# SYR. HYPOPHOS. CO., FELLOWS.

**CONTAINS THE ESSENTIAL ELEMENTS** of the Animal Organization—Potash and Lime;

**THE OXIDISING AGENTS**—Iron and Manganese;

**THE TONICS**—Quinine and Strychnine;

**AND THE VITALISING CONSTITUENT**—Phosphorus: the whole combined in the form of a Syrup, with a **SLIGHTLY ALKALINE REACTION.**

**IT DIFFERS IN ITS EFFECTS FROM ALL ANALOGOUS PREPARATIONS;** and it possesses the important properties of being pleasant to the taste, easily borne by the stomach, and harmless under prolonged use.

**IT HAS GAINED A WIDE REPUTATION,** particularly in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs. It has also been employed with much success in various nervous and debilitating diseases.

**ITS CURATIVE POWER** is largely attributable to its Stimulant, Tonic, and Nutritive Properties, by means of which the energy of the system is recruited.

**ITS ACTION IS PROMPT;** it stimulates the appetite and the digestion; it promotes assimilation, and it enters directly into the circulation with the food products.

The prescribed dose produces a feeling of buoyancy, and removes depression and melancholy; hence **THE PREPARATION IS OF GREAT VALUE IN THE TREATMENT OF MENTAL AND NERVOUS AFFECTIONS.** From the fact, also, that it exerts a double tonic influence and induces a healthy flow of the secretions, its use is indicated in a wide range of diseases.

**NOTICE—CAUTION.**—The success of Fellows' Syrup of Hypophosphites has tempted certain persons to offer imitations of it for sale. Mr. Fellows, who has examined samples of several of these, **finds that no two of them are identical,** and that all of them differ from the original in composition, in freedom from acid reaction, in susceptibility to the effects of oxygen when exposed to light or heat, **in the property of retaining the strychnine in solution,** and in the medicinal effects.

As these cheap and inefficient substitutes are frequently dispensed instead of the genuine preparation, physicians are earnestly requested, when prescribing the Syrup, to write "**Syr. Hypophos. FELLOWS.**"

As a further precaution, it is advisable that the Syrup should be ordered in the original bottles (4s. or 7s.); the distinguishing marks which the bottles (and the wrappers surrounding them) bear can then be examined, and the genuineness—or otherwise—of the contents thereby proved.
