Thank you to our reviewers and editorial team

Edward W Fisher and Jonathan Fishman, Senior Editors

We are fortunate to have a hard-working team of board members, Cambridge University Press publishing team, senior editors and assistant editors, who allow us to publish a wide variety of papers across subspecialties and related disciplines. This hard work has contributed to our improvement in impact factor and efficient processing of coronavirus disease related papers during the pandemic. We are very grateful to all of our team.

Our 'best paper' prizes are judged by Liam Flood, Iain Swan, Desmond Nunez and Patrick Bradley. We congratulate the winner and two runners up^{1–3} for their high-quality work. We thank the judges for the considerable time spent on this onerous task, which helps to encourage our authors who dedicate much time and energy on producing their papers.

In addition to our senior and assistant editors, we have a loyal team of reviewers, and they contribute regularly to the flow of papers in our submission system. Our reviewers become assistant editors when long-serving colleagues retire, but as retirements are unpredictable, this means that our team contains many reviewers who have contributed a great deal of effort, but no suitable vacancy has arisen to allow a move up to assistant editorship. We use this editorial to thank our reviewer team individually by name here:

Pei-Pei Cheang
