b> , Représentations Galoisiennes paires	223
<b>Wohlfahrt, K.</b> , Macbeath's curve and the modular group	239
