Call for Abstracts

National Association of EMS Physicians

2002 Annual Meeting: January 10–12, 2002

Westin La Paloma Resort, Tucson, Arizona

The National Association of EMS Physicians (NAEMSP) is now accepting abstracts for review for oral and poster research presentations at the NAEMSP 2002 Annual Meeting. Authors are urged to submit original work involving EMS or resuscitation research. The full spectrum of out-of-hospital and resuscitation research will be considered including basic science, clinical, health services research, epidemiological, operational, economic, and educational studies. Physicians, research scientists, out-of-hospital care providers, and administrators are all encouraged to submit their work. Cash awards will be given for Best Resident/Fellow Presentation, Best Scientific Presentation, Best Professional Presentation, and Best Poster Presentation. Also, NAEMSP is now accepting abstracts for an International poster session. Authors are encouraged to submit abstracts describing large (national or regional) non-U.S. EMS systems for consideration for presentation.

Complete submission rules can be obtained on the NAEMSP Web site at www.naemsp.org or contact the NAEMSP Executive Offices at (800) 228-3677. Additional meeting information will be available on the NAEMSP Web site. Questions can be directed to the NAEMSP Executive Office at (800) 228-3677 or info-naemsp@goAMP.com.

Abstract deadline is 12:00 noon Central Daylight Time, Friday, September 7, 2001.

All abstracts will be reviewed and scored in a blinded fashion by a sub-committee of the NAEMSP Research Committee. Papers will be selected for oral and for poster presentation, with exact numbers in each category to be determined by the number of submissions, time and space limitations at the meeting venue, etc. All selected abstracts will be published in *Prehospital Emergency Care*, the official journal of NAEMSP. Manuscript submission to *PEC* is encouraged, but right of first refusal is not required. Research submitted for consideration may not have been published previously, though prior presentation within 90 days of the meeting is acceptable.
