The *Proceedings of the Nutrition Society* publishes papers presented by invitation and original communications given at the symposia and meetings of the Society. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. Further information on how the technical content of your paper should be presented is given in the *Directions to Contributors* on the journal's web page at http://journals.cambridge.org/pns or contact the Publications Office on +44 1223 347922 (telephone), or pns.edoffice@cambridge.org (email).

Authors are reminded that their papers will be read by a wide cross-section of the Society's members, many of whom were neither at the meeting nor are they specialists in the subject area. Authors should thus seek to provide an introduction and context to the subject and are encouraged to provide extensive references to allow the reader to further explore the subject, in addition to summarizing the more recent findings, conclusions and hypotheses of their own and other research groups. Authors should avoid unnecessary use of 'jargon' and acronyms and ensure that as far as possible acronyms and abbreviations are defined and explained in the text.

Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full *Directions to Contributors*. Contributors of Symposium papers will be asked to complete a copy of the 'Licence to Publish' (in lieu of copyright transfer) at the proof stage.

**Page format.** The *Proceedings of the Nutrition Society* is printed in double-column format (column width of 85 mm) with a text area of 235×177 mm.

**Text.** Word-processed text provided electronically is required. Text files must be compatible with Microsoft Word 2000 (either in Word format or saved as rich text (.rtf) files). The typescript should be prepared with 1·5 line spacing and margins (at least 1·5 cm) on each side and with no underlining, bold or italics (except for scientific names). Standard abbreviations (e.g. Fig. and Figs.) and SI units should be used. *This will enable papers to be handled rapidly, and with fewer typesetting errors. All relevant financial and other interests should be declared.*

**Abstract.** Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures, starting with the objective followed by the key findings and ending in clear conclusion. It should not exceed 250 words.

**Key Words.** Authors should supply two or three key words or phrases (each containing up to three words) for the subject index of the volume.

**Tables.** Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must carry headings describing their content that are comprehensible without reference to the text.

**Illustrations.** All figures should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they make a real contribution to the text. Colour illustrations can be used at the discretion of the Editor. Figure captions should be typed separately at the end of the main text and numbered corresponding to the relevant figures. For illustrations, preferred software packages are Adobe Illustrator, Adobe Photoshop, Aldus Freehand, Chedraw or CorelDraw. Preferred formats are TIFF or JPEG, if a TIFF file is not possible save as an EPS or a Windows metafile. Microsoft PowerPoint files are also acceptable.

**References.** References must be based on the numbered (Vancouver) system. *When an article has more than ten authors, only the names of the first three should be given followed by et al.; give abbreviated journal titles and conform to the following styles:*

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. *The conceptual difficulty of this approach has recently been highlighted*(1,2–4). If a reference is cited more than once the same number should be used each time.

**Proofs.** PDF page proofs will be accessible to authors from the typesetter’s website and should be returned within 48 hours (by email or Express mail) to:

Editorial
Understanding the interplay between the gut microbiome, nutrition, and health
D. Ball & S. Athanasiadou 383–385

Symposium 1: The impact of nutrition on the gut microbiome
Dietary fibre complexity and its influence on functional groups of the human gut microbiota
P. Louis, M. Solvang, S. H. Duncan, A. W. Walker & I. Mukhopadhyya 386–397

Symposium 2: Gut microbiome, nutrition and health: cause and effect
Interactions between dietary fibre and the gut microbiota
Diet and gut microbiota manipulation for the management of Crohn’s disease and ulcerative colitis
V. Svolos, K. Gkikas & K. Gerasimidis 409–423

Symposium 3: Pathogens x gut microbiota interactions
Inflammatory Bowel Disease and the Gut Microbiota

Winter Conference Live 2020, 8 – 9 December 2020
Conference on ‘Micronutrient malnutrition across the life course, sarcopenia and frailty’
GeNuIne (gene–nutrient interactions) Collaboration: towards implementing multi-ethnic population-based nutrigenetic studies of vitamin B12 and D deficiencies and metabolic diseases
K. S. Vimaleswaran 435–445
