

The Mathematics of Radiative Transfer

I. W. BUSBRIDGE

A simple but rigorous treatment of some of the mathematical problems which arise in the theory of the transfer of radiation through the atmosphere of a star. The book is written primarily for those working on the theory of stellar atmospheres or of neutron diffusion, but will also interest those concerned with other diffusion processes. CAMBRIDGE MATHEMATICAL TRACTS.

An Introduction to Homological Algebra

D. G. NORTHCOTT

Professor Northcott introduces homological ideas and methods and shows some of the results which can be achieved. He provides the results needed to establish the theory of derived functions, and applies the new concepts to the theory of global dimensions.

CAMBRIDGE UNIVERSITY PRESS

THE QUARTERLY JOURNAL OF MATHEMATICS

OXFORD SECOND SERIES

Edited by T. W. CHAUNDY, U. S. HASLAM-JONES, E. C. THOMPSON

VOLUME 11

No. 43

September 1960

CONTENTS

- I. M. James: On H -spaces and their homotopy groups
L. Carlitz: The product of basic Bessel functions
H. Minc: Mutability of bifurcating root-trees
A. Fröhlich: On groups over a d.g. near-ring (I): sum constructions and free R -groups
A. Fröhlich: On groups over a d.g. near-ring (II): categories and functors
P. Srivastava: Theorems on strong Riesz summability

Quarterly Journal of Mathematics (Oxford Second Series) is published in March, June, September and December at 16s. net for a single number with an annual subscription (for four numbers) of 55s. post free. Orders may be placed with any bookseller or sent direct to the Publisher.

PROCEEDINGS

OF THE

EDINBURGH MATHEMATICAL SOCIETY

VOLUME 12 (Series 2)

November 1960

PART 2

- W. DERSKI: On Transient Thermal Stresses in an Infinite Thin Plate.
F. J. LOCKETT: The Propagation of Thermal Stresses in a Semi-infinite Medium.
W. H. INGRAM: The \mathcal{Y} -Differential and its Integral.
W. D. COLLINS: On the Solution of some Axisymmetric Boundary Value Problems by means of Integral Equations.
IV. The Electrostatic Potential due to a Spherical Cap between Two Infinite Conducting Planes.
A. M. OSTROWSKI: On the Eigenvector Belonging to the Maximal Root of a Non-Negative Matrix.
G. D. C. STOKES: Linkages for the Trisection of an Angle and Duplication of the Cube.
EDINBURGH MATHEMATICAL NOTES
B. D. JOSEPHSON: An Alternative Proof of a Theorem on the Lebesgue Integral.
T. W. CHAUNDY and J. B. MCLEOD: On a Functional Equation.
E. M. HARTLEY: Plane Collineations.
D. H. PARSONS: Linear Ordinary Differential Equations with Constant Coefficients: Identification of Boole's Integral with that of Cauchy.
LL. G. CHAMBERS: Some Properties of the Zeros of Bessel Functions.

Series I of the PROCEEDINGS consists of forty-four volumes published from 1886 to 1926.

Series II consists of eleven complete volumes to date.

The PROCEEDINGS are published in parts and issued twice yearly. Four parts complete a volume of approximately 200 pages and the Title Pages and Index are published in part 4 of each volume.

The prepaid subscription per volume is 60s. (U.S.A. and CANADA \$10.00) post free. Single parts 15s. (U.S.A. and CANADA \$2.50) net. Orders, and requests for prices of in-print back numbers, should be addressed to Oliver and Boyd Ltd., Tweeddale Court, 14, High Street, Edinburgh, 1.
