	PAGE
SYLLABUS OF PAPERS read during Session 1915-16 - - -	v
PRESENTS TO THE LIBRARY - - - - -	vii
BRODETSKY, Dr S.	
On the Linear Differential Equation of the Second Order	45
BROWN, T. A.	
Fourier's Integral - - - - -	3
DATTA, HARIPADA.	
(1) On the Theory of Continued Fractions - - -	109
(2) On Symmetric Determinants and Pfaffians - - -	197
DOUGALL, Dr JOHN.	
The Solution of Mathieu's Differential Equation - - -	176
GIBB, D.	
On Integral Relations connected with the Hypergeometric Function - - - - -	93
INCE, E. LINDSAY.	
On the Continued Fractions associated with the Hyper- geometric Equation - - - - -	146
JEFFERY, J. B.	
Bipolar and Toroidal Harmonics - - - - -	102
LIST OF MEMBERS - - - - -	205

	PAGE
MILNE, Dr ARCH.	
Note on the Peano-Baker Method of solving Linear Differential Equations -	41
MILNE, Dr WILLIAM P.	
(1) Determinantal Systems of Points -	155
(2) The Hessian-Polars of n -dimensional Cubics -	160
OFFICE-BEARERS -	1
PHILIP, Dr GEORGE.	
On a Group of Parabolas associated with the Triangle -	77
PRESS, Lieut. EDWARD.	
Easy Geometrical Proof of a Theorem of Chasles -	2
STEGGALL, Prof. J. E. A.	
The Equation $x^3 - u^3 = y^3 - v^3$ when x, y, u, v are rational -	11
STRANG, Prof. J. A.	
The Solution of Difference Equations by Continued Fractions -	61
TAYLOR, Dr D. G.	
Real Linear Substitutions with Equimodular Multipliers, and their expression in terms of their Invariants -	18
TAYLOR, F. GLANVILLE.	
Birationally Related Cubics -	163
TINTO, Dr J. F.	
On the Three-Dimensional Transformations founded on the Twisted Cubic and its Chord System -	133
