Aims and Scope
The Journal of the International Neuropsychological Society is the official journal of the International Neuropsychological Society, an organization of over 4,500 international members from a variety of disciplines. The Journal of the International Neuropsychological Society welcomes original, creative, high quality research papers covering all areas of neuropsychology. The focus of articles may be primarily experimental, applied, or clinical. Contributions will broadly reflect the interest of all areas of neuropsychology, including but not limited to: development of cognitive processes, brain-behavior relationships, adult and pediatric neuropsychology, neurobehavioral syndromes (such as aphasia or apraxia), and the interfaces of neuropsychology with related areas such as behavioral neurology, neuropsychiatry, genetics, and cognitive neuroscience. Papers that utilize behavioral, neuromaging, and electrophysiological measures are appropriate.

To assure maximum flexibility and to promote diverse mechanisms of scholarly communication, the following formats are available in addition to Regular Research Articles: Brief Communications are shorter research articles; Rapid Communications are intended for 'fast breaking' new work that does not yet justify a full length article and are placed on a fast review track; Neurobehavioral Grand Rounds are theoretically important and unique case studies; Critical Reviews and Short Reviews are thoughtful considerations of topics of importance to neuropsychology, including associated areas, such as functional brain imaging, genetics, neuroepidemiology, and ethical issues; Dialogues provide a forum for publishing two distinct positions on controversial issues in a point-counterpoint format; Symposia consist of several research articles linked thematically; Letters to the Editor respond to recent articles in the Journal of the International Neuropsychological Society; and Book Reviews, Critical Reviews, Dialogues, and Symposia are typically invited by the Editor-in-Chief or an Associate Editor. Book Reviews are considered but are no longer solicited.

Originality and Copyright
To be considered for publication in the Journal of the International Neuropsychological Society, a manuscript cannot have been published previously nor can it be under review for publication elsewhere. Papers with multiple authors are reviewed with the assumption that all authors have contributed substantially to the research, and each author concur with its submission to the Journal of the International Neuropsychological Society; A Copyright Transfer Agreement, with certain specified rights reserved by the author, must be signed and returned to the Editor-in-Chief by the corresponding author of accepted manuscripts, prior to publication. This is necessary for the wide distribution of research findings and the protection of both author and the society under copyright law. If you plan to include material that has been published elsewhere and is under copyright of a third party, you will need to obtain permission to re-use this material in your article. A form is provided for this purpose by the editorial office. Alternatively, many publishers use an online system for such requests. It is the responsibility of the authors to obtain permissions to re-use material from elsewhere. For information regarding rights and permissions concerning the Journal of the International Neuropsychological Society, please contact Marc Anderson (manderson@cambridge.org) or Adam Hirschberg (ahirschberg@cambridge.org).

Disclosure
Potential conflicts of interest include funding sources for the reported study (e.g., a test validation study financially supported by a test publisher, a study supported by an insurance company), personal or family financial interest in a test or product or with a company that publishes a test that is being investigated in the manuscript or competes with a test that is being investigated in the manuscript. Other conflicts include employment, consultancies, stock ownership or medicolegal work. For the latter, information about whether the author’s medicolegal work is largely for one side should be reported. This list of potential conflicts is not all inclusive, and it is the responsibility of each author to ensure that all of their ‘potential conflicts’ are reported in the Acknowledgment section of the paper.

Disclosure pertains to all authors. It is the corresponding author’s ethical responsibility to explicitly check with each of his/her co-authors to ensure that any real or apparent conflict of interest is appropriately disclosed. Authors should err on the side of full disclosure, and if authors are uncertain about what constitutes a relevant conflict, they should contact the editorial office jins@cambridge.org. The intent of this disclosure is not to prevent an author with a significant financial or other relationship from publishing a paper in the Journal of the International Neuropsychological Society, but rather to provide readers with adequate information to form their own judgments about the work.

Compliance with institutional research standards for animal or human research (including a statement that the research was conducted in accordance with the Helsinki Declaration (http://www.wma.net/en/30publications/10policies/b3/) should be included in the methods section of the manuscript. Manuscript Submission and Review
The Journal of the International Neuropsychological Society uses online submission and peer review. Paper submissions are not accepted. Authors who are not able to submit their manuscripts online are asked to contact the editorial office at: jins@cambridge.org. The website address for submissions is http://mc.manuscriptcentral.com/jins. Complete instructions are provided on the website. Prior to online submission, please consult http://www.nlm.nih.gov/mesh/ for 6 keywords or mesh terms that are different from words in the title. Accurate mesh terms will increase the probability that your manuscript will be identified in online searches. Please follow these instructions carefully to avoid delays. The menu will prompt the author to provide all necessary information, including the manuscript category, the corresponding author including postal address, phone and fax numbers, and e-mail address, and suggested reviewers.

The website will automatically acknowledge receipt of the manuscript and provide a manuscript reference number. The Editor-in-Chief will assign the manuscript for review to an action editor and at least two other reviewers. Every effort will be made to provide the author with a review within 6 to 10 weeks of manuscript assignment. Rapid Communications will be reviewed within 6 weeks. If the Editor requests that revisions be made to a manuscript before publication, a maximum of 3 months will be allowed for preparation of the revision, except in unusual circumstances.

Manuscript Length
In order to increase the number of manuscripts that can be published in the Journal of the International Neuropsychological Society, please adhere to the following length requirements. Please provide a word count on the title page for the abstract and manuscript (not including abstract, tables, figures, or references). Manuscripts will be returned if they exceed length requirements.

Regular Research Articles: Maximum of 5,000 words (not including abstract, tables, figures, or references) and a 250 word abstract. Regular Research Articles are original, creative, high quality papers covering all areas of neuropsychology; focus may be experimental, applied or clinical.

Brief and Rapid Communications: Maximum of 2,500 words (not including abstract, tables, figures, or references) and a 200 word abstract, with a maximum of two tables or two figures, or one table and one figure, and 20 references. Brief and Rapid Communications are shorter research articles.

Neurobehavioral Grand Rounds: Maximum of 3,500 words with an informative literature review (not including abstract, tables, figures, or references) and a 200 word abstract. Neurobehavioral Grand Rounds are unique case studies that make a significant theoretical contribution.

Critical Review: Maximum of 7,000 words (not including abstract, tables, figures, or references) and a 150 word abstract. Critical Reviews will be considered on any important topic in neuropsychology. Quantitative meta-analyses are encouraged. Critical Reviews must be preapproved by the Editor-in-Chief. For consideration, please e-mail your abstract to jins@cambridge.org.

Short Review: Maximum of 2,500 words (not including abstract, tables, figures, or references) and a 150 word abstract. Short Reviews are conceptually-oriented snapshots of the current state of a research area by experts in that area. Short Reviews must be pre-approved by the Editor-in-Chief. For consideration, please e-mail your abstract to jins@cambridge.org.

Dialogues: Maximum of 2,000 words for each segment (not including abstract, tables, figures, or references) and a 150 word abstract, with a maximum of two tables or two figures, or one table and one figure and 20 references. Dialogues provide a forum for two distinct positions on controversial issues in a point-counterpoint form. Dialogues must be preapproved by the Editor-in-Chief. For consideration, please e-mail your abstract to jins@cambridge.org.

Symposia: Maximum of 5,000 words (not including abstract, tables, figures, or references) and a 250 word abstract for each article (same as Regular Research Articles). Symposia consist of several thematically linked research articles which present empirical data. Symposia must be pre-approved by the Editor-in-Chief. For consideration, e-mail your proposal to jins@cambridge.org to receive prior approval.

Letters to the Editor: Maximum of 500 words (not including abstract, table, figure, or references) with up to five references and one table or one figure. Letters to the Editor respond to recent articles in Journal of the International Neuropsychological Society.

Book Reviews: Maximum of 1000 words in length. Include name and affiliations, a title for the review, the book title, publisher, date of publication, number of pages and price. For consideration, e-mail jins@cambridge.org.

Manuscript Preparation and Style
The entire manuscript should be typed double-spaced throughout using

Downloaded from https://www.cambridge.org/core. IP address: 35.160.27.221, on 30 Apr 2022 at 07:52:23, subject to the Cambridge Core terms of use, available at https://www.cambridge.org/core/terms. https://doi.org/10.1017/S1355617714000617
New and Forthcoming Titles in Psychology from Cambridge University Press!

**Second Edition!**

**Cognitive Science**  
An Introduction to the Science of the Mind  
**José Luis Bermúdez**  
$135.00: Hb: 978-1-107-05162-1  
$70.00: Pb: 978-1-107-65335-1: 560 pp.

**The Dyslexia Debate**  
**Julian G. Elliott** and **Elena L. Grigorenko**  
*Cambridge Studies in Cognitive and Perceptual Development*  
$85.00: Hb: 978-0-521-11986-3  

**Third Edition!**

**Evolutionary Psychology**  
An Introduction  
**Lance Workman** and **Will Reader**  
$110.00: Hb: 978-1-107-04464-7  

**Language and Time**  
A Cognitive Linguistics Approach  
**Vivyan Evans**  

**Simplicity in Vision**  
A Multidisciplinary Account of Perceptual Organization  
**Peter A. van der Helm**  

**Learning in Doing:**  
Social, Cognitive and Computational Perspectives

**How Humans Learn to Think Mathematically**  
Exploring the Three Worlds of Mathematics  
**David Tall**  
$99.00: Hb: 978-1-107-03570-6  

**Now in Paperback!**

**Constructing the Self in a Digital World**  
**Cynthia Carter Ching** and **Brian J. Foley**  

**Second Edition!**

**The Cambridge Handbook of Multimedia Learning**  
**Richard E. Mayer**  
*Cambridge Handbooks in Psychology*  
$140.00: Hb: 978-1-107-03520-1: 936 pp.

**Now in Paperback!**

**The Learning Sciences in Educational Assessment**  
The Role of Cognitive Models  
**Jacqueline P. Leighton** and **Mark J. Gierl**  
$98.00: Hb: 978-0-521-19411-2  

**Tip of the Tongue States and Related Phenomena**  
**Bennett Schwartz** and **Alan S. Brown**  

**Trauma and Forgiveness**  
Consequences and Communities  
**C. Fred Alford**  
$95.00: Hb: 978-1-107-04340-4: 225 pp.

**William James,**  
Sciences of Mind, and Anti-Imperial Discourse  
**Bernadette M. Baker**  

Prices subject to change.
SPECIAL SERIES

567 The Cognition Battery of the NIH Toolbox for Assessment of Neurological and Behavioral Function: Validation in an Adult Sample

579 Factor Structure, Convergent Validity, and Discriminant Validity of the NIH Toolbox Cognitive Health Battery (NIHTB-CHB) in Adults

588 Reliability and Validity of Composite Scores from the NIH Toolbox Cognition Battery in Adults

599 NIH Toolbox Cognition Battery (NIHTB-CB): List Sorting Test to Measure Working Memory

611 Measuring Episodic Memory Across the Lifespan: NIH Toolbox Picture Sequence Memory Test

620 NIH Toolbox Cognition Battery (CB): Validation of Executive Function Measures in Adults

630 NIH Toolbox Cognitive Battery (NIHTB-CB): The NIHTB Pattern Comparison Processing Speed Test

642 Language Measures of the NIH Toolbox Cognition Battery
