

## CORRIGENDUM

**Dose-response effects of raw potato starch on small-intestinal escape, large-bowel fermentation and gut transit time in the rat**

By J. C. Mathers, Helen Smith and Sophie Carter

Volume 78 (1997), Number 6

Figure 2, page 1023

Please replace Figure 2 with the following:

Fig. 2. Concentrations of (a) *Bacillus stearothermophilus* spores (BSS) (●—●) and (b) chromium-EDTA (▲—▲) in faeces following a single oral dose of the markers given in a test meal. This example is for a rat fed on diet PS2 (see Table 1). The inset panels illustrate the extraction of a rate constant ( $k_1$ ) from the descending portions of the natural logarithm of the marker concentration-with-time curves for (i) BSS (○—○) and (ii) chromium-EDTA (△—△).
