The authors would like to make two corrections to the text:

### Methods

All questions were answered on a four-point scale ranging from 0 (strongly disagree) to 3 (strongly agree). **The scoring of the**

**fourth item was reversed, and thus a higher score signified feeling less overwhelmed.**

### Table 6

Outcomes on the study-specific questionnaire ranging from 0 (strongly disagree) to 3 (strongly agree) points, **with reversed scoring of the fourth item** ( $N = 10$ )

The authors sincerely apologise for the errors.
