Symposia featured in this issue:

Symposium 1: Exercise energetics and energy balance
- Exercise, energy expenditure and energy balance, as measured with doubly labelled water
  K. R. Westerterp 4
- Does skeletal muscle carnitine availability influence fuel selection during exercise?
  F. B. Stephens 11

Symposium 2: Maintenance of muscle mass for healthy ageing
- Characterising the muscle anabolic potential of dairy, meat, and plant-based protein sources in older adults
  S. H. M. Gorissen & O. C. Witard 20
- Female hormones: do they influence muscle and tendon protein metabolism?
  M. Hansen 32

Symposium 3: Nutrition and exercise interactions for metabolic health
- The role of whey protein in postprandial glycaemic control
  E. J. Stevenson & D. M. Allerton 42

Plenary Lecture 3: n-3 PUFAs and health: Fact, fiction and the future

University of Nottingham, Nottingham, 6–8 July 2015

Symposium 3: Impact of nutrition on psychopathologies, impact of psychopathologies on nutrition
- Nutrients for neurocognition in health and disease: measures, methodologies and mechanisms
  A. Scholey 73

Africa Nutritional Epidemiology Conference (ANEC) VII held at Palm Plaza Hotel, Marrakech 9–14 October 2016

Symposium 3: Nutrition dynamics in Africa: Opportunities and challenges for meeting the Sustainable Development Goals
- Optimising design and cost-effective implementation of future pan-African dietary studies: a review of existing economic integration and nutritional indicators for scenario-based profiling and clustering of countries
  E. X. Ajegbo, E. Landais, E. Zebe, E. Nisbet, M. J. Butter, P. Amora & N. Slimani 84
Directions to Contributors – Concise Version

The Proceedings of the Nutrition Society publishes papers presented by invitation and original communications given at the symposia and meetings of the Society. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. Further information on how the technical content of your paper should be presented is given in the Directions to Contributors on the journal’s web page at http://journals.cambridge.org or contact the Publications Office on +44 1223 347902 (telephone), or pns.edoffice@cambridge.org (email).

Authors are reminded that their papers will be read by a wide cross-section of the Society’s members, many of whom were neither at the meeting nor are they specialists in the subject area. Authors should thus seek to provide an introduction and context to the subject and be encouraged to provide extensive references to allow the reader to further explore the subject, in addition to summarizing the more recent findings, conclusions and hypotheses of their own and other research groups. Authors should avoid unnecessary use of ‘jargon’ and acronyms and ensure that as far as possible acronyms and abbreviations are defined and explained in the text.

Papers should be accompanied by a signed statement that is complete in itself and intelligible without reference to the text.

Page format. The Proceedings of the Nutrition Society is published in double-column format (column width of 85 mm) with a text area of 235 mm × 177 mm.

Text. Word-processed text provided electronically is required. Text files must be compatible with Microsoft Word 2000 (either in Word Format or saved as rich text (.rtf) files). The typscript should be prepared with 1.5 line spacing and margins (at least 1.5 cm) on each side and with no underlining, bold or italics (except for scientific names). Standard abbreviations (e.g. Fig. and Figs.) and SI units should be used. This will enable papers to be handled rapidly, and with fewer typesetting errors. All relevant financial and other interests should be declared.

Abstract. Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures, starting with the objective followed by the key findings and ending in clear conclusion. It should not exceed 250 words.

Key Words. Authors should supply two or three key words or phrases (each containing up to three words) for the subject index of the volume.

Tables. Tables should be reduced to the simplest form, and should not be used when text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must carry headings describing their content that are comprehensible without reference to the text.

Illustrations. All figures should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they make a real contribution to the text. Colour illustrations can be used at the discretion of the Editor. Figure captions should be typed separately at the end of the main text and numbered corresponding to the relevant figures. For illustrations, preferred software packages are Adobe Illustrator, Adobe Photoshop, Adobe Freehand, Chamdrw or CoreDraw. Preferred formats are TIFF or JPEG, if a TIFF file is not possible save as an EPS or a Windows metafile. Microsoft PowerPoint files are also acceptable.

References. References must be based on the numbered (Vancouver) system. When an article has more than ten authors, only the names of the first three should be given followed by et al. give abbreviated journal titles and conform to the following styles:

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. The conceptual difficulty of this approach has recently been highlighted(1,2–4). If a reference is cited more than once the same number should be used each time.

Proofs. PDF page proofs will be accessible to authors from the typesetter’s website and should be returned within 48 hours (by email or Express mail) to: Monica Nelson 2 Leicester Road, Wanstead London E11 2DP UK email nelsonoline@btinternet.com

Proceedings of the Nutrition Society, published by Cambridge University Press on behalf of the Nutrition Society 2018©
Contents

University of Stirling, Stirling, 28–29 March 2017
Conference on ‘Nutrition and exercise for health and performance’

Editorial
The interaction between nutrition and exercise for promoting health and performance
O. C. Witard & D. Ball

Symposium 1: Exercise energetics and energy balance
Exercise, energy expenditure and energy balance, as measured with doubly labelled water
K. R. Westerterp
Does skeletal muscle carnitine availability influence fuel selection during exercise?
F. B. Stephens

Symposium 2: Maintenance of muscle mass for healthy ageing
Characterising the muscle anabolic potential of dairy, meat, and plant-based protein sources in older adults
S. H. M. Gorissen & O. C. Witard
Female hormones: do they influence muscle and tendon protein metabolism?
M. Hansen

Symposium 3: Nutrition and exercise interactions for metabolic health
The role of whey protein in postprandial glycaemic control
E. J. Stevenson & D. M. Allerton

University of Nottingham, Nottingham, 6–9 July 2015
Conference on ‘The future of animal products in the human diet: health and environmental concerns’

Plenary Lecture 3 n-3 PUFA and health: fact, fiction and the future
Very long-chain n-3 fatty acids and human health: fact, fiction and the future
P. C. Calder

Royal Society of Medicine, London, 6–7 December 2016
Conference on ‘Diet, nutrition and mental health and wellbeing’

Symposium 3: Impact of nutrition on psychopathologies, impact of psychopathologies on nutrition
Nutrients for neurocognition in health and disease: measures, methodologies and mechanisms
A. Scholey

Africa Nutritional Epidemiology Conference (ANEC VII) held at Palm Plaza Hotel, Marrakech, 9–14 October 2016
Conference on ‘Nutrition dynamics in Africa: opportunities and challenges for meeting the sustainable development goals’

Optimising design and cost-effective implementation of future pan-African dietary studies: a review of existing economic integration and nutritional indicators for scenario-based profiling and clustering of countries
E. K. Aglago, E. Landais, F. Zotor, G. Nicolas, M. J. Gunter, P. Amuna & N. Slimani
Forthcoming topics to be featured in *Proceedings of the Nutrition Society* for 2018 (vol. 77):

- Irish Section Postgraduate Conference
  *(Above proceedings were presented at the NS meeting in Dublin, 16–17 February 2017)*
- What governs what we eat?
  *(Above proceedings were presented at the NS meeting at Queen’s University Belfast, 21–23 June 2017)*
- Improving nutrition in metropolitan areas
  *(Above proceedings were presented at the NS meeting at King’s College London, 10–12 July 2017)*
- Diet, nutrition and the changing face of cancer survivorship
  *(Above proceedings were presented at the NS meeting at the Royal Society of Medicine, London, 5–6 December 2017)*

**Original Communications**

- Diet, nutrition and the changing face of cancer survivorship
  *(Above proceedings were presented at the NS meeting at the Royal Society of Medicine, London, 5–6 December 2017)*
- Nutrient-nutrient interactions
  *(Above proceedings to be presented at the NS meeting at the University of Glasgow, 26–27 March 2018)*
- Targeted approaches to tackling current nutritional issues
  *(Above proceedings to be presented at the NS meeting at Ulster University, 20–22 June 2018)*
- Getting the energy balance right
  *(Above proceedings to be presented at the NS meeting at the University of Leeds, 10–12 July 2018)*
