

ANY WAY YOU LOOK AT IT, THIS NEW REFERENCE IS THE PLACE TO LOOK FIRST

... because our comprehensive, multidisciplinary *Index to Scientific Reviews*™ will lead you directly to review articles on just about any science subject. And because it's organized so you can find exactly the reviews you need, in several different ways. All of them fast and easy.

Each year *ISR*™ indexes thousands of reviews in some 100 disciplines, from the world's leading science and technology journals. Plus those in the regular "review" publications. And gives you timely twice-a-year coverage through a semi-annual edition and an annual cumulation.

At only \$250 per year, *ISR* is an effective way to cover the journal literature for those who can't afford the major indexes. Or, for those who place a premium on finding review articles with less effort, *ISR* can complement the major indexes.

Just use the coupon below to learn why the new *Index to Scientific Reviews* may be tailor-made for your organization.

isi® Institute for Scientific Information®
325 Chestnut Street, Philadelphia, Pa. 19106, U.S.A.
Tel: (215) 923-3300, Cable: SCINFO, Telex: 84-5305

The journal you are reading and 5000 others are regularly covered in *CURRENT CONTENTS*®.

Tables should be as simple and as few as possible. When constructing tables, it would be helpful if authors would take into account the size and shape of the pages of *Animal Production*.

Summary: Every article should have a short summary (not more than 250 words) complete in itself and understandable without reference to the paper. *The summary will be printed at the beginning of the paper.*

References: Only papers closely related to the author's work should be referred to; exhaustive lists should be avoided. Bibliographical details should be in the following order: author's name, initials, year, title of paper, title of journal (abbreviated according to the World List of Scientific Periodicals), volume of journal, first and last page of paper. References should be listed in alphabetical order. When abstracts are referred to, the page reference should be followed by (Abstr.).

Examples:

BLAXTER, K. L. and WILSON, R. S. 1962. The voluntary intake of roughages by steers. *Anim. Prod.* 4: 351-358.

HAMMOND, J. 1932. *Growth and the Development of Mutton Qualities in the Sheep*. Oliver and Boyd, Edinburgh.

In the text, references should be made by giving author and year; at the first mention all authors should be named, thereafter the first author followed by *et al.* should be used for papers with more than two authors.

Proofs are supplied once and must be returned corrected to the Editors within seven days. Only essential corrections should be made.

Reprints: Twenty-five reprints of each paper will be supplied free to authors on request. Further copies may be purchased if the order is sent at the proof stage.

Animal Production is published six times a year in two volumes. Annual subscription is £20.00 (or \$56.00 in the U.S.A. and Canada) and the price for a single part is £4.00 (or \$12.00) net.

Proceedings of the British Society of Animal Production (New Series) ceased publication in 1975 and the material is now published as a separate section of the February issue of *Animal Production*.

Business matters, including regular subscriptions and sales (current and back numbers of the Journal and the Proceedings) should be addressed to Longman Group, Journals Division, 43/45 Annandale Street, Edinburgh EH7 4AT.

Senior Editor

J. A. F. ROOK, Hannah Research Institute.

Editors

M. BICHARD, Pig Improvement Company (*Proceedings*).

W. G. HILL, Institute of Animal Genetics.

J. HODGSON, Hill Farming Research Organisation.

A. M. RAVEN, West of Scotland Agricultural College.

J. C. TAYLER, Grassland Research Institute.

A. J. F. WEBSTER, Rowett Research Institute.

M. B. WILLIS, University of Newcastle-upon-Tyne.
