UNIVERSITY OF LONDON.

SEMON LECTURE.

This annual Lecture will be delivered on Thursday, November 5th, at 5 p.m., at the Royal Society of Medicine, 1 Wimpole Street, London, W.1. The lecturer, Mr. Walter Howarth, has chosen as his subject "Some tumours and ulcers of the palate and fauces".

Peroral Endoscopy Table

Fitted with Head Rest for BRONCHOSCOPY, ŒSOPHAGOSCOPY,
NASAL OPERATIONS Etc.

Designed by V. E. NEGUS, M.S., F.R.C.S.

The head rest enables the operator himself to place the patient in the desired position for a variety of operations. All parts touched by the operator are sterilisable.

The apparatus is an elaboration of Haslinger's Bronchoscopic head rest, but its range of utility is extended to enable the patient to be supported with the shoulders beyond the end of the table for œsophagoscopy, and to be kept in the correct attitude during operations performed in the sitting or semi-sitting position.
