

**Applied Probability journals online at**  
**<http://projecteuclid.org/jap>**  
**<http://projecteuclid.org/aap>**

*Journal of Applied Probability* and *Advances in Applied Probability* are now available online, in partnership with Project Euclid, at no extra cost to subscribers.

The online editions include

- an electronic version of each new issue (in PDF format) some weeks before the printed version becomes available
- an archive of all issues since 1998
- full bibliographic details of each article, along with its abstract and an actively linked list of references
- a search facility, allowing users to search by author name, article title, subject or keyword, or through the full text of the abstract or the article itself

### **Access**

The abstract and reference list of each article are available free to all users; full access to the archive, including the full text of articles, is currently available at no extra charge to subscribers to the print editions.

Individual subscribers should register with Project Euclid by creating a user profile, entering their JAP and/or AAP subscription number where a 'subscriber code' is requested.

Institutional subscribers should complete and return a licence agreement (available at <http://www.appliedprobability.org/euclidaccess.html>) to the Applied Probability office along with details of their IP range.

Non-subscribers can gain access to individual articles on a pay-per-view basis.

For further information, please contact Sue Boyles: telephone +44 114 222 3922, fax +44 114 272 9782, email [s.c.boyles@sheffield.ac.uk](mailto:s.c.boyles@sheffield.ac.uk), write to

## Subscription rates

Subscription rates for volume **45** (2008) of *Journal of Applied Probability (JAP)* are as follows (post free and including online access at <http://projecteuclid.org/jap/>): US\$372.00; A\$447.00; £186.00 for libraries and institutions; or US\$124.00; A\$149.00; £62.00 for individuals belonging to a recognised scientific society. The subscription rates for volume **40** (2008) of *Advances in Applied Probability*, the companion publication, are the same; if both journals are ordered directly from the Applied Probability office at the same time, the combined price is discounted by 10%. Please send all enquiries to: Applied Probability Subscriptions, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK (telephone +44 114 222 3922; fax +44 114 272 9782; email [s.c.boyles@sheffield.ac.uk](mailto:s.c.boyles@sheffield.ac.uk)). Cheques, money orders, etc. should be made payable to 'Applied Probability'. Payment is acceptable in US, Australian or UK currency, or by Visa or Mastercard. We can provide back issue prices on application.

## Notes for contributors

Papers published in *Journal of Applied Probability (JAP)* may be either: (i) *research papers* not exceeding 20 printed pages; or (ii) *short communications* of a few printed pages in the nature of notes or brief accounts of work in progress. *Letters* relating specifically to papers that have appeared in *JAP* will also be published there. *Review papers, longer research papers, letters to the Editor* and papers in *stochastic geometry and statistical applications* are published in *Advances in Applied Probability*, the companion publication.

It is the policy not to accept for publication papers that cannot appear in print within 15 months of the date of receipt of the final version. In order to meet this deadline, an accepted paper may be published in either journal, according to the space available.

Fifty offprints of each paper will be provided free, with additional offprints available at cost.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Papers should be written in English or French; papers in other languages may be accepted, but will appear (subject to the author's agreement) in English or French translation.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2000 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L<sup>A</sup>T<sub>E</sub>X class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as hard copy or as electronic files (with hard copy back-up). All submissions will be acknowledged on receipt and **must be accompanied by a covering letter stating the author's postal address and affiliation**. Hard copy: Send **all** submissions to the Applied Probability office in Sheffield, and not to individual editors. Two copies of the paper, at least one of which should be double spaced, should be sent to: **Executive Editor, Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK**. Electronic submission: Please email a **double-spaced** PostScript™ (.ps) or portable document format (.pdf) file, not exceeding 1 Mb. **The files must be clearly identified by name in a separate covering message**. The address for email submissions is [l.nash@sheffield.ac.uk](mailto:l.nash@sheffield.ac.uk). Authors should also submit one hard copy to the Executive Editor, as above.

## Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021-9002/08

Volume 45 Number 1

*Research Papers*

- 1 SHELDON M. ROSS AND ZEGANG ZHU. On the structure of a swing contract's optimal value and optimal strategy
- 16 SHALOM BENAÏM AND PETER FRIZ. Smile asymptotics II: models with known moment generating functions
- 33 PIETER ALLAART AND MICHAEL MONTICINO. Optimal buy/sell rules for correlated random walks
- 45 RENÉ FERLAND AND GASTON GIROUX. Law of large numbers for dynamic bargaining markets
- 55 KA CHUN CHEUNG AND HAILIANG YANG. Ordering of optimal portfolio allocations in a model with a mixture of fundamental risks
- 67 CLAUDIA KLÜPPELBERG AND SIDNEY I. RESNICK. The Pareto copula, aggregation of risks, and the Emperor's socks
- 85 BANGWON KO AND QIHE TANG. Sums of dependent nonnegative random variables with subexponential tails
- 95 ERIC CARLEN, ESTER GABETTA AND EUGENIO REGAZZINI. Probabilistic investigations on the explosion of solutions of the Kac equation with infinite energy initial distribution
- 107 KEN R. DUFFY AND ARTEM SAPOZHNIKOV. The large deviation principle for the on–off Weibull sojourn process
- 118 ALAN L. LEWIS AND ERNESTO MORDECKI. Wiener–Hopf factorization for Lévy processes having positive jumps with rational transforms
- 135 B. A. SURYA. Evaluating scale functions of spectrally negative Lévy processes
- 150 R. McVINISH. On the structure and estimation of reflection positive processes
- 163 ANDREAS H. LÖPKER AND JOHAN S. H. VAN LEEUWAARDEN. Transient moments of the TCP window size process
- 176 YANGRONG LI, ANTHONY G. PAKES, JIA LI AND ANHUI GU. The limit behavior of dual Markov branching processes
- 190 ANDREAS N. LAGERÅS AND SERIK SAGITOV. Reduced branching processes with very heavy tails
- 201 F. CARBONELL AND J. C. JIMENEZ. Weak local linear discretizations for stochastic differential equations with jumps
- 211 ALEXANDER DUDIN, CHESOONG KIM AND VALENTINA KLIMENOK. Markov chains with hybrid repeating rows – upper-Hessenberg, quasi-Toeplitz structure of the block transition probability matrix
- 226 GRÉGORIE NUEL. Pattern Markov chains: optimal Markov chain embedding through deterministic finite automata
- 244 ABBA M. KRIEGER, MOSHE POLLAK AND ESTER SAMUEL-CAHN. Beat the mean: sequential selection by better than average rules
- 260 HENRY W. BLOCK, YULIN LI, THOMAS H. SAVITS AND JIE WANG. Continuous mixtures with bathtub-shaped failure rates

*Short Communications*

- 271 COLIN MALLOWS AND LARRY SHEPP. The necklace process
- 279 LUDGER RÜSCHENDORF. On a comparison result for Markov processes
- 287 BERNARDO NUNES BORGES DE LIMA AND ARTĚM SAPOZHNIKOV. On the truncated long-range percolation on  $\mathbb{Z}^2$
