

Glasgow Mathematical Journal

CONTENTS

E. Hotzel , On semigroups whose nontrivial left congruence classes are left ideals	1
W. A. Kirk , On successive approximations for nonexpansive mappings in Banach spaces	6
Ian Anderson , A concavity problem in number theory	10
D. B. McAlister and L. O'Carroll , Maximal homomorphic images of commutative semigroups	12
F. R. McMorris , The quotient semigroup of a semigroup that is a semilattice of groups	18
Russell A. Smith , A stability condition for n th order difference equations	24
Hiroshi Haruki , On a functional equation for the exponential function of a complex variable	31
D. J. Foulis and C. H. Randall , Conditioning maps on orthomodular lattices	35
E. H. Feller and R. L. Gantos , Completely right injective semigroups that are unions of groups	43
D. Singerman , Automorphisms of compact non-orientable Riemann surfaces	50
M. Iftikhar Ahmad , Quadruple integral equations and operators of fractional integration	60
G. C. Sih and P. S. Dobreff , Crack-like imperfections in a spherical shell	65

GLASGOW MATHEMATICAL JOURNAL

The *Glasgow Mathematical Journal* is a continuation of the *Proceedings of the Glasgow Mathematical Association*, founded in 1952 by the late Professor T. M. MacRobert. It is published with the support of the University Court of the University of Glasgow. The *Glasgow Mathematical Journal* is published in Parts twice yearly, in January and July; two Parts complete a Volume of approximately 160 pages.

The prepaid subscription for each Volume is £2.50 in U.K., \$7.00 in U.S.A., post free. Single parts may be supplied at a cost of £1.25 in U.K., \$3.50 in U.S.A., net.

Copies may be ordered direct from the publishers or from any bookseller.

Information for Contributors

While the *Glasgow Mathematical Journal* is intended primarily for Pure Mathematics, papers on Applied Mathematics will also be accepted. Manuscripts from all parts of the world will be welcomed and given careful consideration.

Manuscripts, preferably typed, should be prepared so as to conform with the practice in current numbers of the *Journal*, especially with regard to line illustrations, references, tables and summaries. The name of the author and the date of the receipt of the manuscript will be printed under the title. Text figures must be suitable for line block reproduction, lettered in pencil, numbered, and separated from the text but allocated clearly to sections of the text.

References should be placed at the end of the paper, arranged and numbered in alphabetical order. In the text, reference numbers should be enclosed in square brackets and underlined, to distinguish them from formula numbers, which should be quoted in round brackets. The following particulars should be given, in the order indicated:

for references to books—*author, title, edition, place of publication, year of publication, page reference*;

for references to articles in periodicals—*author, title of article, short title of periodical, series no. (if any), volume no., year, pagination*.

A proof is supplied once in galley form, together with an Order Form for off-prints. Offprints are supplied free to the number of twenty-five; additional copies, if ordered prior to publication, will be supplied, at cost, at the request of the contributor. Excessive corrections may be charged to the author.

Manuscripts should be sent to:
