

# CNS Spectrums

**Editor-in-Chief**

Stephen M. Stahl, *University of California San Diego, School of Medicine, USA*

*CNS Spectrums* aims to be the premier journal covering all aspects of clinical neurosciences, neurotherapeutics and neuropsychopharmacology, particularly those pertinent to the clinician and clinical investigator. The journal, now bimonthly, features focused, in-depth, illustrated, readable reviews, commentaries, and original research articles. New therapeutics of all types in psychiatry, mental health, and neurology are emphasized, especially first in studies on humans and proof of concept studies. Subject coverage spans the full spectrum of neuropsychiatry, focusing on translational issues and those crossing traditional boundaries between neurology and psychiatry.

*CNS Spectrums*  
is available online at:

## INSTRUCTIONS FOR CONTRIBUTORS

### SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via our manuscript submission and tracking site, <http://www.editorialmanager.com/psm/>. Full instructions for electronic submission are available directly from this site. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

Papers for publication from Europe (except those on genetic topics, irrespective of country), and all papers on imaging topics, should be submitted to the UK Office.

Papers from the Americas, Asia, Africa, Australasia and the Middle East (except those dealing with imaging topics), and all papers dealing with genetic topics, irrespective of country, should be sent to US Office.

Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

**Declaration of Interest:** A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

**REFERENCES** (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be supplied in alphabetical order (authors' names in **bold**, journal titles in full), following the text. Some examples follow:

**Miller PM, Byrne M, Hodges A, Lawrie SM, Johnstone EC** (2002). Childhood behaviour, psychotic symptoms and psychosis onset in young people at high risk of schizophrenia: early findings from the Edinburgh high risk study. *Psychological Medicine* **32**, 173–179.

**Cleckley HJ** (1941). *The Mask of Sanity*, 2nd edn. Mosby: St. Louis, MO.

**Brewer WJ, Wood SJ, DeLuca C, Pantelis C** (2006). Models of olfaction for exploring neurodevelopment. In *Olfaction and the Brain* (ed. W. J. Brewer, D. Castle and C. Pantelis), pp. 97–121. Cambridge University Press: Cambridge.

(3) Online citations

doi (when published online prior to printed issue)

[Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.]

**FIGURES AND TABLES** Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. **Tables** Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

**PROOFS AND OFFPRINTS** Page proofs will be sent to the author designated to receive correspondence. corrections other than to printer's errors may be charged to the author. The corresponding author of each paper will receive a PDF file of their article and hard copy offprints may be purchased if they are ordered on the form supplied when the proof is returned.

# PSYCHOLOGICAL MEDICINE

## CONTENTS

### REVIEW ARTICLES

**Kinds versus continua: a review of psychometric approaches to uncover the structure of psychiatric constructs**

Borsboom D, Rhemtulla M, Cramer AOJ, van der Maas HLJ, Scheffer M & Dolan CV 1567

**Meta-analysis of executive functioning in ecstasy/polydrug users**

Roberts CA, Jones A & Montgomery C 1581

**A meta-analysis on pain sensitivity in self-injury**

Koenig J, Thayer JF & Kaess M 1597

### ORIGINAL ARTICLES

**Somatic, positive and negative domains of the Center for Epidemiological Studies Depression (CES-D) scale: a meta-analysis of genome-wide association studies**

Demirkiran A, Lahti J, et al. 1613

**Deficits in executive functions among youths with autism spectrum disorders: an age-stratified analysis**

Chen S-F, Chien Y-L, Wu C-T, Shang C-Y, Wu Y-Y & Gau SS 1625

**A novel sibling-based design to quantify genetic and shared environmental effects: application to drug abuse, alcohol use disorder and criminal behavior**

Kendler KS, Ohlsson H, Edwards AC, Lichtenstein P, Sundquist K & Sundquist J 1639

**Metabolic syndrome in people with a psychotic illness: is cannabis protective?**

Waterreus A, Di Prinzio P, Watts GF, Castle D, Galletly C & Morgan VA 1651

**Continuity of cannabis use and violent offending over the life course**

Schoeler T, Theobald D, Pingault J-B, Farrington DP, Jennings WG, Piquero AR, Coid JW & Bhattacharyya S 1663

**Neural correlates of improved executive function following erythropoietin treatment in mood disorders**

Miskowiak KW, Vinberg M, Glerup L, Paulson OB, Knudsen GM, Ehrenreich H, Harmer CJ, Kessing LV, Siebner HR & Macoveanu J 1679

**Relationship between personality and psychopathology in a longitudinal community study: a test of the predisposition model**

Hengartner MP, Ajdacic-Gross V, Wyss C, Angst J & Rössler W 1693

**Brain dopamine and serotonin transporter binding are associated with visual attention bias for food in lean men**

Koopman KE, Roefs A, Elbers DCE, Fliers E, Booij J, Serlie MJ & la Fleur SE 1707

**Does father-child conflict mediate the association between fathers' postnatal depressive symptoms and children's adjustment problems at 7 years old?**

Nath S, Russell G, Kuyken W, Psychogiou L & Ford T 1719

**The prevalence of visual hallucinations in non-affective psychosis, and the role of perception and attention**

van Ommen MM, van Beilen M, Cornelissen FW, Smid HGOM, Knegtering H, Aleman A & van Laar T 1735

**Nitrous oxide speeds the reduction of distressing intrusive memories in an experimental model of psychological trauma**

Das RK, Tamman A, Nikolova V, Freeman TP, Bisby JA, Lazzarino AI & Kamboj SK 1749

**Clinical significance of psychotic experiences in the context of sleep disturbance or substance use**

DeVylder JE & Kelleher I 1761

**Meta-analysis of DSM alcohol use disorder criteria severities: structural consistency is only 'skin deep'**

Lane SP, Steinley D & Sher KJ 1769
