International Psychogeriatrics

Issue Theme: Longitudinal Studies of Aging

CONTENTS

Commentaries
763 Health and social factors key to understanding attrition in longitudinal aging research
Judith Godin and Olga Theou

767 Looking for navigational charts for the journey through dementia
Luis Agüera-Ortiz

771 Evolution from pseudodementia to dementia: is depressive symptom an optional extra?
Yuelin Yu and Shengfeng Wang

775 Do frailty and depression interact to heighten risk of death?
Diana M. Verdonk and Paul H. Voss

779 The interplay between depressive symptoms, cognitive function, activities of daily living and cognitive reserve in older adults
Simone Reppermund

783 Could the occurrence of neuropsychiatric disorders affect the incidence of stroke and its long-term effects?
Karolina Filipska

787 Predictors of attrition in a longitudinal population-based study of aging
Erin Jacobsen, Xinhui Ran, Anran Liu, Chung-Chou H. Chang, and Mary Ganguli

791 Trajectories and risk factors of dementia progression: a memory clinic cohort followed up to 3 years from diagnosis
Trine Holt Edwin, Bjørn Heine Strand, Karin Persson, Knut Engedal, Geir Selbæk, and Anne-Brita Knapskog

795 Degenerative symptoms with cognitive dysfunction increase the risk of cognitive impairment: analysis of the Korean Longitudinal Study of Aging (KLoSA), 2005–2018
Seung-Ho Shin

799 Frailty, depressive risk, and 10-year mortality in older adults: the FRAGSA study
Maria Carolina Ruz-Cruz, Pedro Manuel Solchaga-Ortego, Monica Alfonsa-Casal, Antonio Hervarte-Martinez, Almudena Avendaño-González, and Pedro Ríos

803 Educational level as a protective factor against the influence of depressive symptoms on cognition in older adults: implications for functional independence during a 10-year follow-up
Víctor Caro-López, Marta Álvaro, Adriana Duroș, Paula Martinez, Mercedes Almela, Marta J. Carlos-Rubio, and Sara Puig-Peña
