Making PCR

A STORY OF BIOTECHNOLOGY

Paul Rabinow

“PCR is one of the best-known recent advancements in molecular biology. Rabinow. . . provides unusual insights into the thoughts and actions involved with the PCR project. He presents Cetus, the corporation responsible for PCR, as an innovative marriage of academic and industrial cultures, but he does not hide the controversies about the company and its internal machinations. . . . Fast-paced and sometimes emotionally charged account of commercial science.”

THE UNIVERSITY OF CHICAGO PRESS

5801 South Ellis Avenue, Chicago, Illinois 60637

12

Cambridge University Press is proud to announce a newly acquired series **Cambridge Science Biographies**

General Editor: DAVID KNIGHT

Each biography is intended both to illuminate the scientific process and to place the scientists in the social and intellectual context of their age.

The books are written by prominent international authorities in the history of science, and are readily accessible to the general reader and student.

Originally published by Blackwell Publishers, Oxford

Charles Darwin

The Man and his Influence

PETER J. BOWLER

An almost mythical figure in the development of science, Darwin's natural selection was not initially accepted by many of his contemporaries. This study combines biography and cultural history, charting Darwin's considerable influence from his time to ours.

£35.00 net HB 0 521 56222 8 262 pp. 1996
£12.95 net PB 0 521 56668 1

Isaac Newton

Adventurer in Thought

A. RUPERT HALL

Hall's absorbing survey of modern scholarship interprets Newton's experimental approach to nature. Mathematics was the deepest of Newton's varied interests, unified in his single Christian design to explore God's creation. He cannot be simplified as a Platonist or mystic, but remains a complex, enigmatic genius with an imaginative, commonsensical mind.

£37.50 net HB 0 521 56221 X 484 pp. 1996
£13.95 net PB 0 521 56669 X

Galileo

Decisive Innovator

MICHAEL SHARRATT

Examines the imagination and penetration of Galileo, path-breaker for the telescope, decoder of nature's mathematics, populariser of science and the Inquisition's most famous victim.

Antoine Lavoisier

Science, Administration and Revolution

ARTHUR DONOVAN

'A vivid impression of experiments in progress is recorded in excellent engravings by Lavoisier's wife Marie Anne Paulze...'

Andrew Prentice, *Biologist*

£40.00 net HB 0 521 56218 X 367 pp. 1996
£14.95 net PB 0 521 56672 X

Henry More

Magic, Religion and Experiment

A. RUPERT HALL

Contains fascinating insights into his physics, spiritual philosophy and preoccupation with witchcraft. It is also an exceptional account of the Scientific Revolution.

£40.00 net HB 0 521 56223 6 318 pp. 1996

Humphry Davy

Science and Power

DAVID KNIGHT

In this entertaining biography David Knight introduces us to Humphry Davy, one of the first professional scientists. Best remembered for the safety lamp, he taught Faraday chemistry, but is also recognised for his poetry and was friends with Coleridge and Wordsworth.

£30.00 net HB 0 521 56309 7 232 pp. 1996

André-Marie Ampère

Enlightenment and Electrodynamics

JAMES R. HOFMANN

Renowned for his new branch of physics - electrodynamics and his original and significant contributions to mathematics and chemistry. With no formal education, he embraced the optimism of the enlightenment, and Catholicism. This, his only English biography, illuminates his contributions, epoch and creative genius.

£40.00 net HB 0 521 56220 1 420 pp. 1996

Science

HISTORY OF

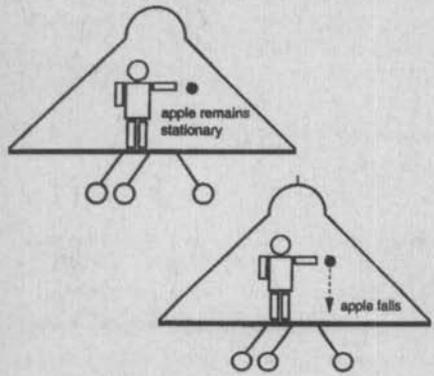

Understanding Relativity

A Simplified Approach to Einstein's Theories

LEO SARTORI

"Extraordinarily well-written, well-researched, and carefully thought out. . . . The discussions of the paradoxes of relativity and of cosmology are the best discussions of these topics at an elementary level that I have ever seen."

—Roger A. Freedman, University of California, Santa Barbara
£40.00 cloth, £15.95 paper, illustrated

Illustrations from *Understanding Relativity*

The Key to Newton's Dynamics

The Kepler Problem and the Principia
J. BRUCE BRACKENRIDGE

"The Key to Newton's Dynamics is lucid, important, and fills a large gap in the existing literature. Brackenridge is undoubtedly that gifted, patient teacher that one expects from a quality liberal arts college."

—Alan E. Shapiro, University of Minnesota
£40.00 cloth, £15.95 paper, illustrated

Lise Meitner

A Life in Physics

RUTH LEWIN SIME

"Dramatically lays bare the Nazi efforts . . . to obliterate Meitner's preeminence in 20th-century physics. This meticulously researched biography goes a long way to restoring it."—*Publishers Weekly*

An Alternate Selection of the Library Science Book Club, A Centennial Book California Studies in the History of Science, £28.00 cloth, illustrated

Cholera in Postrevolutionary Paris

A Cultural History

CATHERINE J. KUDLICK

"[Kudlick] has a story to tell about the role disease played in shaping political life and class identity in nineteenth-century France, and she knows how to tell it."

—Patricia O'Brien, author of *The Promise of Punishment Studies on the History of Society and Culture, £30.00 cloth, illustrated*

Possessing Nature

Museums, Collecting, and Scientific Culture in Early Modern Italy

PAULA FINDLEN

New in paperback—" [Findlen] examines the ways in which values such as memory, civility, and curiosity shaped new science, and she does so impressively."

—*Science Studies on the History of Society and Culture, Howard R. Marraro Prize, £14.95 paper, illustrated*

The History of Science

The Collected Papers of Albert Einstein

Volume 6: The Berlin Years
Writings, 1914–1917

Edited by A. J. Kox,
Martin J. Klein,
and Robert Schulmann

Presented in this volume are Albert Einstein's writings from his arrival in Berlin in the spring of 1914 to take up his new position at the Prussian Academy of Sciences through the

end of 1917. During these years he completed the general theory of relativity—the relativistic theory of gravitation—and this was surely the high point of his scientific life.

His writings on relativity in this volume range from general treatments of the theory to detailed calculations of specific consequences and his first attempt at a relativistic account of cosmology. They also include his popular exposition of the special and general theories, first published in 1917 and still a valuable account for the general reader.

New in paperback

Physical Chemistry from Ostwald to Pauling

The Making of a Science in America

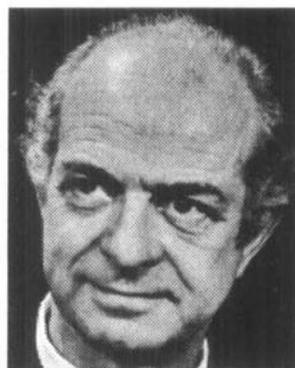

John W. Servos

"Servos has shed considerable light on a key issue, the formation of new scientific disciplines, by his penetrating analysis of the rise of physical chemistry in America. . .

. . . I cannot recall any other recent book in this field that has managed to combine such high standards of verbal clarity, smoothness of narrative, and sheer elegance, with intellectual rigor and extensive archival research."

—Peter Morris, *History of Science*

Now in paper: £16.50 ISBN 0-691-02614-9

New in paperback

Science and the Secrets of Nature

Books of Secrets in Medieval and Early
Modern Culture

William Eamon

"Eamon gives a rich and lively account of authors and writings that were always unacademic, unscrupulous, unprofessional, turbulent, and unsettled: that is to say, an account of the popular or seamy side of medicine and natural knowledge in medieval and early modern times. . . . Eamon is very learned and writes eloquently."

—Rupert Hall, *Nature*

THE BRITISH SOCIETY FOR THE HISTORY OF SCIENCE

Membership of the Society, which normally includes a subscription to *The British Journal for the History of Science*, is open to all persons approved by the Council of the Society and elected at an ordinary meeting. The annual subscription for the membership year 1996 is £24.00 (\$48.00) or £12.00 (\$25.00) for associate membership, which includes students at centres of higher education. There is an Introductory Offer for ordinary members who pay £20.00 (\$40.00) for the first year. Applications for membership should be made on a form which is available from the Society's Executive Secretary at the address below. Other sterling rates may apply to overseas members.

Meetings: The Society mounts an ambitious programme of meetings. The pattern is flexible, but includes a three-day summer meeting, usually held at a different university each year. About four other meetings, lasting for between one and three days, are held during the year, sometimes devoted to a clearly defined theme or an important anniversary, and often arranged in conjunction with other scholarly societies.

The British Journal for the History of Science is the official organ of the Society. All correspondence on the contents of the *Journal* should be addressed to the Editor, Dr Janet Browne, The Wellcome Institute for the History of Medicine, 183 Euston Road, London, NW1 2BE, England. Books for review should be sent to the Reviews Editor, Dr John Henry, Science Studies Unit, University of Edinburgh, 21 Buccleuch Place, Edinburgh EH8 9LN.

Advertising: Contact the Journals Advertising Manager, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU.

Other publications: BSHS Monograph Series is designed to allow the publication of monographic studies in the history of science quickly and cheaply. All correspondence on the subject of monographs, and any new suggestions for titles, should be sent to the Series Editor, Dr P. Weindling, Wellcome Unit for the History of Medicine, 45–47 Banbury Road, Oxford OX2 6PE, England. Monographs are available from the Society's Executive Secretary. Recent titles are as follows:

4. *The Royal Society and Its Fellows 1660–1700: The Morphology of an Early Scientific Institution*. By Michael Hunter. Second edition 1994. £10.00/\$19.00 (£8.00/\$15.00 to members).
5. *Francis Bacon's Natural Philosophy: A New Source. A Transcription of Manuscript Hardwick 72A with Translation and Commentary*. By Graham Rees, assisted by Christopher Upton. 1984. £7.90/\$17.00 (£5.60/\$12.00 to members).
6. *Archives of the British Chemical Industry, 1750–1914: A Handlist*. By Peter J. T. Morris and Colin A. Russell. Contributing editor John Graham Smith. 1988. £14.50/\$31.00 (£9.00/\$19.00 to members).
7. *Index to the Scientific Correspondence of John William Dawson*. By Susan Sheets-Pyenson. 1992. £20.00/\$44.00 (£12.00/\$26.00 to members).
8. *Science and Nature: Essays in the History of the Environmental Sciences*. Ed. by Michael Shortland. 1993. £10.00/\$19.00 (£8.00/\$15.00 to members).
9. *In the Shadow of Lavoisier: The 'Annals de Chemie' and the Establishment of a New Science*. By Maurice Crosland. 1994. £9.00/\$17.00 (£7.50/\$13.00 to members).
10. *E. Ray Lankester and the Making of Modern British Biology*. By Joe Lester and Peter Bowler. 1995. £9.00/\$17.00 (£7.50/\$13.00 to members).

Each year, the Society publishes a *List of Theses in History of Science* and a *Guide to History of Science Courses*. Please contact the Executive Secretary for copies.

The Society's *Newsletter*, an informal publication, appears in January, May and September each year. It is free to members, £6.00 (\$12.00) for institutions and non-members. The Society's Education Section also has a regular *Newsletter, Education Forum*.

Administrative business of the Society is handled by The Executive Secretary, Wing-Commander G. Bennett, 31 High Street, Stanford in the Vale, Faringdon, Oxfordshire SN7 8LH. The Society is registered in England as a Limited Company (No. 562208) and is a Registered Charity (No. 258854).

Copying: This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with the CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to CCC of the per-copy fee of \$5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0007-0874/96 \$5.00+.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions. *For all other use*, permission should be sought from Cambridge or the American branch of Cambridge University Press.

Back volumes are obtainable as follows: Volumes 1–23: Wing-Commander G. Bennett, 31 High Street, Stanford in the Vale, Faringdon, Oxon SN7 8LH. For volume 24 onwards, apply to Cambridge University Press.
