Public Health Nutrition provides an international forum for the publication and dissemination of research and scholarship in the form of peer-reviewed original papers and reviews, and for discussion in the form of editorials, commentaries, and correspondence, with a specific focus on nutrition-related public health aspects. The scope of Public Health Nutrition encompasses nutrition and health policy at a population level, including work on assessment of nutritional status and nutritional environments, communication of nutrition-related information, implementation of programs and interventions, and sustainability of dietary patterns, food systems and supply. We welcome papers that:

- Address assessment, monitoring, and surveillance of nutritional status or the quality of nutritional environments
- Describe the development and evaluation of methodology for measurements and analyses in population-based studies
- Identify and analyse social, behavioral, environmental, economic, cultural, political, and psychological factors of nutrition-related public health, and dietary and nutritional factors as determinants of health outcomes.

Aims and Scope

Public Health Nutrition is available on the Internet at: https://journals.cambridge.org/phn

Dr. colleagues.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to http://mc.manuscriptcentral.com/phn. Please contact the Editorial Office at phn.editorial@cambridge.org regarding any other types of submission.

Refereeing: Review articles and research articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorial, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book review manuscripts may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to complete an online copy of the Licence to Publish (in lieu of copyright transfer), available at https://www.nutritionssociety.org. It is the author’s responsibility to obtain written permission to reproduce any material that is not their own (text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (http://www.nutritionssociety.org). Manuscripts should be prepared in standard English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Any material should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-space, 12 pt font, with 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on current issues and controversies. It also publishes special issues on major topics of research, scholarship and interest. Our field includes research on major health issues in public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Disclosure of financial support and any competing interests. The submission must include a statement within an Acknowledgements section reporting all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. Title page should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted as online. A separate cover letter is part of the manuscript, to enable double-blind reviewing.

2. Abstract should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.

3. Test should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasizing that more research is needed is usually not necessary unless there is specific evidence to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.

4. Acknowledgements (sources of funding, competing interests declared) should be presented as a separate section to the manuscript, to be provided during the submission process, not as part of the manuscript.

5. References should be in Vancouver style. Please refer to the full Directions to Contributors.

6. Tables should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Long tables may be published online only.

7. Figures should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of symbols and abbreviations. Sources of data should be cited, and details of the software used should be stated.

Proofs: Corrections and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will be given a PDF for proof reading. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the proofs and a paper free of charge. Offprints are available to purchase and must be ordered before publication.

Particulars of The Nutrition Society and application forms for membership are available from the Honorary Secretary, The Nutrition Society, 18 Cambridge Street, 210 Shoreditch High Street, London E1 6JG, UK.
