AIEDAM: Artificial Intelligence for Engineering Design, Analysis and Manufacturing is a journal intended to reach two audiences: engineers and designers who see AI technologies as powerful means for solving difficult engineering problems; and researchers in AI and Computer Science who are interested in applications of AI and in the theoretical issues that arise from such applications (for detailed information refer to the Aims and Scope section at the inside back cover).

AIEDAM is also interested in original, major applications of state-of-the-art AI techniques to important engineering problems (practicum papers). In addition to the rapid publication and dissemination of unsolicited research papers, AIEDAM is committed to producing special issues on important, timely topics. AIEDAM is indexed in Compendex Plus, SciSearch, Research Alert, and CompuMath Citation Index.

Editorial Office: Prof. Yan Jin, Editor, AIEDAM: Artificial Intelligence for Engineering Design, Analysis and Manufacturing, Department of Aerospace & Mechanical Engineering, University of Southern California, 3650 McClintock Avenue, OHE-430, Los Angeles, CA 90089-1453, USA. Telephone: 626-538-5615. E-mail: aiedam@usc.edu. Website: http://aiedam.usc.edu/
