

INDEX OF SUBJECTS

	PAGE
Agglutination, granular "O," with <i>B. typhosus</i> and <i>B. paratyphosus</i> B	516
qualitative and quantitative methods of testing for enteric infections	523
small flaking or granular, with <i>B. typhosus</i> , etc.	375
<i>see</i> Bacteria: <i>Brucella</i> , <i>B. typhosus</i> and <i>B. paratyphosus</i> .	
Air, effect on man of CO from internal combustion engines	406
influence of humidity on capacity for work at high temperatures	431
physiological response to breathing hot air	332
temperature and humidity between shirt and skin of man	268
<i>see</i> Ethylene oxide.	
Anthrax-infected dried hides, disinfection by hydrogen sulphide	367
 Bacteria, <i>see also</i> Effluents, Sewage.	
Bacilli, aerobic, endospore formation in relation to culture medium	535
<i>Bacillus aerogenes</i> , its significance in water	132
<i>aerogenes</i>	529
<i>aertrycke</i>	152
<i>anthracis</i> , sporulation	536
spores, disinfection, <i>see</i> Anthrax-infected.	
<i>coli-aerogenes</i> group, classification	85
in faeces, water, soil	85, 132
<i>coli</i> forms mannitol	385
strains from faeces, utilise citrates and ferment cellobiose	529
<i>diphtheriae</i> , blood tellurite medium for isolation	544
latent infection with, etc.	193
<i>megatherium</i> , sporulation	536
<i>mesentericus</i> , sporulation	536
<i>morgani</i> , produces gas from mannitol	385
<i>mucosus capsulatus</i> group, study of	240
<i>mycoides</i> , sporulation	536
<i>subtilis</i> , sporulation	536
<i>typhosus</i> , agglutination	375
forms mannitol	385
isolated during water-borne epidemic	428
<i>typhosus</i> and <i>B. paratyphosus</i>	143
<i>see</i> Agglutination.	
<i>Brucella</i> group, specific and non-specific agglutination in	45
<i>Brucella abortus</i> in milk	354
<i>Meningococcus</i>	258
<i>Proteus vulgaris</i> , pleomorphism induced by NaCl in medium	283
<i>Streptococcus mucosus lyticus</i> from respiratory tract infections	275
Vaccines found highly toxic	282
Bacterial synergism: mannitol formed by <i>B. typhosus</i> or <i>B. coli</i> from which <i>B. morgani</i> produces gas	385
variation, combining affinities, and carcinogenesis	301
Bactericidal action of normal serum, "whole" blood and serum-leucocyte mixtures	494
mechanism of normal serum	494
Bactericidins of normal serum	1
Bacteriological examination of water in tropics, etc.	85, 136
Beriberi, <i>see</i> Rice.	

	PAGE
Bronchitis, <i>see</i> Meteorological.	
Broncho-pneumonia, <i>see</i> Meteorological.	
Cancer and Syphilis	79
and tobacco smoking	293
Carcinogenesis	301
susceptibility in relation to colour in mice	557
Carbon monoxide, <i>see</i> Air.	
Child health and child weight, study upon effect of certain factors	465
Climate, <i>see</i> Air, Meteorological.	
Clothing, <i>see</i> Air.	
Contraceptives (chemical), spermicidal powers of	171, 550
Diet, <i>see</i> Vitamin.	
Diphtheria carriers	193
Disinfection, <i>see</i> Anthrax-infected.	
Effluents: gasworks' liquors, bacterial purification of	573
Encephalitis lethargica, incidence of	219
Engines, <i>see</i> Internal combustion (in relation to CO given off).	
Ethylene oxide (used as insecticide, vermin destroyer, fumigant for foodstuffs) dangers to guard against	409
Flea index in relation to plague in Java	399
Food, <i>see</i> Rice.	
Growth under Vita glass, experiments on rats	211
Immunity, <i>see</i> Agglutination, Bactericidal, Bactericidins, Meningitis, Precipitins, Rabies, Schick, Vaccinia.	
Internal combustion engines, CO given off, effect on Hb concentration	406
Java, plague in	396
Magnesium, excessive intake in rat, causing renal calculi	156
Meningitis, epidemic meningococcal, prophylactic vaccination for	258
Meteorological conditions affecting respiratory mortality	67
Mining, <i>see</i> Air.	
Mortality from respiratory diseases, <i>see</i> Meteorological.	
Plague, problem of seasonal incidence	396
Pneumonia <i>et al.</i> , <i>see</i> Meteorological.	
Poliomyelitis, acute anterior, incidence of	219
Precipitins, estimation of proteins by	340
Rabies, aetiology of paralytic accidents	33
index of acquired resistance to infection afforded by rabicidal effect of rabbit immune serum	489
Rays, <i>see</i> Ultra-violet.	
Renal calculi in rat induced by excessive magnesium intake	156
Respiration, <i>see</i> Air.	
Rice, effect of parboiling and milling on vitamin and phosphate content	184

	PAGE
Schick immunity and latent diphtheria infection	193
School children, <i>see</i> Child.	
Seasonal incidence of plague	396
Serology, <i>see</i> Agglutination, Bactericidal, Bactericidins, Paratyphoid, Precipitins, Rabies, Typhoid.	
Sewage, action of gasworks' liquors on bacterial flora of	573
Spermicides, <i>see</i> Contraceptives.	
Syphilis and Cancer	79
Tobacco smoking and cancer	293
Typhoid and Paratyphoid fevers, serological diagnosis of	143
Typhoid fever, a water-borne epidemic	417
Ultra-violet rays, effect on growth of rats	211
Undulant fever <i>et al</i> , <i>see</i> Bacteria (<i>Brucella</i>).	
Vaccinia, immunisation with inactive virus	55
immunity and disability caused by	25
Vita glass, growth of rats under	211
Vitamin B ₁ (antineuritic), <i>see</i> Rice.	
Water-borne epidemic of typhoid fever	417
Water supplies, <i>see</i> Bacteriological examination of.	
Whooping cough, epidemiology of, in London	581
