Network Science Editorial Team

EDITORS
Ulrik Brandes (Coordinating Editor),
Computer Science and Mathematics, ETH Zürich, Switzerland
Noshir Contractor, Communication, Management, and
Computational Social Science, Northwestern University, USA
Marta Gonzalez, Physics, UC Berkeley, USA
Laura Koehly, Psychology, Public Health, and Medicine,
National Human Genome Research Institute, USA
Filippo Menczer, Information Science, Indiana University, USA
Fernando Vega-Redondo, Economics, Bocconi University, Italy
Stanley Wasserman, Statistics and Behavioral Science,
Indiana University, USA

DEPUTY EDITOR
Christoph Stadtfeld, ETH Zürich, Switzerland

ASSOCIATE EDITORS
Sinan Aral, Information Science, Management, New York University, USA
Alain Barrat, Physics, CNRS, France
Yann Bramoule, Economics, Aix-Marseille University, France
Dirk Brockmann, Computer Science, Applied Mathematics,
Northwestern University, USA
Nicholas Christakis, Sociology, Medicine, Public Health, Yale University, USA
Jonathon Cummings, Business, Duke University, USA
Padraig Cunningham, Computer Science, University College
Dublin, Ireland
Matthew Elliott, Economics, California Institute of
Technology, USA
Christos Faloutsos, Computer Science, Data Mining,
Carnegie-Mellon University, USA
Katherine Faust, Sociology, University of California, Irvine, USA
James Fowler, Political Science, Public Health, Genetics,
University of California, San Diego, USA
Andrea Galeotti, Economics, University of Essex, UK

Managing Editor
Denise Weber, ETH Zürich, Switzerland

Network Science
Network Science is an important journal for an important discipline – one using the network paradigm, focusing on actors and relational linkages, to inform research, methodology, and applications from many fields across the natural, social, engineering and informational sciences. Given growing understanding of the interconnectedness and globalization of the world, network methods are an increasingly recognized way to research aspects of modern society along with the individuals, organizations, and other actors within it. The discipline is ready for a comprehensive journal, open to papers from all relevant areas. Network Science is a defining work, shaping this new discipline. The journal welcomes contributions from researchers in all areas working on network theory, methods, and data.

Subscription Information
Network Science (ISSN: 2050-1242) is published four times per year, in March, June, September, and December, by Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA. Periodicals postage rate paid at New York, NY, and at additional mailing offices. POSTMASTER: Send address changes in the USA, Canada, and Mexico to: Network Science, Cambridge University Press, Journals Fulfillment Department, One Liberty Plaza, 20th floor, New York, NY 10006. Send address changes elsewhere to Network Science, Cambridge University Press, Journals Fulfillment Department, UPH, Shaftesbury Road, Cambridge CB2 8BS, England. The subscription price of Volume 9 (2021) including delivery by air where appropriate (but excluding VAT), is $872.00 (£546.00) for institutions print and online; $828.00 (£517.00) for institutions online only. Orders, which must be accompanied by payment, may be sent to a bookseller, subscription agent or direct to the publisher: Cambridge University Press, Journals Fulfillment Department, Cambridge University Press, One Liberty Plaza, New York, NY 10006, USA; or Cambridge University Press, University Printing House, Shaftesbury Road, Cambridge CB2 8BS, UK. For further information, please contact journals@cambridge.org.

Advertising

CONTENTS

Original Articles

Robust coordination in adversarial social networks: From human behavior to agent-based modeling
CHEN HAJAJ, ZLATKO JOVESKI, SIXIE YU AND YEVENIY VOROBEYCHIK 255

Separable and semiparametric network-based counting processes applied to the international combat aircraft trades
CORNELIUS FRITZ, PAUL W. THURNER AND GÖRAN KAUFERMANN 291

Efficient Laplacian spectral density computations for networks with arbitrary degree distributions
GROVER E. C. GUZMAN, PETER F. STADLER AND ANDRÉ FUJITA 312

Diffusion profile embedding as a basis for graph vertex similarity
SCOTT PAYNE, EDGAR FULLER, GEORGE SPIROU AND CUN-QUAN ZHANG 328

Investigating scientific mobility in co-authorship networks using multilayer temporal motifs
HANJO D. BOEKHOUT, VINCENT A. TRAAG AND FRANK W. TAKES 354
